QUESTION 1

You administer a SQL Server Reporting Services (SSRS) instance in native mode.

You need to assign a predefined role that meets the following requirements:

Members of the role must be able to update shared data sources. Members of the role must not be able to consume reports or manage subscriptions.

The role must provide only the minimum permissions required.

Which role should you assign(More than one answer choice may achieve the goal. Select the BEST answer.)

- A. The Content Manager role
- B. The Read and Process role
- C. The Publisher role
- D. The Browser role

Correct Answer: C

Name:

Publisher

Description:

May publish reports and linked reports to the Report Server.

Select the tasks that members of this role can perform:

<input type="checkbox"/>	Task	Description
<input type="checkbox"/>	Consume reports	Reads report definitions.
<input checked="" type="checkbox"/>	Create linked reports	Create linked reports and publish them to a report server folder.
<input type="checkbox"/>	Manage all subscriptions	View, modify, and delete any subscription regardless of who owns the subscription.
<input checked="" type="checkbox"/>	Manage data sources	Create and delete shared data source items; and modify data source properties.
<input checked="" type="checkbox"/>	Manage folders	Create, view and delete folders; and view and modify folder properties.
<input type="checkbox"/>	Manage individual subscriptions	Each user can create, view, modify and delete subscriptions that he or she owns.
<input checked="" type="checkbox"/>	Manage models	Create, view, and delete models; and view and modify model properties.
<input type="checkbox"/>	Manage report history	Create, view, and delete report history snapshots; and modify report history properties.
<input checked="" type="checkbox"/>	Manage reports	Create, and delete reports; and modify report properties.
<input checked="" type="checkbox"/>	Manage resources	Create, modify and delete resources; and modify resource properties.
<input type="checkbox"/>	Set security for individual items	View and modify security settings for reports, folders, resources, and shared data sources.
<input type="checkbox"/>	View data sources	View shared data source items in the folder hierarchy; and view data source properties.
<input type="checkbox"/>	View folders	View folder items in the folder hierarchy; and view folder properties.
<input type="checkbox"/>	View models	View models in the folder hierarchy, use models as data sources for a report, and run queries against the model to retrieve data.
<input type="checkbox"/>	View reports	View reports and linked reports in the folder hierarchy; view report history snapshots and report properties.
<input type="checkbox"/>	View resources	View resources in the folder hierarchy; and view resource properties.

QUESTION 2

A company maintains separate environments for development, test, and production. The company uses the project deployment model for SQL Server Integration Services (SSIS) deployments.

You create an SSIS project to perform a daily refresh of the data warehouse and data models. The project has five packages.

You need to configure the project to ensure that the development, test, and production teams can run each package without manually adding server-specific information.

Which program should you use?

To answer, select the appropriate program in the answer area.

Hot Area:

Correct Answer:

QUESTION 3

You need to develop a BISM that meets the business requirements for ad-hoc and daily operational analysis. You must minimize development effort.

Which development approach and mode should you use?

- A. Develop a tabular project and configure the model with the DirectQuery mode setting on and the project query mode set to DirectQuery.
- B. Develop a tabular project and configure the model with the DirectQuery mode setting on and the project query mode set to In-Memory with DirectQuery.
- C. Develop a multidimensional project and configure the model with the DirectQuery mode setting off.
- D. Develop a multidimensional project and configure the cube to use hybrid OLAP (HOLAP) storage mode.

Correct Answer: B

QUESTION 4

You are designing a complex report that displays sales metrics for a customer hierarchy. The customer hierarchy has six levels and contains approximately 1 million members.

You have the following requirements:

Allow users to easily display and navigate data.

Minimize report processing time.

Simplify the report design and maintenance processes.

You need to design a report that meets the requirements.

How should you design the report(More than one answer choice may achieve the goal.

Select the BEST answer.)

- A. Retrieve all customers and use drilldown groupings to show or hide hierarchy levels.
- B. Add a report part for each hierarchy level.
- C. Add a subreport for each hierarchy level.
- D. Display only the children of the current hierarchy level and drill through to the selected member.

Correct Answer: D

QUESTION 5

You need to select the appropriate model type for the Finance database. Which model type should you select?

- A. Star schema
- B. Multidimensional
- C. Relational
- D. Tabular with PowerPivot

Correct Answer: B
