QUESTION 1

You are designing an application by using Microsoft .NET Framework 4 and Microsoft Visual Studio 2010.

You plan to design an instrumentation strategy for the application.

You need to ensure that the strategy meets the following requirements:

Captures detailed performance information.

Enables or disables diagnostic messages by using an application configuration option without requiring the application to restart.

What should you design?

- A. A custom trace listener
- B. A custom performance counter
- C. An override to the Debug class
- D. An override to the EventLog class

Correct Answer: B

QUESTION 2

You are designing a sales and inventory tracking system by using Microsoft Visual Studio 2010 and Microsoft SQL Server 2008. The sales, inventory, and shipping tables will reside in different databases on different database servers.

You need to ensure that the tables are updated simultaneously.

What should you do?

- A. Use LINQ to SQL.
- B. Use Distributed transactions.
- C. Use Microsoft Sync Framework.
- D. Use the ADO.NET Entity Framework.

Correct Answer: B

QUESTION 3

You are designing a Windows Presentation Foundation (WPF) application. The application will be localized into multiple languages.

You need to recommend an approach for preparing the application for localization.

Which two actions should you recommend? (Each correct answer presents part of the solution. Choose two.)

- A. Translate the contents of the appropriate XAML elements into each localization language.
- B. Add an application setting for each language to the App.config file.
- C. Define a UICulture element for each language in the project file.
- D. Add UID attributes to language-specific elements in the XAML file.

Correct Answer: CD

QUESTION 4

You are creating a Windows Presentation Foundation (WPF) application by using Microsoft .NET Framework 4 and Microsoft Visual Studio 2010. The application will consist of several data entry forms. Each data entry form requires a user to enter phone numbers and addresses.

You need to design a solution that promotes code reusability.

What should you do?

- A. Add multiple text boxes for each data entry form.
- B. Use the same style resource for each data entry form.
- C. Create a new user control and reference it on each data entry form.
- D. Create a new merged resource dictionary and reference it from each data entry form.

Correct Answer: C

QUESTION 5

You are working with a Windows Presentation Foundation (WPF) application that uses .NET Framework 4.

Your team is responsible for making significant changes to the application functionality.

You need to recommend an approach for identifying features that no longer work properly as a result of code changes

Which testing methodology should you recommend?

- A. stress testing
- B. integration testing
- C. stability testing
- D. regression testing

Correct Answer: D
