QUESTION 1

You develop several Windows Store apps.

You need to use a control to display multiple elements.

The control has the following requirements:

Each item must be displayed as a button.

When a user clicks a button, the button must show that it was clicked.

Developers must be able to bind the control to a collection. Developers must be able to handle an event when items are selected.

Developers must be able to specify whether the control provides users with the ability to select either one or multiple items.

What should you use? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. A custom control that inherits from ListBox
- B. A control template for the ComboBox control
- C. A custom control that inherits from ComboBox
- D. A control template for the ListBox control

Correct Answer: D

QUESTION 2

You are developing a Windows Store app that logs error information to be used for troubleshooting. You need to create a log that will contain the events to be used by Event Tracing for Windows (ETW). You have the following code:

```
using System.Diagnostics.Tracing;
namespace AppErrorLogging
{
    class AppEventTrackingForWindows : Target 1
    {
        public static AppEventTrackingForWindows appLog =
            new AppEventTrackingForWindows ();
        public void LogError(int eventID, string errorInfo)
        {
            Target 2(eventID, errorInfo);
        }
    }
}
```

Which code snippets should you include in Target 1 and Target 2 to complete the code? (To answer, drag the appropriate code snippets to the correct targets in the answer area. Each code snippet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Answer Area

Target 1:

Target 2:

EventListener

EventSource

WriteEvent

WriteEventCore

SendCommand

Correct Answer:

Answer Area

Target 1: EventSource

Target 2: WriteEvent

EventListener

WriteEventCore

SendCommand

QUESTION 3

You need to get the WhiteBalance property for the app.

Which line of code should you insert at line CA10?

- A. `wbValue = media.WhiteBalance.Capabilities.Max;`
- B. `var wb = video.WhiteBalance.TryGetValue(out wbValue);`
- C. `wbValue = video.WhiteBalance.Capabilities.Max;`
- D. `var wb = media.WhiteBalance.TryGetValue(out wbValue);`

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Correct Answer: C

QUESTION 4

You are developing a Windows Store app that must use a background task to retrieve local weather conditions from the Internet.

You need to ensure that the app can update the user interface while it is in a running or suspended state.

How should you complete the code segment? (To answer, drag the appropriate term to the correct location or locations in the answer area. Each term may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.)

Select and Place:

sealed

abstract

new

Run

ExecuteTask

IBackgroundTrigger

IBackgroundTask

www.Lead4Pass.com

Answer Area

```
namespace WeatherTaskLibrary
{
    public  class WeatherClass : 
    {
        public void  (IBackgroundTaskInstance weatherTask)
        {
            ...
        }
    }
}
```

Correct Answer:

abstract

new

ExecuteTask

IBackgroundTrigger

Answer Area

```

namespace WeatherTaskLibrary
{
    public Run _____ class WeatherClass : IBackgroundTask
    {
        public void sealed _____ (IBackgroundTaskInstance weatherTask)
        {
            ...
        }
    }
}

```

QUESTION 5

You are developing a Windows Store app. The app will download files from the Internet.

```
public IAsyncOperation<StorageFile> DownloadFileAsync(string uri)
```

You need to call the **DownloadFileAsync** method from a background task.

You have the following code: (Line numbers are included for reference only.)

```

01
02{
03  StorageFile file = null;
04
05  return file;
06}

```

You already have a method that downloads files. The method has the following signature:

Which code segments should you insert at lines 01 and 04? (To answer, drag the appropriate code segments to the correct locations. Each code segment may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.)

Select and Place:

Code segments

```
file = await DownloadFileAsync(uri);  
file = DownloadFileAsync(uri).GetResults();  
public StorageFile GetFile(string uri)  
public async Task<StorageFile> GetFile(string uri)
```

Answer Area

Line 01:

Line 04:

Correct Answer:

Code segments

```
file = DownloadFileAsync(uri).GetResults();  
public StorageFile GetFile(string uri)
```

Answer Area

Line 01:

Line 04:
