QUESTION 1

You have an ASP.NET Web application that displays charts that are generated daily from data in a Microsoft SQL Server database.

Each chart is implemented as a user control that displays data retrieved from the database. Data retrieval and chart generation consume a significant amount of resources.

Users of the Web application generate unique reports that contain one or more chart controls.

Each chart is common to many reports.

You need design a solution to improve the performance of the Web server.

Which approach should you recommend?

- A. Use page caching.
- B. Use fragment caching.
- C. Use the application cache.
- D. Use SQL cache dependency.

Correct Answer: B

QUESTION 2

You are designing an ASP.NET Web application. You have the following requirements:

The application must be usable in partially connected scenarios.

Data that is entered into the application offline must be synchronized with the server the next time the application is online.

You need to design the application to meet the requirements.

What should you use?

- A.
jQuery
- B.
ASP.NET AJAX
- C.
WCF Data Services
- D.

Microsoft Silvertight

Correct Answer: D

QUESTION 3

You are designing a data access strategy for an ASP.NET Web application.

You plan to expose an existing data source by using WCF Data Services.

You need to recommend an approach to ensure that CRUD operations are possible.

What should you recommend?

- A. Implement the IQueryable and IUpdatable interfaces on data source entities.
- B. Implement the IEnumerable and IEditableObject interfaces on data source entities.
- C. Implement the ILookup and IUpdatable interfaces on data source entities.
- D. Implement the IContainer and IEditableObject interfaces on data source entities.

Correct Answer: A

QUESTION 4

You need to design the application to support the RSS news feature. Which approach should you recommend?

- A. Use the FileResult class and return the result as a plain text file.
- B. Use the ViewResult class and bind the items to an HTML.TextArea HTML Helper.
- C. Use a custom ActionResult class and return the output stream as the return value.
- D. Use a custom ActionResult class and bind the items to an HTML.TextArea HTML Helper.

Correct Answer: C

QUESTION 5

You are designing an ASP.NET Web application.

The application must provide a data access method that supports HTTP, MTOM, SOAP, and TCP.

You need to ensure that customers can integrate their applications with the data sources and business rules for your Web application.

Which data access technology or technologies should you recommend?

- A. Entity Framework
- B. Windows Communication Foundation
- C. ADO.NET DataSets and ASP.NET Web Services
- D. ADO NET DataTables and ASPNET Web Services

Correct Answer: B
