Following Questions and Answers are all new published by Microsoft Official Exam Center

**QUESTION 1**

You have an Azure Stack integrated system.

You receive a Storage Resource Provider alert indicating that a file share named SU1_ObjStore_4 on a volume named ObjStore_4 is more than 90 percent utilized.

You verify the usage of the share and discover that the usage has reached 100 percent.

You verify that none of the storage accounts were recently deleted.

You need to remediate the storage usage issue as quickly as possible.

What should you do first?

A. From the Azure Stack administrator portal, modify the retention period.

B. Contact Microsoft support.

C. From the Azure Resource Manager user endpoint, run Start-AzsReclaimStorageCapacity.

D. From the Azure Stack administrator portal, restart the storage controller infrastructure role.

Correct Answer: B

**QUESTION 2**

NOTE: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack integrated system that uses a Microsoft Azure Active Directory (Azure AD) domain named contoso.com as the identify provider. The system has a tenant subscription that contains several resources.

In contoso.com, you can create a new user named User1.

User1 reports that when signed in to the Azure stack user portal, no resources are displayed.

You need to ensure that User1 can view the resources on the portal.

Solution: On the tenant subscription, you assign the Reader role to User1.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

A user needs at least the reader role to be able to view resources in a tenant subscription.

**QUESTION 3**

You have two Azure Stack integrated systems name Stack1 and Stack2.

You create an Azure Resource Manager template that successfully deploys to Stack1.

You attempt to deploy the template to Stack2, but the deployment fails.

What is a possible cause of the deployment failure?

A. Stack1 has Azure Marketplace syndication disabled and Stack2 has Azure Marketplace syndication enabled.

B. The template was deployed to Stack2 by using Microsoft Visual Studio.

C. The API version used in the template is a later version that the API version available on Stack2.

D. Stack1 has Azure Marketplace syndication enabled and Stack2 has Azure Marketplace syndication disabled.

Correct Answer: C

**QUESTION 4**

You have an Azure Stack integrated system.

When you attempt to deploy an update, you retrieve an installation error message.

You resolve the issue that caused the error.

You need to continue the update installation from the last successful step.

What should you do?

A. Connect to the privileged endpoint, and then run the Update-TenantAPI.ps1 script.

B. Connect to the Azure Resource Manager (administrator) endpoint, and then run the Update-TenantAPI.ps1 script.

C. Connect to the Azure Resource Manager (administrator) endpoint, and then run the Resume-AzureStackUpdate cmdlet.

D. Connect to the privileged endpoint, and then run the Resume-AzureStackUpdate cmdlet.

Correct Answer: D

**QUESTION 5**

You plan to deploy an Azure Stack integrated system to host applications on the Internet. Which network from the Azure Stack deployment should be routed beyond the border device?

A. the switch network

B. the private VIP network

C. the storage network

D. the public VIP network

Correct Answer: D
