QUESTION 1

You plan to implement an Exchange Server 2010 Service Pack 1 (SP1) organization. You are planning the compliance infrastructure for the organization.

You need to identify which permissions or management roles must be assigned to achieve your compliance requirements. The solution must minimize the number of rights assigned to users.

What should you identify?

To answer, drag the appropriate permission or management role to the correct compliance requirement in the answer area.

Select and Place:

Permission/Management Role	Answer Area
Full Mailbox: Access permission to an arbitration mailbox	Permission/Management Role Provide members of a security group named Legal with the ability to search for email messages in multiple mailboxes.
Full Mailbox: Access permission to the Discovery Search Mailbox	Permission/Management Role Provide members of a security group named Legal with the ability to change message classification settings and retention policy tags.
the Discovery Management management role	Permission/Management Role Provide members of a security group named Legal Management with the ability to view the results of searches performed across multiple mailboxes.
the Organization Management management role	
the Records Management management role	
the Server Management management role	

Correct Answer:

Permission/Management Role	Answer Area
Full Mailbox: Access permission to an arbitration mailbox	
the Organization Management management role	
the Server Management management role	
	the Discovery Management management role Provide members of a security group named Legal with the ability to search for email messages in multiple mailboxes.
	the Records Management management role Provide members of a security group named Legal with the ability to change message classification settings and retention policy tags.
	Full Mailbox: Access permission to the Discovery Search Mailbox Provide members of a security group named Legal Management with the ability to view the results of searches performed across multiple mailboxes.

QUESTION 2

You have an Exchange Server 2010 Service Pack 1 (SP1) organization.

You identify the following compliance requirements for the organization:

- ?Provide an administrator with the ability to perform cross-mailbox searches from the Exchange Control Panel (ECP).
- ?Prevent specific users from permanently deleting email messages and calendar items from their mailbox.

You need to identify which Exchange technologies meet the compliance requirements.

Which technologies should you identify? (Choose all that apply.)

- A. a cmdlet Extension Agent
- B. Role Based Access Control (RBAC)
- C. retention policies
- D. a litigation hold
- E. outlook Web App mailbox policies
- F. managed folders

Correct Answer: BD

QUESTION 3

Your network contains two subnets named Subnet1 and Subnet2. Subnet1 contains all company servers. Subnet2 contains all client computers. Subnet1 and Subnet2 are separated by a firewall.

Some client computers connect by using Outlook Any where and some client computers connect by using MAP1.

You plan to deploy the Exchange Server 2010 servers shown in the following table.

Server Name	Role installed
Server1	Mailbox
Server2	Hub Transport
Server3	Client Access

You need to ensure that users can access their mailboxes and public folders by using Microsoft Office Outlook. What should you configure on the firewall?

- A. Open TCP ports, 80, 443, 135 and 1024 to 65535 from the client subnet to Server3. Open TCP port 25 to Server3.
- B. Open TCP ports 80, 135 and 1024 to 65535 from the client subnet to Server1. Open TCP port 25 to Server2.
- C. Open TCP ports 80 and 443 from the client subnet to Server3. Open TCP port 1024 to 65535 from the client subnet to Server1.

D. Open TCP ports 441, 135, and 1024 to 65535 from the client subnet to Server1. Open TCP ports 135 and 1024 to 65535 from the subnet to server 3

Correct Answer: C

QUESTION 4

A corporate environment includes Exchange Server 2010 SP1 and Active Directory Domain Services (AD DS).

Members of the Legal security group must be able to do the following:

Perform keyword searches across all mailboxes.

Store the search results in a secure mailbox.

You need to recommend a solution that meets the requirements.

Which two actions should you recommend? (Each correct answer presents part of the solution.

Choose two.)

- A. Perform searches from the Exchange Control Panel, and export search results to a discovery mailbox.
- B. Add members of the Legal security group to the Organization Management role group.
- C. Perform searches by running the Export-Mailbox cmdlet, and export search results to a discovery mailbox.
- D. Add members of the Legal security group to the Discovery Management role group.

Correct Answer: AD

QUESTION 5

You need to recommend changes to the Active Directory infrastructure of Litware. The changes must ensure that users in all of the offices can access their local mailbox if a WAN link fails. What should you recommend?

- A. Enable universal group membership caching in the Tokyo site.
- B. Deploy a read-only global catalog server to the Bangkok site.
- C. Enable the global catalog on Server3.
- D. Disable the global catalog on Server2.
- E. Enable universal group membership caching in the Bangkok site.
- F. Deploy a read-only global catalog server to the Tokyo site.

Correct Answer: C
