QUESTION 1

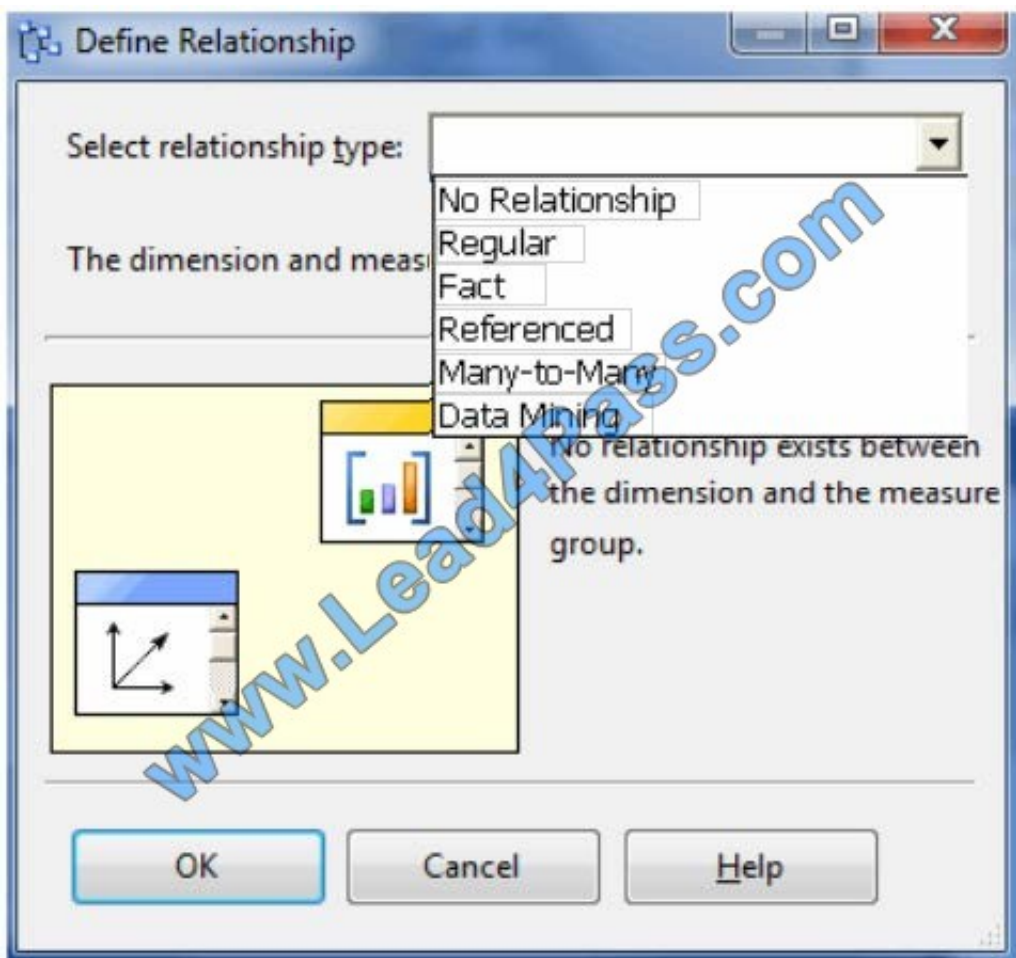

You are developing a SQL Server Analysis Services (SSAS) cube.

You create a degenerate dimension.

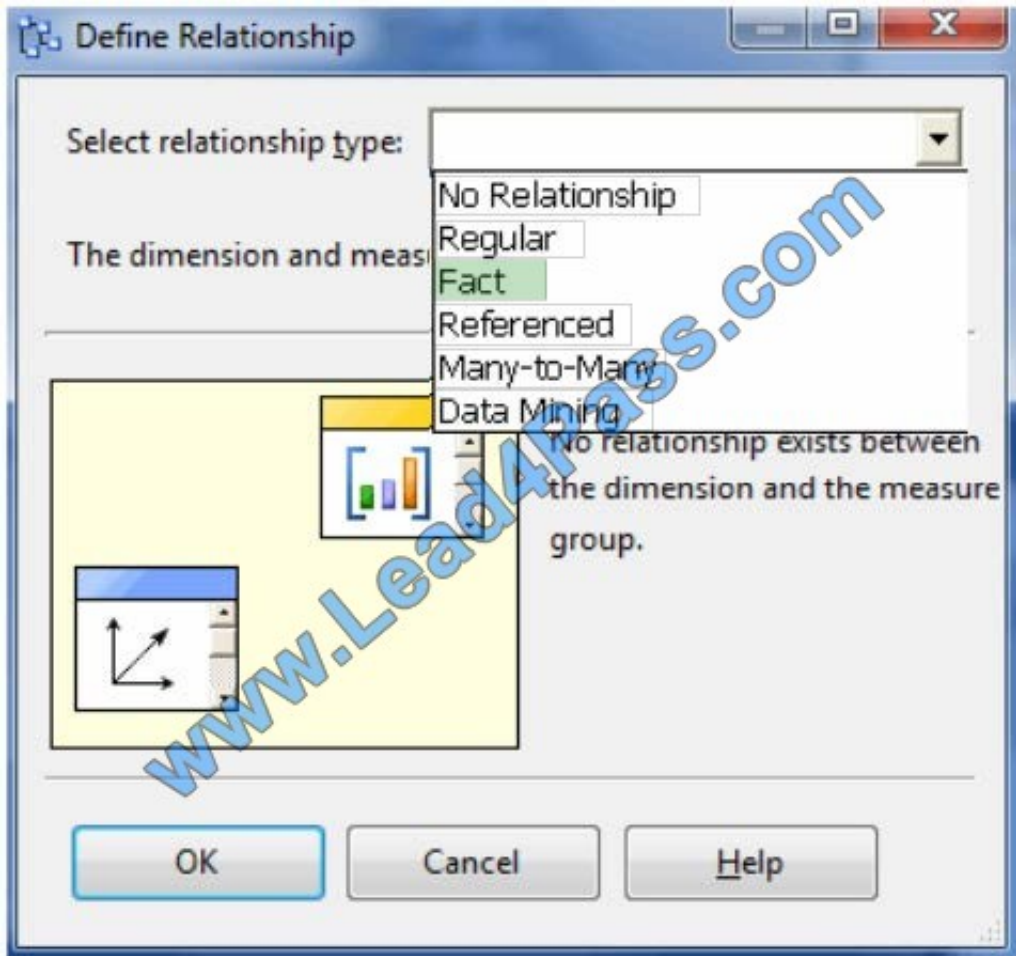

You need to define a relationship type for the dimension.

Which relationship type should you select? (To answer, configure the appropriate option or options in the dialog box in the answer area.)

Hot Area:

Correct Answer:

QUESTION 2

You manage a SQL Server Reporting Services (SSRS) instance in native mode. You are building a shared dataset for your weekly performance reports. The shared dataset uses a data source that is configured to use credentials that are stored in the Report Server.

You have a predefined shared schedule to perform cleanup and maintenance tasks for SSRS.

You need to enable caching on the shared dataset. You also need to use an existing shared schedule to discard the cache.

Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Open SharePoint Central Administration and then click the shared dataset.

Select the Caching page and then click the **Cache shared dataset** checkbox.

Open Report Manager and then click the shared dataset.

Select the **Expire the cache on the following schedule** option and then select the **Shared Schedule** option.

From the combo box, select the shared schedule and then click **Apply**.

Correct Answer:

Open SharePoint Central Administration and then click the shared dataset.

Open Report Manager and then click the shared dataset.

Select the Caching page and then click the **Cache shared dataset** checkbox.

Select the **Expire the cache on the following schedule** option and then select the **Shared Schedule** option.

From the combo box, select the shared schedule and then click **Apply**.

QUESTION 3

You are developing a SQL Server Analysis Services (SSAS) tabular database. To maximize performance, queries must be resolved only by using cache.

You need to configure the appropriate query mode.

Which query mode should you select?

- A. DirectQuery with In-Memory
- B. In-Memory
- C. In-Memory with DirectQuery
- D. DirectQuery

Correct Answer: B

QUESTION 4

You need to ensure that managers can successfully run reports. What should you do?

- A. Implement Kerberos delegation.
- B. Configure the SSRS data sources to store Windows credentials.
- C. Implement forms-based authentication.
- D. Configure the CustomData property in the connection strings.

Correct Answer: A

QUESTION 5

You are developing a SQL Server Analysis Services (SSAS) tabular project.

In the data warehouse, a table named Employee Security defines a relationship between a salesperson's name, logon ID, and assigned sales territory.

You need to ensure that each salesperson has access to data from only the sales territory assigned to that salesperson. You also need to minimize the development effort.

What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Create a separate tabular project for each sales territory. Grant each salesperson access to the corresponding tabular model of the assigned sales territory.
- B. Create a new Active Directory Domain Services (AD DS) security group and add each salesperson as a member. Then create a new role with Read permission. Add the group as a member to the new role.
- C. Create a new role with Read permission and then add each salesperson's logon as a member to the role.
- D. Add the Employee Security table to the model, define the relationships, and then implement dynamic security by using row filters. Grant each salesperson access to the model.

Correct Answer: D
