QUESTION 1

A company has custom ASP NET and java applications that run on old versions of Windows and Linux. The company plans to place applications in containers. You need to design a solution that includes networking, service discovery and load

balancing for the applications. The solution must support storage orchestration.

Solution: You deploy each application to an Azure Container instance.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 2

You are designing a solution for a company to deploy software for testing and production. The solutions must meet the following requirements:

*

Applications must be deployed to several different environments and must run without installation of dependencies.

*

Existing published applications must be ported to the new solution.

*

Application developers must be given flexibility when architecting their code.

You need to recommend a solution for hosting applications. What should you select?

A. Azure worker role

B. Azure Batch

C. Azure Container Service

D. Azure Functions

Correct Answer: C

QUESTION 3

You are developing a web application that connects to an existing virtual network. The web application needs to access a database that runs on a virtual machine.

In the Azure portal, you use the virtual network integration user interface to select from a list of virtual networks. The virtual network that the web application needs to connect to is not selectable.

You need to update the existing virtual network so you can connect to it.

What should you do?

- A. Enable ExpressRoute.
- B. Enable site-to-site VPN.
- C. Enable point-to-site VPN with a dynamic routing gateway.
- D. Enable point-to-site VPN with a static routing gateway.

Correct Answer: B

QUESTION 4

You need to configure Azure Security Center to assist the CSIRT team.

Which services should you implement? To answer, drag the appropriate Azure Security Center services to the correct key security area. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Azure Security Center services

- Security Roles and Access Controls
- Security Policies and Recommendations
- Data Collection and Storage
- Ongoing Security Monitoring
- Incident Response

Answer Area

Key security area

- Area 1
- Area 2
- Area 3
- Area 4
- Area 5

Azure Security Center Service

- Azure Security Center service
- Azure Security Center service
- Azure Security Center service
- Azure Security Center service
- Azure Security Center serv

Correct Answer:

Azure Security Center services

Answer Area

Key security area

Area 1

Area 2

Area 3

Area 4

Area 5

Azure Security Center Service

Incident Response

Data Collection and Storage

Security Policies and Recommendations

Security Roles and Access Controls

Ongoing Security Monitor

QUESTION 5

You are designing a storage solution to support on-premises resources and Azure-hosted resources. You need to provide on-premises storage that has built-in replication to Azure.

Solution: You include Azure StorSimple storage in the design.

Does this solution meet the goal?

- A. Yes
- B. No

Correct Answer: A
