QUESTION 1

You are designing a Windows Presentation Foundation (WPF) application.

The application will be localized into multiple languages.

You need to recommend an approach for preparing the application for localization. Which two actions should you recommend? (Each correct answer presents part of the solution.

Choose two.)

- A. Add UID attributes to language-specific elements in the XAML file.
- B. Define a UICulture element for each language in the project file.
- C. Add an application setting for each language to the App.config file.
- D. Translate the contents of the appropriate XAML elements into each localization language.

Correct Answer: AB

QUESTION 2

You are designing a Windows Presentation Foundation (WPF) application. The main window of the WPF application includes two panels: panel1 and panel2. The WPF application must meet the following requirements:

Panel2 must be enabled only after users have entered values into multiple text boxes in panel1.

The background color of panel2 must be set to a specific color based on one of the text box values in panel1.

The background color of panel2 must be set at the same time the panel is enabled.

You need to recommend an approach for meeting the requirements.

What should you recommend?

- A. Use Dependency properties.
- B. Use a DataTemplate object.
- C. Use a Command object.
- D. Use a MultiDataTrigger object.

Correct Answer: C

QUESTION 3

You are designing a Windows Presentation Foundation (WPF) application that uses .NET Framework 4. The WPF

application will be deployed to 5,000 users worldwide. You need to recommend an approach for identifying problems that users will experience.

Which testing methodology should you recommend?

- A. Acceptance testing
- B. Integration testing
- C. Functional testing
- D. Usability testing

Correct Answer: A

QUESTION 4

You are designing a Windows Forms application. The application connects to a Microsoft SQL Server 2008 database.

You need to recommend an approach for retrieving and logging all informational messages and error messages reported by the database.

What should you recommend?

- A. Retrieve informational messages in a `SqlException` object. Retrieve error messages by creating a handler for the `InfoMessage` event.
- B. Retrieve informational messages by creating a handler for the `InfoMessage` event. Retrieve error messages in a `SqlException` object.
- C. Retrieve informational messages and error messages by creating a handler for the `InfoMessage` event.
- D. Retrieve informational messages and error messages in a `SqlException` object.

Correct Answer: B

QUESTION 5

You are designing an application by using Windows Presentation Foundation (WPF) and Microsoft .NET Framework 4.

The application allows users to view product details. Product managers can modify the product details for the products that they manage.

You plan to design the application by using the Model-View-ViewModel (M-V-VM) pattern. You need to ensure that the product details can be viewed by all users and modified only by product managers.

What should you do?

- A. Create a separate window to modify data. Create a separate window to view data.
- B. In the `ViewModel`, hide all input controls if the user's role is a Product Manager.
- C. In the `ViewModel`, disable all input controls if the user's role is not a Product Manager,

D. Create a separate StackPanel in the window to modify data. Create a separate StackPanel in the window to view data.

Correct Answer: C
