### QUESTION 1

You are designing a distributed banking application that handles multiple customers. A user may log on to the site to perform activities such as checking balances, performing transactions, and other activities that must be done securely.

The application must store secure information that is specific to an individual user. The data must be automatically and securely purged when the user logs off.

You need to save transient information in a secure data store.

Which data store should you use?

- A. NET session state
- B. NET profile properties
- C. NET application state
- D. Shared database

Correct Answer: A

### QUESTION 2

Customers download videos by using HTTP clients that support various content encodings. You need to configure caching on the DownloadVideo action to maximize performance. Which attribute should you add?

- A. 

```
[OutputCache(VaryByCustom = "gzip",  
VaryByContentEncoding = "all", Location = OutputCacheLocation.Any,)]
```
- B. 

```
[OutputCache(Location = OutputCacheLocation.Any, VaryByParam = "videoId",  
VaryByContentEncoding = "gzip;q=1.0, compress; q=0.5, *;q=0")]
```
- C. 

```
[OutputCache(Location = OutputCacheLocation.Downstream, VaryByParam = "gzip",  
VaryByCustom = "browser")]
```
- D. 

```
[OutputCache(Location = OutputCacheLocation.Downstream, Order=1,  
VaryByContentEncoding = "gzip;q=1.0, compress; q=0.5, *;q=0")]
```
- E. 

```
[OutputCache(VaryByHeader = "Cache-Control", Location =  
OutputCacheLocation.ServerAndClient,  
CacheProfile = "gzip")]
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D
- E. Option E

Correct Answer: B

### QUESTION 3

#### DRAG DROP

You are developing an ASP.NET Core MVC API microservice that calculates and provides loan rates. The microservice is configured to listen on port 6000.

The microservice must be deployed to a Docker container in Windows. You add a file named Dockerfile to the microservice project.

You need to build the Docker image.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

.....

Actions	Answer area
Use the FROM instruction to define the base image.	
Use the EXPOSE instruction to specify the listen port and build and run the application.	
Use the WORKDIR instruction to define the working directory.	
Use the ENTRYPOINT instruction to use the container as an executable.	
Use the COPY instruction to copy the source code into the image and then use the RUN instruction to restore NuGet packages.

Correct Answer:

Actions	Answer area
Use the FROM instruction to define the base image.	Use the FROM instruction to define the base image.
Use the EXPOSE instruction to specify the listen port and build and run the application.	Use the WORKDIR instruction to define the working directory.
Use the WORKDIR instruction to define the working directory.	Use the COPY instruction to copy the source code into the image and then use the RUN instruction to restore NuGet packages.
Use the ENTRYPOINT instruction to use the container as an executable.	Use the ENTRYPOINT instruction to use the container as an executable.
Use the COPY instruction to copy the source code into the image and then use the RUN instruction to restore NuGet packages.	Use the EXPOSE instruction to specify the listen port and build and run the application.

Step 1: Use the FROM instruction to define the base image.

FROM creates a layer from the ubuntu Docker image.

The first FROM command is an important Docker command, allowing you to pull dependencies from other images.

Step 2: Use the WORKDIR instruction to define the working directory

The WORKDIR instruction sets the working directory for any RUN, CMD, ENTRYPOINT, COPY and ADD instructions that follow it in the Dockerfile.

Step 3: Use the COPY instructions to copy the source code into the image and then use the RUN instruction to restore NuGet packages.

Step 4: Use the ENTRYPOINT instruction to use the container as an executable

Step 5: Use the EXPOSE instruction to specify the listen port and build and run the application.

#### QUESTION 4

You have received instructions to make sure that the prerequisites with regards to the ItemId are suitably met. Which of the following actions should you take?

- A. You should consider changing a method of ItemController.
- B. You should consider changing a method of ItemProperty.
- C. You should consider changing a method of ItemObject.
- D. You should consider changing a method of ItemAttribute.

Correct Answer: A

**QUESTION 5**

You are employed as a developer at Certkingdom.com. Certkingdom.com has a single Active Directory domain, named Certkingdom.com.

You are making use of Visual Studio 2012 to create a new ASP.NET MVC application for Certkingdom.com. Certkingdom.com has a web farm that will host the new application. You have been informed that the application should allow for

web server failures to be handled without much fuss. Furthermore, state data should be shared between the farm servers. You are preparing to persist the application state during the session.

Which of the following actions should you take?

- A. You should consider making use of a state server.
- B. You should consider making use of a global catalog server.
- C. You should consider making use of a file server.
- D. You should consider making use of a database server.

Correct Answer: A
