QUESTION 1

You need to identify alternative methods of displaying information from the FeedRetriever class.

Which data controls can you use to achieve this goal? (Each correct answer presents a complete solution. Choose all that apply.)

A. stackPanel

B. WrapGrid

C. GridView

D. FlipView

Correct Answer: AC

*

 From scenario:

The app will retrieve data from RSS feeds by using the FeedRetriever class. Data from the FeedRetriever class must be presented in a data control.

By default, data is presented in a ListView control.

The design team has provided a custom XAML code segment for the itemTemplate attribute of the GridView control that displays RSS feeds.

*

 StackPanel Class

Arranges child elements into a single line that can be oriented horizontally or vertically.

*

 GridView Class

Displays the values of a data source in a table where each column represents a field and each row represents a record. The GridView control enables you to select, sort, and edit these items.

Incorrect:

*

 WrapGrid class

Applies to Windows and Windows Phone

Positions child elements sequentially from left to right or top to bottom. When elements extend beyond the container edge, elements are positioned in the next row or column. Can only be used to display items in an ItemsControl.

*

FlipView class

Represents an items control that displays one item at a time, and enables "flip" behavior for traversing its collection of items.

QUESTION 2

You are developing a Windows Store app. You have the following requirements:

Enable the app to receive shared data.

Save the sharing settings for future use.

You need to ensure that the requirements are met.

What should you implement?

A.

a play to charm

B.

a Share target

C.

a share charm

D. a QuickLink

Correct Answer: D

*

When people swipe from the side of the screen and tap the Share charm, the Share pane appears with a list of apps people can use to share their content. This list includes any installed apps that are "share targets" for a particular data format. The links at the top of the image, called QuickLinks, allow users to complete specific share tasks directly.

*

QuickLink class Applies to Windows and Windows Phone Represents shortcuts that help users share content with the apps they use most.

QUESTION 3

You are developing a Windows Store app.

You need to ensure that the app meets the requirements for Windows Store certification.

Which requirement must be met?

A. The app must not display ads on tiles.

B. The app must support Internet communication.

C. The app must have a short name and a long name.

D. Ads that do not comply with the standard content policies must supply a content agreement.

Correct Answer: A

QUESTION 4

You develop a Windows Store app.

The Capabilities section of the app manifest is configured as shown in the exhibit. (Click the Exhibit button.)

To answer, complete each statement according to the information presented in the exhibit. Each correct selection is worth one point.

Hot Area:

Answer Area

From a removable storage device, the app ...
- can read data only.
- can read and write data only.
- cannot read or write data.

From the Pictures library, the app ...
- can read data only.
- can read and write data only.
- can read, write data and delete.

Correct Answer:

Answer Area

From a removable storage device, the app ...
- **can read data only.**
- can read and write data only.
- cannot read or write data.

From the Pictures library, the app ...
- can read data only.
- can read and write data only.
- **can read, write data and delete.**

QUESTION 5

You are developing a Windows Store app. App.xaml contains the following XAML markup:

```
<Application.Resources>
 <Style x:Key="myStyle" TargetType="TextBlock">
    <Setter Property="Foreground" Value="Red"></Setter>
 </Style>
</Application.Resources>
```

MainPage.xaml contains the following XAML markup:

```
<Page.Resources>
  <Style x:Key="myStyle" TargetType="TextBlock">
    <Setter Property="Foreground" Value="Blue"></Setter>
  </Style>
</Page.Resources>
...
<TextBlock x:Name="textBlock1" Text="A Simple text value" Style="{StaticResource myStyle}" Grid.Row="0" />
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

Answer Area

	Yes	No
There will be an error at runtime because of a conflict in the resource names.	○	○
The text of textBlock1 will be blue.	○	○
myStyle will apply to all of the text blocks in the app.	○	○

Correct Answer:

Answer Area

	Yes	No
There will be an error at runtime because of a conflict in the resource names.	○	○
The text of textBlock1 will be blue.	○	○
myStyle will apply to all of the text blocks in the app.	○	○
