### QUESTION 1

You are designing a SharePoint 2010 intranet site. Each department has its own site collection. A link to each of the departments must appear in the global navigation for each site collection. You have implemented the SharePoint AspMenu control in the master page. Your design must specify the correct provider for the menu control.

Which provider should you recommend?

- A. SPContentMapProvider
- B. SPSiteMapProvider
- C. PortalSiteMapProvider
- D. SPXmlContentMapProvider

Correct Answer: D

---

### QUESTION 2

You are designing a site on SharePoint 2010. You need to design the site so that it meets the following requirements:

- .Contributors must be able to use the SharePoint user interface to add, remove, and delete Web Parts only in a Web Part zone named Your Web Parts.
- .Only site collection owners may add, remove, and delete Web Parts in a Web Part zone named Required Web Parts.

Which approach should you recommend?

- A. Create a page layout with a Web Part zone named Your Web Parts that allows customizations. Create a Web Part zone named Required Web Parts that allows customizations.
- B. Create a page layout with a Web Part zone named Your Web Parts that allows customizations. Create a Web Part zone named Required Web Parts that does not allow customizations with the desired Web Parts pre-loaded.
- C. Create a page layout with Web Part zones that do not allow customizations and grant contributors full control to the site collection.
- D. Create a Web Part page with a Web Part zone named Your Web Parts that does not allow customizations. Create a Web Part zone named Required Web Parts that allows customizations.

Correct Answer: B

---

### QUESTION 3

You are designing a SharePoint 2010 application that contains a Web Part. The Web Part must connect to an RSS data stream provided by a Web service. The Web service is on another server in the domain. You need to recommend an

authentication approach that meets the following requirements:

.SharePoint users must not be required to supply additional credentials for the Web service. .Standard authentication systems available to SharePoint 2010 must be used.

Which authentication approach should you recommend?

- A. NTLM
- B. forms-based authentication (FBA)
- C. Kerberos
- D. Lightweight Directory Access Protocol (LDAP)

Correct Answer: C

---

#### QUESTION 4

You have a social networking site in SharePoint 2010 that allows users to post content for all other users to view. Users have read-only access to documents that they did not upload themselves. You are designing a way for users to easily flag content as objectionable so that the site administrators can evaluate and remove this content as necessary. You need to add this objectionable content functionality to all document libraries.

Which approach should you recommend?

- A. Add a button to the ribbon associated to document libraries, which will execute the objectionable content functionality when clicked.
- B. Add a dialog to the site default page that will walk the user through how to report objectionable content.
- C. Modify the system files within the layouts directory that are used to render the form pages.
- D. Add a custom field to the base document content type and an event receiver to the document library that will execute the objectionable content functionality.

Correct Answer: A

---

#### QUESTION 5

You are designing an extranet site using SharePoint 2010. This site must allow employees to log on to the extranet site from home. They should use their corporate Active Directory credentials by typing their user name and password into text boxes on a logon page on the site. After users log on, they should be redirected to the site home page. You need to meet these requirements with the least amount of configuration.

Which type of authentication should you design?

- A. forms-based authentication (FBA)

B. Web Single-Sign On (SSO)

C. NTLM

D. Kerberos

Correct Answer: A
