QUESTION 1

Your company is planning to deploy Windows 7 to all client computers.

You have the following requirements:

Test an application to detect potential compatibility issues caused by User Account Control (UAC). Monitor an applications operating system use.

You need to select the appropriate method to detect application compatibility issues.

What should you do?

A. Use the Setup Analysis Tool in a virtual environment.

B. Use the standalone Setup Analysis Tool.

C. Use the Standard User Analyzer Wizard.

D. Use the Standard User Analyzer tool.

Correct Answer: D

The Standard User Analyzer (SUA) tool enables you to test your applications to detect potential compatibility issues due to the User Account Control (UAC) feature. http://technet.microsoft.com/en-us/library/cc765948(v=ws.10).aspx
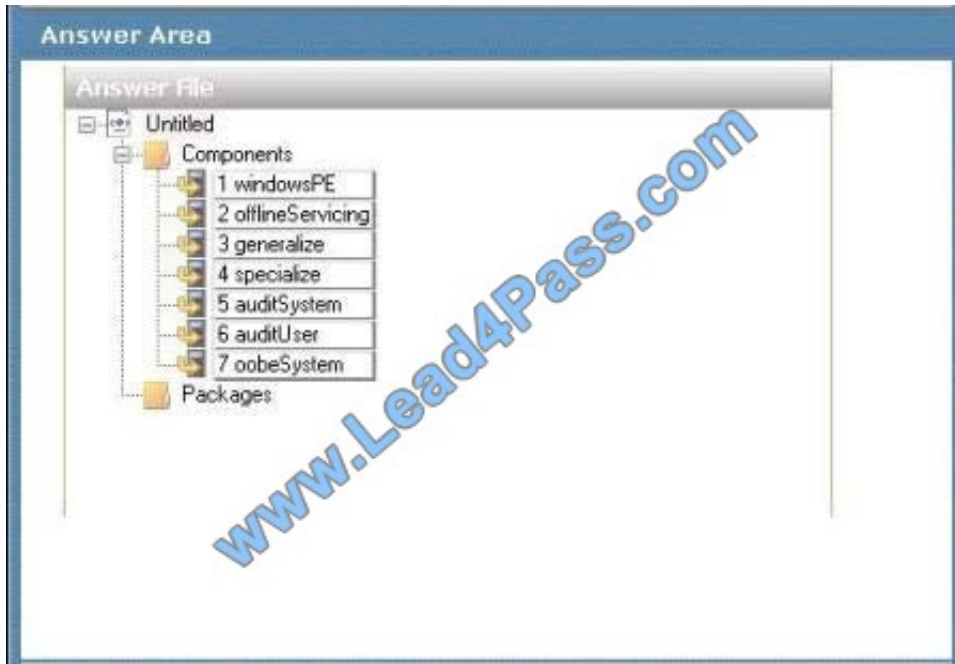

QUESTION 2

You are designing a Windows 7 Enterprise custom image. You create an autounattend.xml file by using Windows System Image Manager (SIM). This file will be used when the image is deployed.
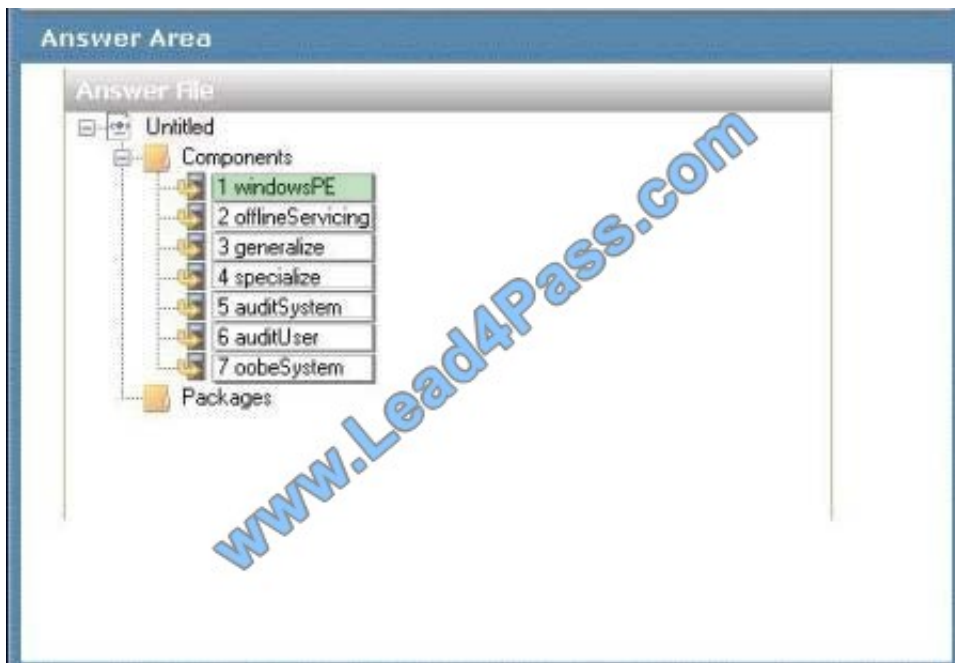

You are planning to install Windows 7 on a second hard disk in a computer. You configure the DiskID setting.

You need to select the configuration pass where you will add the DiskID setting.

Which option should you select? To answer, select the appropriate setting or settings in the work area.

Answer Area

Answer File
- Untitled
  - Components
    - 1 windowsPE
    - 2 offlineServicing
    - 3 generalize
    - 4 specialize
    - 5 auditSystem
    - 6 auditUser
    - 7 oobeSystem
  - Packages

Correct Answer:

QUESTION 3

Your company has 1,000 client computers that run Windows 7. The company uses several custom line-of-business applications that are not compatible with Windows 7.

You need to distribute a Microsoft Enterprise Desktop Visualization (MED-V) virtual machine (VM) image that includes the custom applications to all Windows 7 client computers.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Run the MED-V Workspace Packager.

Create a MED-V Workspace package.

Create a custom Group Policy object (GPO).

Mount the VM image from the MED-V workspace.

From the MED-V Management Console, select the **Policy** button.

Deploy the VM image by using Windows Deployment Services (WDS).

Deploy the VM image by using Windows Server Update Services (WSUS).

Deploy the VM image by using System Center Configuration Manager (SCCM).

Correct Answer:

Create a custom Group Policy object (GPO).

Mount the VM image from the MED-V workspace.

From the MED-V Management Console, select the **Policy** button.

Deploy the VM image by using Windows Deployment Services (WDS).

Deploy the VM image by using Windows Server Update Services (WSUS).

Create a MED-V Workspace package.

Deploy the VM image by using System Center Configuration Manager (SCCM).

Run the MED-V Workspace Packager.

QUESTION 4

You are updating the corporate image to add drivers to support a new device. You need to meet company requirements for updating images.

Select and Place:

Which two actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)
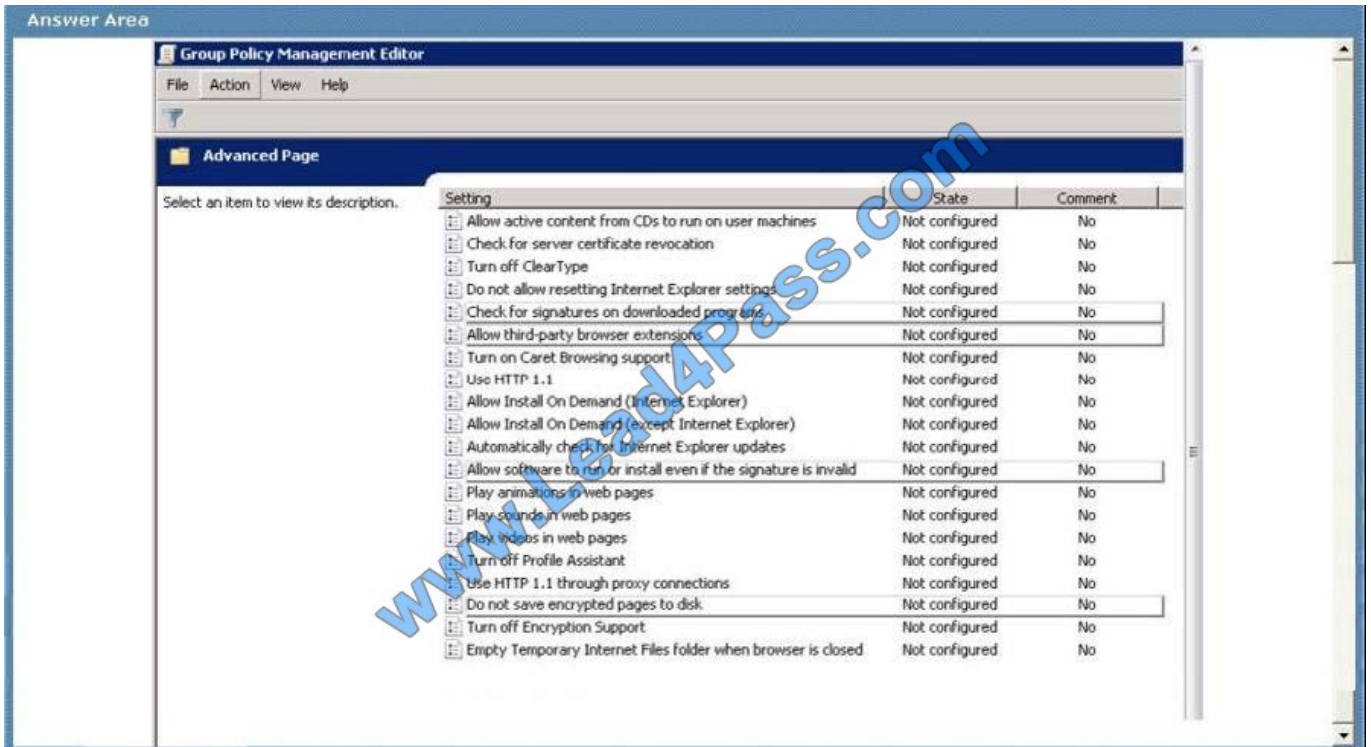

Correct Answer:
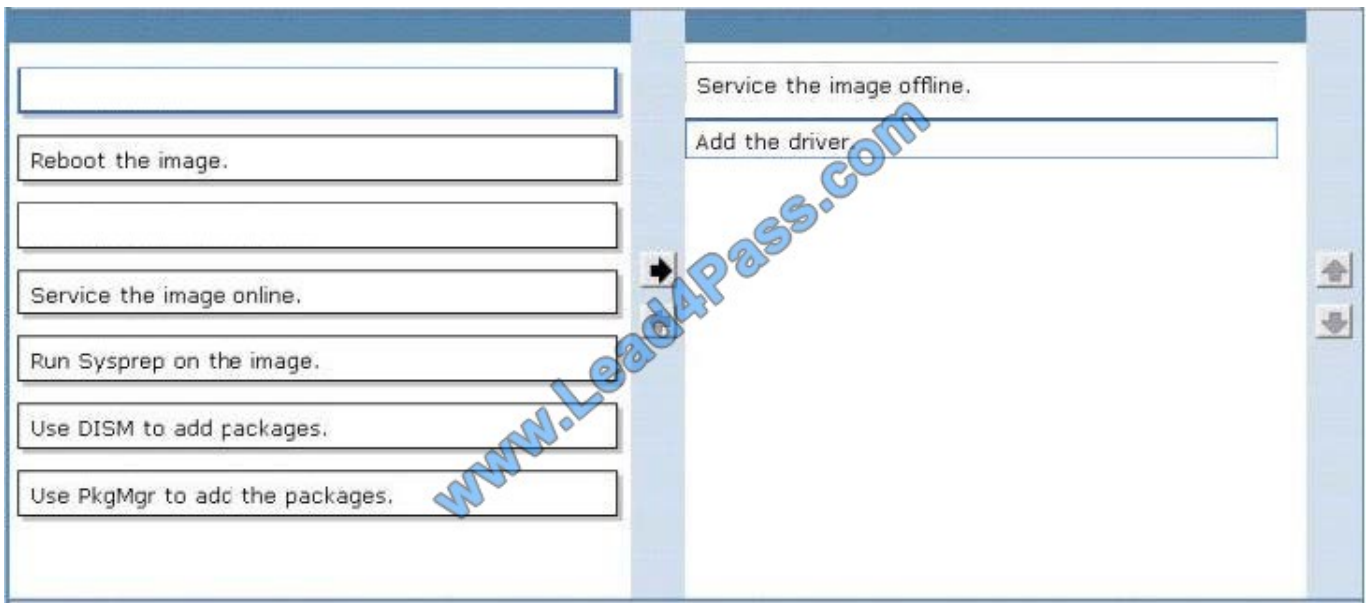

QUESTION 5

You upgrade all of a companys client computers from Microsoft Internet Explorer 8 to Internet Explorer 9.

After the upgrade, users are unable to download attachments from Microsoft Outlook Web App (OWA) or any other secure website. You verify the Group Policy settings for Internet Explorer 9.

You need to ensure that all users can download attachments from OWA and other secure websites.

Which setting should you select? To answer, select the appropriate item in the work area.

Correct Answer:
