QUESTION 1

You create a branding package for Contoso, Ltd. You export the design package from the development environment. The solution you build uses custom query rules and result types. You activate the following features:

SharePoint Server Publishing Infrastructure

Search Config Data Content Types

Search Config Site Columns

Search Config Template

You import the package into the production environment. You observe that the search configuration did not import properly, and some images are missing.

You need to ensure that search and branding work properly on the production server.

Which two actions should you perform? Each correct answer presents part of the solution.

A.

Check in and publish all design assets. Export the package.

B.

Import the package. Check in and publish all design assets.

C.

On the development server, activate the Search Config List Instance feature. Export the design package.

D.

On the production server, activate the Search Config List Instance feature. Import the design package.

Correct Answer: BC

* Search Config List Instance Features

Provisions a list to enable the import and export of Search Configurations.

QUESTION 2

You receive an error when you deploy the app.

You need to resolve the error.

What should you do?

A. Deploy the app to https://contoso.sharepoint.com/tasks.

B. Deploy the app to https://contoso-my.sharepoint.com.

C. Enable side-loading of apps in the Visual Studio project properties.

D. Enable side-loading of apps in the app manifest.

Correct Answer: D

* Scenario: Pending Issues

When you deploy the app from Visual Studio 2012, you receive the error: "Error occurred in deployment step \\'Install app for SharePoint\\': Sideloading of apps is not enabled on this site."

QUESTION 3

A server in the SharePoint farm experiences high memory usage. Task Scheduler on the server runs a Windows PowerShell script to perform backups of Wholesale sites.

You need to resolve any memory leak issues in the Windows PowerShell script.

What should you do? (Each correct answer presents a complete solution. Choose all that apply.)

A. Insert the code segment at line EW04: Start-SPAssignment -Global

B. Insert the code segment at line EW17: $site.Close()

C. Insert the code segment at line EW17: Stop-SPAssignment -SemiGlobal

D. Insert the code segment at line EW17: Stop-SPAssignment -Global

Correct Answer: AC

*

 Start-SPAssignment - Global initiates a new assignment store.

*

 Stop-SPAssignment .Disposes of objects in the provided assignment collection.

The Stop-SPAssignmentcmdlet disposes of objects in the provided assignment collection. Use the Global parameter to dispose of all objects in the global assignment collector and to stop the global store from collecting additional objects.

Provide a SemiGlobal assignment collector to dispose of all contained objects.

From scenario:

*

 Performance Optimization and Memory Usage

SPSite objects must be removed from memory immediately after the objects go out of scope.
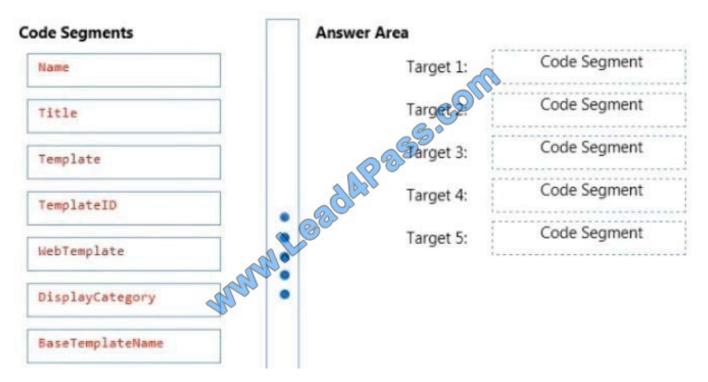

QUESTION 4

DRAG DROP

You need to create a collaboration template.

```xml
<?xml version="1.0" encoding="utf-8"?>
<Elements xmlns="http://schemas.microsoft.com/sharepoint/">
  <Target 1
    Target 2="STS"
    BaseTemplateID="0"
    BaseConfigurationID="0"
    Target 3="LitwareTeamSite"
    Target 4="Litware Team Site"
    Target 5="Litware"/>
</Elements>
```
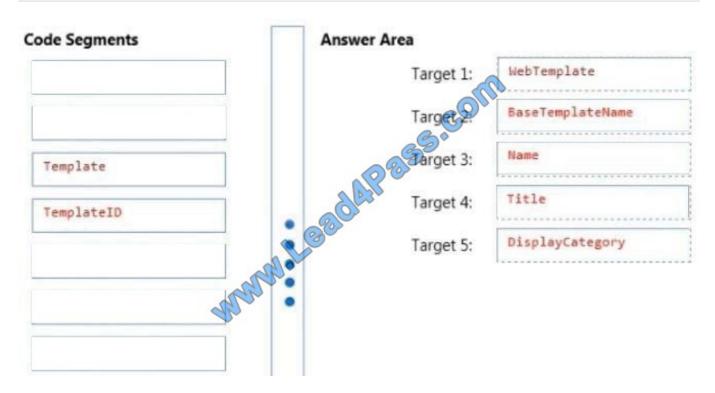

Which code segment should you include in Target 1, Target 2, Target 3, Target 4 and Target 5 to complete the code? (To answer, drag the appropriate code segments to the correct targets in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Code Segments

Name
Title
Template
TemplateID
WebTemplate
DisplayCategory
BaseTemplateName

Answer Area

Target 1: | Code Segment |
Target 2: | Code Segment |
Target 3: | Code Segment |
Target 4: | Code Segment |
Target 5: | Code Segment |

Correct Answer:

Code Segments

- Template
- TemplateID

Answer Area

Target 1:	WebTemplate
Target 2:	BaseTemplateName
Target 3:	Name
Target 4:	Title
Target 5:	DisplayCategory

Box 1: WebTemplate

Most of the features contained within the Team Site template are sufficient; however, a few additions to the template must be made to support the business requirements. In order to achieve this and ensure maximum portability, a web

template based on the Team Site definition must be created.

Box 2: BaseTemplateName

Required. The internal name of the site definition on which the web template ultimately derives. This is the value of the Name attribute of the Template element in a WebTemp*.xml file.

Box 3: Name

Attribute: Name

Required. The internal name of the web template.

Box 4: Title

Optional. Optional. The public name of the web template.

Box 5: DisplayCategory

Optional. Specifies the category in which the web template appears in the Microsoft SharePoint Foundation UI when users are selecting a type of website to create; for example, Collaboration, Meetings, or some other custom name. If it is not

specified, the default is "Custom".

Scenario: The LitwareWebTemplateFeature feature contains the Litware Team Site web template. Templates with this title must be available in the group Litware in the template selection.

QUESTION 5

DRAG DROP

Adventure Works uses SharePoint for managing project-related documents, information sharing, and tasks management. You develop a SharePoint-hosted app named TasksViewer and deploy it to the Corporate Catalog Site. This app is used only by the Project Management Office (PMO) group. Only users in the PMO group have permission to view and add this app to various project sites. The Adventure Works IT department creates a security group in Active Directory for the PMO.

Currently all of the apps are visible to the Everyone group.

You need to ensure that only users in the PMO group can see the app.

Which five actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Correct Answer:

Box 4: Stop Inheriting Permission

Click on the Stop Inheriting Permissions option. Click OK on the Message.

Box 5:

Example: Remove all the current users and groups (except for myself) and add three specific users. Use the Remove User Permissions to remove users and Grant Permissions to add users. You will see the below:

Reference: SharePoint 2013: Break Document Library Permissions Inheritance
