QUESTION 1

You have a database named DB1.

You plan to configure change data capture on the existing tables in DB1.

The database file settings for the DB1 are shown in the exhibit. (Click the Exhibit button.)

You need to minimize disk contention caused by change data capture.

What should you do?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. Increase the autogrowth value of the database file.
- B. Set the database recovery model to simple.

- C. Increase the autogrowth value of the log file.
- D. Configure change data capture to use to a secondary filegroup.

Correct Answer: D

QUESTION 2

You have a SQL Server 2014 database named DB1.

You plan to import a large number of records from a SQL Azure database to DB1.

You need to recommend a solution to minimize the amount of space used in the transaction log during the import operation.

What should you include in the recommendation?

- A. The bulk-logged recovery model
- B. The full recovery model
- C. A new partitioned table
- D. A new log file
- E. A new file group

Correct Answer: A

Explanation: Compared to the full recovery model, which fully logs all transactions, the bulk-logged recovery model minimally logs bulk operations, although fully logging other transactions. The bulk-logged recovery model protects against

media failure and, for bulk operations, provides the best performance and least log space usage.

Note:

The bulk-logged recovery model is a special-purpose recovery model that should be used only intermittently to improve the performance of certain large-scale bulk operations, such as bulk imports of large amounts of data.

Recovery Models (SQL Server)

QUESTION 3

You have a database named database1.

Database developers report that there are many deadlocks.

You need to implement a solution to monitor the deadlocks. The solution must meet the following requirements:

Support real-time monitoring.

Be enabled and disabled easily.

Support querying of the monitored data.

What should you implement?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. Log errors by using trace flag 1222
- B. Log errors by using trace flag 1204
- C. A SQL Server Profiler template
- D. An Extended Events session

Correct Answer: D

Explanation: <http://www.sqlservercentral.com/blogs/james-sql-footprint/2012/08/12/monitor-deadlock-in-sql-2012/>

QUESTION 4

You need to recommend a database reporting solution that meets the business requirements. What should you include in the recommendation?

- A. Data collection
- B. Performance Monitor
- C. A maintenance plan
- D. A dynamic management view

Correct Answer: A

QUESTION 5

You need to recommend a solution for the error handling of USP_4. The solution must handle errors for nested stored procedures in the code for USP_4. What should you recommend?

- A. Use the @@ERROR variable in the nested stored procedures.
- B. Use the @@ERROR variable in USP_4.
- C. Use the RAISERROR command in the nested stored procedures.
- D. Use the RAISERROR command in USP_4.

Correct Answer: C
