Following Questions and Answers are all new published by Microsoft Official Exam Center

QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution,

while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You develop an ASP.NET web application that is self-hosted using Open Web Interface for .NET (OWIN) in a Microsoft Azure Worker role.

The web application throws exceptions.

You need to resolve the exceptions.

Solution: Use standard HttpModule and HttpHandler types.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Note: Open Web Interface for .NET (OWIN) defines an abstraction between .NET web servers and web applications. OWIN decouples the web application from the server, which makes OWIN ideal for self-hosting a web application in your own process, outside of IIS–for example, inside an Azure worker role.

QUESTION 2

You are employed as a developer at Certkingdom.com. Certkingdom.com has a single Active Directory domain, named Certkingdom.com.

You have been tasked with developing a distributed application for Certkingdom.com. The application should allow for the storage of an insignificant number of unprotected global data. Furthermore, you are informed that modifications to the

unprotected global data rarely occur.

Which of the following actions should you take?

A. You should consider making use of View state.

B. You should consider making use of Control state.

C. You should consider making use of Application state.

D. You should consider making use of Windows Azure session state.

Correct Answer: C

QUESTION 3

You are employed as a developer at Certkingdom.com. Certkingdom.com has a single Active Directory domain, named Certkingdom.com.

You make use of Visual Studio 2012 to create new ASP.NET MVC web applications for Certkingdom.com.

You are currently running a training exercise for junior developers. You are discussing the HttpWorkerRequest methods. You are currently dealing with a method that returns all nonstandard HTTP header name-value pairs.

Which of the following is the method being discussed?

A. GetUnknownRequestHeaders.

B. GetUnknownRequestHeader.

C. GePGnownRequestHeaderName.

D. GePGnownResponseHeaderIndex.

Correct Answer: A

QUESTION 4

You are employed as a developer at Certkingdom.com. Certkingdom.com has a single Active Directory domain, named Certkingdom.com.

You are making use of Visual Studio 2012 to create a new ASP.NET MVC web application for Certkingdom.com. The new application allows for users from various countries to access the application based on their respective cultures.

As a result, the application includes various resource files in the Resources directory. These files include a public resource with localized translation. You are required to make use of a specific WebViewPage property so that the application

sets the user\\'s client browser according to the settings.

Which of the following actions should you take?

A. You should consider making use of the ViewContext property.

B. You should consider making use of the Html property.

C. You should consider making use of the ViewBag property.

D. You should consider making use of the ViewData property.

Correct Answer: C

QUESTION 5

You have a class that includes the following code. (Line numbers are included for reference only.)

```
01
02    public class EmployeeController : Controller
03    {
04        public ActionResult Index()
05        {
06            return View();
07        }
08        [HttpPost]
09        [ValidateAntiForgeryToken]
10
11        piblic ActionResult Create (IFormCollection collection)
12        {
13            ...
14        }
15        [HttpPost]
16        [ValidateAntiForgeryToken]
17
18        public ActionResult Edit(int id, IFormCollection collection)
19        {
20            ...
21        }
22    }
```

Action	Comments
Edit	Only users that are assigned to either the HR-Administrator role or the Global-Administrator role are permitted to call this action.
Create	Only users that are assigned to both the HR-Administrator role or the Global-Administrator role are permitted to call this action.
Index	All authorized users must be able to call this action.

You need to configure the class.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A   Add the following code segment at line 17:
    [Authorize (Roles = "HR-Administrator")]

    [Authorize (Roles = "Global-Administrator")]

B   Add the following code segment at line 1:
    [Authorize]

C   Add the following code segment at line 10:
    [Authorize (Roles = "HR-Administrator, Global-Administrator")]

D   Add the following code segment at line 1:
    [Authorize (Roles = "HR-Administrator")]

    [Authorize (Roles = "Global-Administrator")]

E   Add the following code segment at line 17:
    [Authorize (Roles = "HR-Administrator, Global-Administrator")]

F   Add the following code segment at line 10:
    [Authorize (Roles = "HR-Administrator")]

    [Authorize (Roles = "Global-Administrator")]

A. Option A

B. Option B

C. Option C

D. Option D

E. Option E

F. Option F

Correct Answer: BEF
