QUESTION 1

You are designing a SQL Server Reporting Services (SSRS) report for a bank. The bank has Automated Teller Machines (ATMs) in several regions. ATM operational data is stored in a SQL Azure database. The report must use a map to display the location and status of the ATMs as shown in the following exhibit. (Click the Exhibit button.)

You need to ensure that the report displays only a user selected map region. Which source of spatial data should you use for the map?

- A. SQL Server spatial query
- B. Bing Maps layer
- C. ESRI shape file
- D. Map gallery

Correct Answer: A

QUESTION 2

You are developing a SQL Server Analysis Services (SSAS) cube.

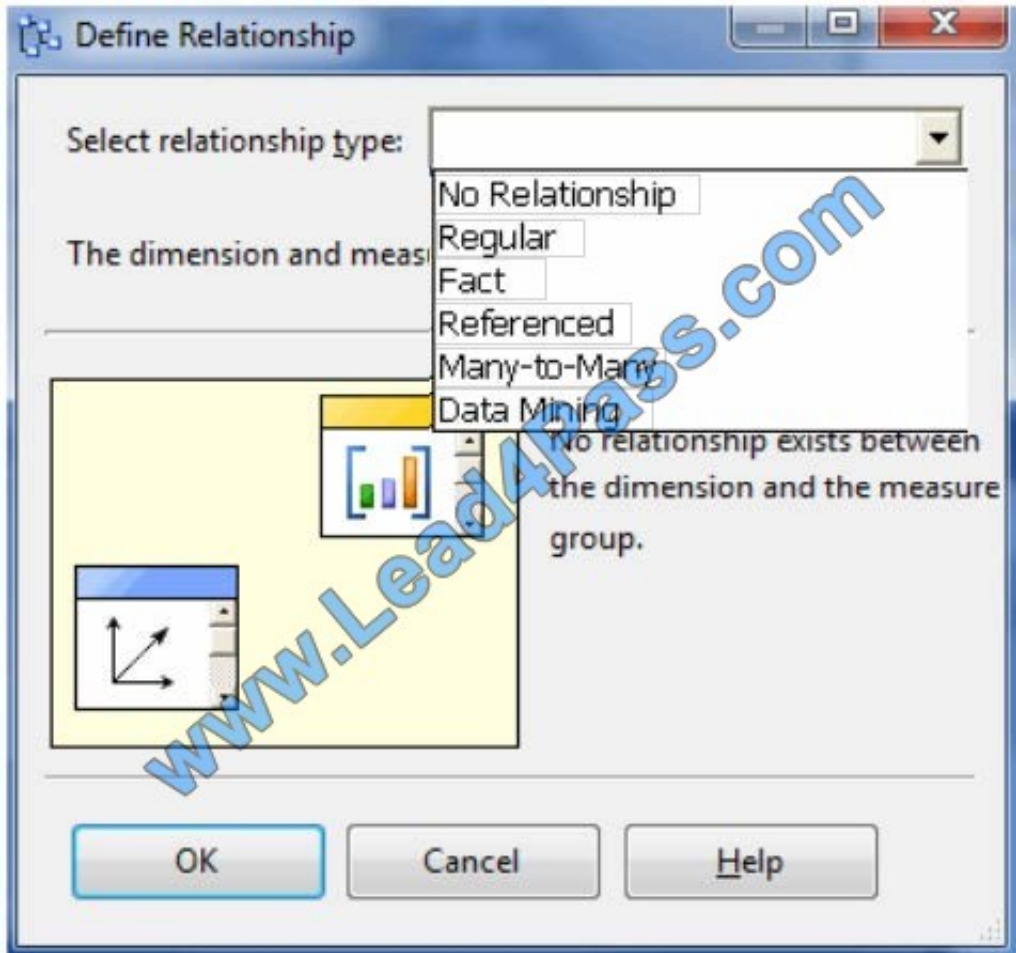

You create a degenerate dimension.

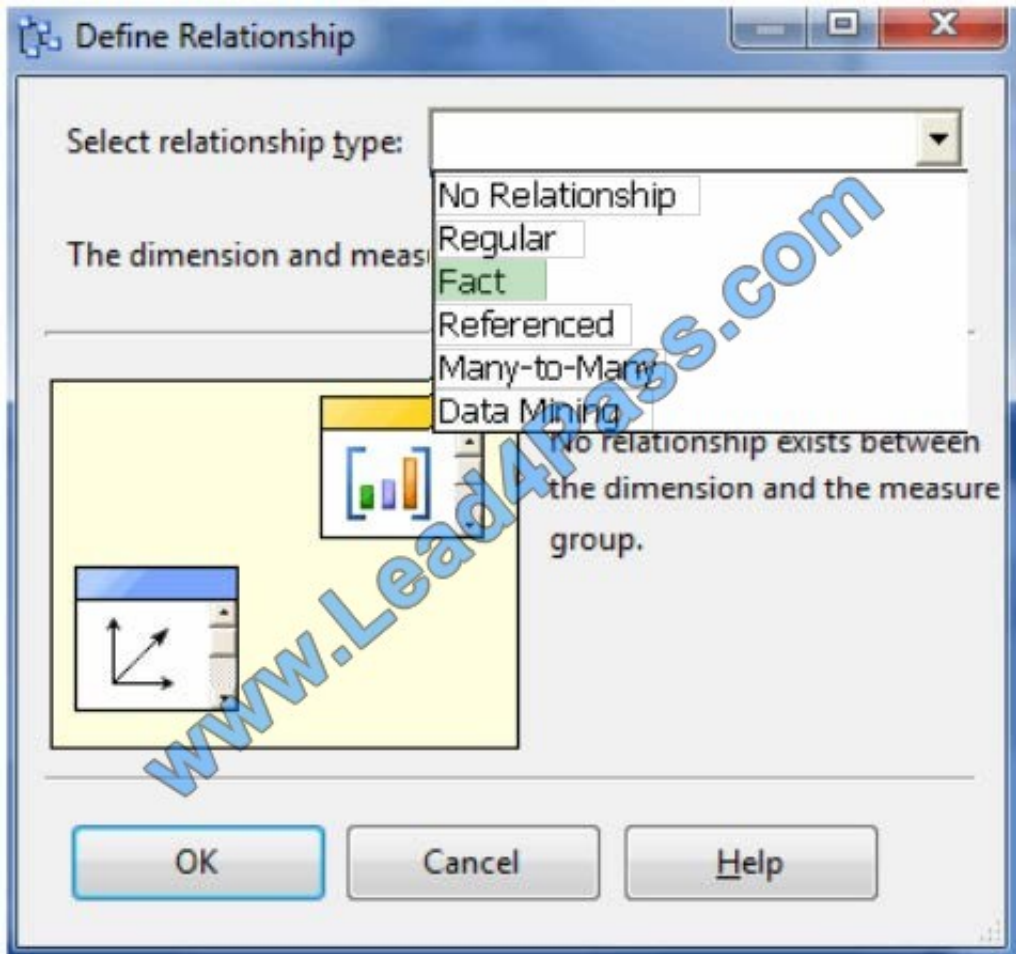

You need to define a relationship type for the dimension.

Which relationship type should you select? (To answer, configure the appropriate option or options in the dialog box in the answer area.)

Hot Area:

Correct Answer:

QUESTION 3

You need to select the appropriate model type for the Finance database. Which model type should you select?

- A. Star schema
- B. Multidimensional
- C. Relational
- D. Tabular with PowerPivot

Correct Answer: B

QUESTION 4

A company has a relational data warehouse, a SQL Server Analysis Services (SSAS) database, and a SQL Server

Reporting Services (SSRS) instance. The SSAS database contains a cube named Sales. Shared data sources exist in SSRS

for the relational and SSAS databases. Each company department has its own report writers.

Report writers in the Marketing department want to create new reports by using Report Builder. Many reports will include data generated by a custom formula that references data stored either in a data warehouse table or in the Sales cube.

The custom formula will compare time periods across multiple products, categories, and regions.

You have the following requirements:

Ensure that only Marketing department report writers can access the custom formula.

Implement only one dataset.

Ensure that the dataset references the data source that will provide the fastest data retrieval.

You need to meet the requirements to support the Marketing department report writers.

What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Create, deploy, and secure a shared dataset that references the SSAS database shared data source and includes a calculated member for the custom formula.
- B. Create a calculated member in the Sales cube. Create, deploy, and secure a shared dataset that references the SSAS database shared data source and includes the calculated member from the cube.
- C. Create and secure in the data warehouse a stored procedure that implements the custom formula. Create and deploy a shared dataset that references the data warehouse shared data source.
- D. Create, deploy, and secure a shared dataset that references the data warehouse shared data source and includes custom Transact-SQL (T-SQL) code for the custom formula.

Correct Answer: B

QUESTION 5

You need to improve the performance of data warehouse queries. What should you do?

- A. Create columnstore indexes.
- B. Create clustered indexes.
- C. Create indexed views.
- D. Create bitmap indexes.

Correct Answer: A
