QUESTION 1

You are creating a plan to add new functionality into a SharePoint 2010 farm. Several artifacts must be created to provide the new capabilities.The artifacts required include the following:

.A custom site definition with company branding

.A Web Part to provide a graph of business statistics

.Custom code to calculate the business statistics

Your plan needs to include a process to create and deploy the new functionality.

Which approach should you recommend?

A. Define the new site definition, including the company branding and all the required artifacts. Create a site using this new site definition.

B. Define a site template built on a new site definition, which includes the company branding. Implement it on the site that includes the new artifacts. Reset IIS.

C. Develop and test the required artifacts. Build the artifacts into a solution package. Deploy the solution package to the farm.

D. Build the company branding and the new artifacts into a feature. Staple the new feature to an existing site definition in the farm. Reset IIS.

Correct Answer: C

QUESTION 2

You are designing a SharePoint 2010 application.You have an Internet-facing site with numerous image and movie files.You need to ensure that these files are cached so that they are displayed to users quickly. Which approach should you recommend?

A. In the SharePoint web.config file, set the cacheForEditRights property of the OutputCacheProfiles element to true.

B. In the SharePoint web.config file, set the enabled property of the BlobCache element to true.

C. In Site Collection Administration, use Site Collection Cache Settings to configure the cache.

D. In Central Administration, use Search Administration to manage the cache.

Correct Answer: B

QUESTION 3

You have an existing SharePoint 2010 solution consisting of custom Web Parts deployed to the global assembly cache (GAC).The signing key used for the Web Parts has recently changed.You need to design an update to the Web Parts without any change to the value settings of their properties.

Which approach should you recommend?

A. Deploy the changes within a SharePoint solution.

B. Copy the changes directly to the GAC and perform an IISReset.

C. Programmatically copy the information from the existing Web Parts to their new versions and then remove the old instances.

D. Update the Web Parts through the Web Part gallery and select the Overwrite if file already exists check box.

Correct Answer: C

QUESTION 4

You are designing a SharePoint 2010 intranet site. Your design must:

.Specify the manner in which to store and read custom configuration settings.

.Use a standard user interface to allow the configuration settings to be created or changed.

You need to design the solution at the site collection and site levels to meet these requirements.

Which approach should you recommend?

A. Use the property bag to store custom configuration settings.

B. Use the hierarchical object store to store custom configuration settings

C. Use SharePoint lists to store the custom configuration settings

D. Add custom configuration settings in the web.config file to display the settings

Correct Answer: C

QUESTION 5

You are designing a SharePoint 2010 intranet site for your company.You need to make sure that each department\\'s SharePoint site has a unique appearance by using different fonts and font colors for each site. Your design should include no custom development.

Which approach should you recommend?

A. Configure a separate theme using the Site Theme page for each department\\'s site.

B. Create a new cascading style sheet for each department. Define unique fonts and font colors for that department in the new cascading style sheet.

C. Create a feature for each department that deploys a customized cascading style sheet to the style library for the department site.

D. Create a new master page for each department\\'s site and assign unique fonts and font colors inside the master page.

Correct Answer: A
