QUESTION 1

You work as a desktop technician at ABC.com. The ABC.com network consists of a single Active Directory domain named ABC.com. All servers on the network run Windows Server 2008. All client computers run Windows 7 Enterprise. The

network contains a file server named ABC-File01. ABC-File01 hosts multiple shared folders which are accessed by company users in all ABC.com company departments.

ABC-File01 contains a share named Finance which is accessed my members of the Finance department.

The Finance share contains sensitive information.

Due to the confidential nature of the information in the Finance folder, you enable auditing so that each user\\'s access to the folder is logged. After configuring the Finance folder to be audited, what else do you need to do to ensure that each user\\'s access to the folder is logged?

A. Configure the sharing properties of the Finance folder.

B. Configure the appropriate settings in Event Viewer.

C. Configure the Audit Account Logon setting either in the local security policy or in a group policy that applies to ABC-File01.

D. Configure the Audit object access setting either in the local security policy or in a group policy that applies to ABC-File01.

Correct Answer: D

QUESTION 2

You have a computer that runs Windows 7. You need to copy files to a virtual hard disk (VHD) file. What should you do first?

A. Run Dism.exe and specify the /image and /online parameters.

B. Open Windows Explorer, right-click the VHD file and select Open.

C. Run Diskpart.exe and then run the Select and Attach commands.

D. Run Imagex.exe and specify the /mountrw and /append parameters.

Correct Answer: C

QUESTION 3

Your company has a main office and a branch office. The network contains an Active Directory forest. All users on the network access the Internet from their computers. The company hires a temporary employee who has his own portable computer. The employee connects his portable computer to the network. When the employee attempts to join the computer to the domain, the connection fails. A help desk technician reports the following about the employee. He has a domain user account.His computer can access Internet Web sites.His computer can contact domain controllers by using

the domain controllers IP addresses. You need to ensure that the employees computer can join the domain. The solution must ensure that the computer can access resources on the Internet. What should you do?

A. Modify the time zone for the computer.

B. Modify the IPv4 settings on the computer.

C. Create an A record for the computer in an internal DNS zone.

D. Request that an administrator create a prestaged computer account in the domain.

Correct Answer: B

QUESTION 4

Your network consists of an Active Directory domain and a DirectAccess infrastructure. You install Windows 7 on a new portable computer and join the computer to the domain. You need to ensure that the computer can establish DirectAccess connections. What should you do?

A. Install a computer certificate.

B. Create a new network connection.

C. Enable the Network Discovery firewall exception.

D. Add the computer account to the Network Configuration Operators group.

Correct Answer: A

QUESTION 5

Your network consists of an Active Directory domain and a DirectAccess infrastructure. You install Windows 7 on a new portable computer and join the computer to the domain. You need to ensure that the computer can establish DirectAccess connections. What should you do?

A. Install a computer certificate.

B. Create a new network connection.
