### QUESTION 1

You are creating a web worker for an HTML5 application.

The following tasks must be performed from within the web worker:

Register an event listener for the web worker

Start and stop the web worker

You need to define a function that performs the required tasks.

Which line of code should you use? (To answer, drag the appropriate line or lines of code to the correct location or locations. Each line of code may be used once, more than once, or not at all. You may need to drag the split bar between

```
self.postMessage('Worker: ' + data);
```

```
self.addEventListener('message', function(event));
```

```
self.attachEvent('Worker', data);
```

```
self.terminate();
```

```
self.close();
```

```
.....
```

```
var data = event.data;  
switch (data.cmd) {  
  case 'start':  
    [REDACTED]  
    break;  
  case 'stop':  
    [REDACTED]  
    break;  
  default:  
    self.postMessage('Try again: ' + data.msg);  
};  
, false);
```

panes or scroll to view content.)

Select and Place:

```
self.postMessage('Worker: ' + data);
```

```
self.addEventListener('message', function(event));
```

```
self.attachEvent('Worker', data);
```

```
self.terminate();
```

```
self.close();
```

```
.....
```

```
var data = event.data;  
switch (data.cmd) {  
  case 'start':  
    [redacted]  
    break;  
  case 'stop':  
    [redacted]  
    break;  
  default:  
    self.postMessage('Try again: ' + data.msg);  
};  
, false);
```

Correct Answer:

```
self.attachEvent('Worker', data);  
  
self.terminate();
```

```
self.addEventListener('message', function(event);  
    var data = event.data;  
    switch (data.cmd) {  
        case 'start':  
            self.postMessage('Worker: ' + data);  
            break;  
        case 'stop':  
            self.close();  
            break;  
        default:  
            self.postMessage('Try again: ' + data.msg);  
    };  
}, false);
```

## QUESTION 2

You are developing a page that includes text and an illustration. The web page resembles the following image.

You have the following requirements:

The illustration must be in the center of the page.

The text must flow around the left, right, top, and bottom of the illustration.

You need to ensure that the layout of the web page meets the requirements.

Which line of code should you use?

- A. `-ms-wrap-flow: both;`
- B. `-ms-wrap-flow: clear;`
- C. `-ms-wrap-flow: maximum;`
- D. `-ms-wrap-flow: auto;`

Correct Answer: A

`-ms-wrap-flow`

Gets or sets a value that specifies how exclusions impact inline content within block-level elements.

Syntax

`-ms-wrap-flow: auto | both | start | end | maximum | clear`

`both`

Inline flow content can flow on all sides of the exclusion.

Reference: `-ms-wrap-flow` property

### QUESTION 3

You are developing an HTML5 web application that provides a discussion forum for users. When a user registers to

access the application, the user enters an email address.

Users can enter data that can result in cross-site scripting (XSS) attacks.

You need to ensure that email input is as secure as possible.

Which two techniques should you use? (Each correct answer presents a complete solution. Choose two.)

- A. Remove all nonalphanumeric characters before submitting data.
- B. Use the email tag in forms where the email address is entered.
- C. Display all email addresses inside of an HTML5 ADDRESS element.
- D. Use jQuery validation with a regular expression to ensure that email addresses are valid.
- E. Ensure that all form data is encrypted when it is submitted.

Correct Answer: BD

B: The `email` is used for input fields that should contain an e-mail address. Depending on browser support, the e-mail address can be automatically validated when submitted. Some smartphones recognize the email type, and adds ".com" to the keyboard to match email input.

D: JQuery can be used to validate email addresses.

---

#### QUESTION 4

You develop an application in HTML5. The application has a field named field1 that uses the month input type.

You need to identify what will occur if the application runs from a browser that does not support the month input type.

What should you identify?

- A. The field1 field will be rendered as a text box.
- B. The field1 field will appear as alabel named month.
- C. The web page will display an error message.
- D. The field1 field will not be displayed.

Correct Answer: A

---

#### QUESTION 5

You are styling a box object on a page by using CSS3.

You need to set the transparency of the object to 50%.

Which two CSS3 styles will achieve the goal? (Each correct answer presents a complete solution. Choose two.)

- A. 

```
.Box {  
  background: rgb(255,0,0);  
  backface-visibility: hidden;  
}
```
- B. 

```
.Box {  
  background: rgb(255,0,0);  
  background: rgba(255,0,0,.5);  
}
```
- C. 

```
.Box {  
  background: rgb(255,0,0);  
  opacity: 0.5;  
}
```
- D. 

```
.Box {  
  background: rgb(255,0,0);  
  background-color: #fff;  
}
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: BC

The RGBA declaration allows you to set opacity (via the Alpha channel) as part of the color value.

Example:

```
div { background-color: rgba(255,0,0,0.5); }
```

The background color has been set to blue, and the opacity set to half.

Example 2:

```
background-color: rgb(0,0,255); opacity: 0.5;
```

The background color has been set to blue, and the opacity set to half.
