QUESTION 1

You have an Exchange Server 2010 organization that contains 50 Hub Transport servers. You need to minimize the amount of disk space used to store shadow copies of messages on the Hub Transport servers. What should you do?

A. From the Exchange Management Shell, run the Set-TransportConfig cmdlet.

B. From the Exchange Management Shell, run the Set-TransportServer cmdlet.

C. From the Exchange Management Console (EMC), modify the transport settings.

D. From the Exchange Management Console (EMC), modify the properties of the Hub Transport server.

Correct Answer: A

QUESTION 2

You have an Exchange organization. All servers in the organization have Exchange Server 2010 Service Pack 1 (SP1) installed.

The network contains an internal root certification authority (CA). Users on the network use Outlook Anywhere. A Client Access server uses a wildcard certificate issued by a trusted third-party root CA. You need to ensure that users can send and receive encrypted e-mail messages by using S/MIME.

What should you do?

A. Instruct all users to import the internal root CA certificate.

B. Import the internal root CA certificate to the Client Access server.

C. Instruct all users to import the third-party root CA certificate.

D. Issue a certificate to each user from the internal root CA.

Correct Answer: D

QUESTION 3

Your network contains an Active Directory domain named contoso.com.

The network contains a server named Server1 that runs Exchange Server 2010 Service Pack 1 (SP1). The Exchange organization contains 500 mailboxes. All of the mailboxes are stored on a mailbox database named DB1. You need to prevent a user named User1 from permanently deleting email messages from his mailbox.

Which PowerShell cmdlet should you use?

A. New-MailboxAuditSearchLog

B. New-ManagementRoleAssignment

C. New-ManagementRole

D. New-RoleAssignmentPolicy

E. New-RoleGroup

F. New-ManagementRoleEntry

G. New-ManagementScope

H. Add-ManagementRoleEntry

I. New-EmailAddressPolicy

J. Add-ADPermisston
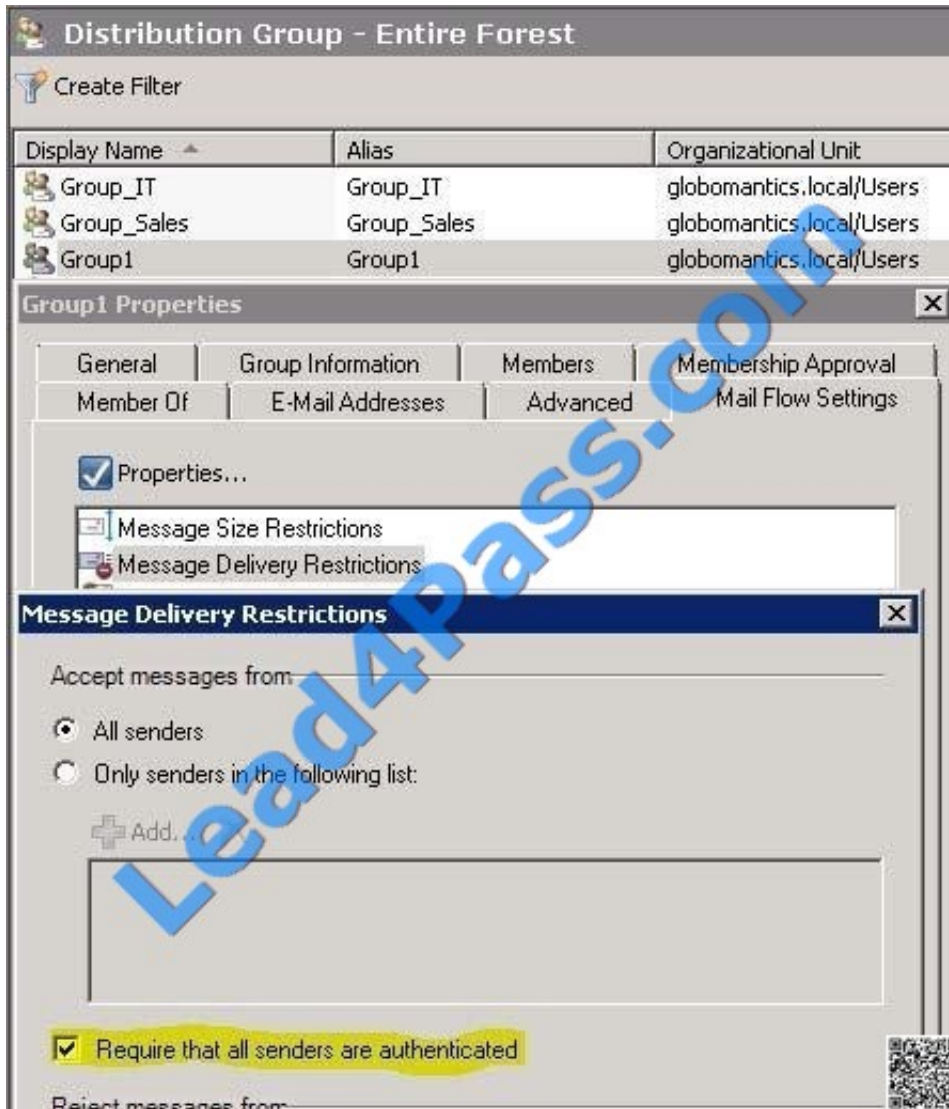

K. Set-Mailbox

L. Set-DistributionGroup

M. Add-MailboxPermission

Correct Answer: K

Set-Mailbox User1 -LitigationHoldEnabled $true

QUESTION 4

You have an Exchange Server 2010 Service Pack 1 (SP1) organization named fabrikam.com.

A partner company has an Exchange Server 2010 SP1 organization named contoso.com.

You plan to implement federated delegation between fabrikam.com and contoso.com.

You need to identify which DNS records must be created to support federated delegation.

Which DNS records should you identify? (Choose all that apply.)

A. host information (HINFO)

B. text (TXT)

C. host (A)

D. mail exchanger (MX)

E. mail group (MG)

Correct Answer: BC

Create a TXT record for federated delegation.

Create an Autodiscover DNS record (CNAME).

In this case I left the original A record answer in as that would already need to be created to resolve the IP, then a CNAME record would point to the A record (as CNAMEs can\\'t point to IP addresses).

QUESTION 5

Your company has three departments named Sales, Marketing, and Finance.

The network contains an Active Directory domain named contoso.com. You have an Exchange Server 2010 Service Pack 1 (SP1) organization that contains the servers configured as shown in the following table:

Server name	Server role
Server1	Mailbox Hub Transport Client Access
Server2	Edge Transport

You create an Edge Subscription for Server2.

You need to ensure that all email messages sent by users in the Sales department include a disclaimer.

What should you create?

A. a new Send connector

B. an Edge Transport rule

C. a new Edge Subscription

D. a remote domain

E. a new journal rule

F. a new federation trust

G. an attachment filter entry

H. a new organization relationship

I. a new Receive connector

J. a Hub Transport rule

K. an IP Block List Provider

L. an accepted domain

Correct Answer: J
