QUESTION 1

You are a developer for Contoso, Ltd. The product owner sends an email with a list of requirements that need to be built out for your company's social media product.

You plan to use the list of requirements to create the Product Backlog. The development team will break these features into user stories.

You need to create a user story from a user's perspective in which the user accesses the contact history. Additionally, you need to document the action the user wants to take and the benefit the user will receive from that action.

Complete the user story. To answer, drag the appropriate component of the user story to the correct target. Each component of the user story may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Select and Place:

User Story Component	Answer Area
registered member	As a: User Story component
user	I want to: User Story component
log on by using a Public-key authentication protocol	So That: User Story component
I can access my history	When I perform this action: This is the result:
I can access a secure area of the system	log on with my registered username, and register a 6-10 character alphanumeric password User Story component
my history displays	try to log on with an unregistered username User Story component
my information displays	
A message displays and explains that my username is not registered	
an error is displayed	

Correct Answer:

User Story Component	Answer Area
	As a: registered member
user	I want to: log on by using a Public-key authentication protocol
	So That: I can access my history
	When I perform this action: This is the result:
I can access a secure area of the system	log on with my registered username, and register a 6-10 character alphanumeric password my history displays
my information displays	try to log on with an unregistered username A message displays and explains that my username is not registered
an error is displayed	

QUESTION 2

You are developing an application by using a team of developers and a team of testers. You have an automated nightly build.

Currently, the testers take too long to test and the developers are closing a large number of bugs as "unable to reproduce."

You need to improve the test cycle time.

Which two actions should you perform? (Each correct answer presents part of the solution.

Choose two.)

- A. Enable code analysis.
- B. Instruct the testers to use diagnostic data collection in their test environment.
- C. Instruct the testers to test only every other build.
- D. Instruct the testers to use action recordings and playback during manual testing.
- E. Assign an extra day for testing at the end of the iteration.

Correct Answer: BD

QUESTION 3

You are an automation engineer for your company. Your Scrum team is defining processes for how your team should deliver products for product owner approval.

Your development team is deciding what the definition of done should be.

You need to contribute a test suite that will confirm each user story's level of done.

Which test should you perform?

- A. Integration
- B. Security
- C. Performance
- D. System

Correct Answer: D

QUESTION 4

You manage a software development project that includes multiple feature teams. The teams integrate their code into a shared code repository as frequently as possible.

You plan to configure a build definition by using the default build process template (DefaultTemplate.xaml).

You need to know when a check-in from a feature team has broken the build or caused a test to fail, without impacting the feature team.

What should you do?

- A. Set the Analyze Test Impact parameter to True in the build process template.
- B. Set the build trigger to Continuous Integration and enable automated testing.
- C. Add the Builds check-in policy to your team project.
- D. Create a shelve command for pending changes. Queue a build using the latest source with the shelve parameter.

Correct Answer: B

QUESTION 5

Your development team is using the Microsoft Solution Framework (MSF) for Capability Maturity Model Integration (CMMI) Process Improvement 6.0 process template. The team has identified all of the acceptance criteria for a new application. This data currently resides in a series of spreadsheets.

You need to enter the criteria into TFS for team traceability and tracking.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Create test case work items for each criterion in the spreadsheet. Link the test case work items with the work item(s) for the appropriate requirements.
- B. Create Requirement work items.
- C. Create a new task work item for each criterion in the spreadsheet. Set the Triage attribute for each task work item to Information Received.
- D. Create a new quality of service test case work item for each criterion in the spreadsheet. Link the quality of service test case work items with the work item(s) for the appropriate requirements.

Correct Answer: AB
