**QUESTION 1**

Your company has a main office and 5 branch offices. Each office contains 200 client computer.

Each office has a direct connection to the Internet. The branch offices are connected to the main office through dedicated connections.

You plan to deploy an update solution for all client computers by using Windows Server Update Services (WSUS).

You need to recommend a WSUS deployment solution. The solution must minimize traffic over the dedicated connections.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Configure WSUS to download updates from an upstream server.

B. Deploy BranchCache in distributed cache mode in each office.

C. Deploy a WSUS server in each office.

D. Configure WSUS to download updates from Microsoft Update.

E. Deploy a WSUS server in the main office only.

Correct Answer: CD

hints:

Each office has a direct connection to the Internet. The branch offices are connected to the main office through dedicated connections.

**QUESTION 2**

Your company has client computers that run Windows Vista. The company plans to upgrade the Windows Vista computers to Windows 7. The current configuration of all client computers in your company is based on a common Windows

Vista image. Some branch offices use WAN connections to connect to the main office.

You have the following requirements:

Transfer all user data from the original Windows Vista installation to the new Windows 7 installation.

Use the least amount of bandwidth while transferring the user data. Support the same migration strategy for all offices.

You need to design a user state migration strategy that supports the requirements.

What should you do?

A. Use the Deployment Image Servicing and Management (DISM) tool.

B. Use the User State Migration Tool (USMT) and a hard-link migration store.

C. Use Windows PE to perform an offline migration.

D. Use the multicast feature of Windows Deployment Services (WDS).

Correct Answer: B

Hints: A and B is not use for user state migration C is the best tool to do that

**QUESTION 3**

You use the Microsoft Deployment Toolkit (MDT) 2010 to create a Windows 7 test image. You deploy the image by using a USB flash drive. The Windows 7 deployment includes a custom task sequence to install a new finance application from the deployment share.

You need to deploy the image in the Munich office by using Zero Touch Installation.

What should you do?

A. Install System Center Configuration Manager (ConfigMgr) 2007 in the Munich office. Configure a deployment point and configure the network for PXE. Recapture the MDT image and create a task sequence for the finance application.

B. Install System Center Configuration Manager (ConfigMgr) 2007 in the Carlsbad office. Configure a deployment point and configure the network for PXE. Recapture the MDT image with the finance application installed.

C. Install a new deployment share in the Munich office. Create a Windows PE boot disk with network drivers. Recapture the MDT image and create a task sequence for the finance application. Create a custom script that can map a drive to the deployment share and start Setup.

D. Install a new deployment share in the Munich office. Configure a deployment point and configure the network for PXE. Recapture the MDT image and create a task sequence for the finance application.
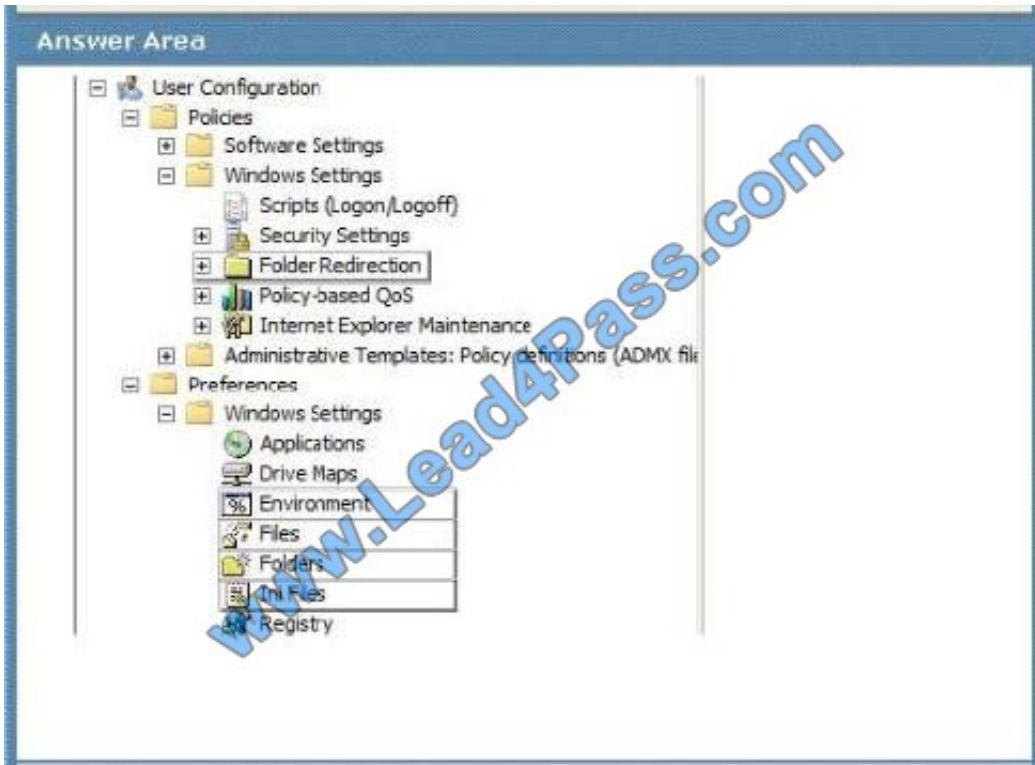

Correct Answer: A

**QUESTION 4**

You use Group Policy to configure Windows 7 Enterprise client computers.

You need to modify a Group Policy object (GPO) to specify a custom location for the temp folder.

Which setting should you select? To answer, select the appropriate setting or settings in the work area.

**QUESTION 5**

You are designing a Windows 7 Enterprise custom image. You create an autounattend.xml file by using Windows System Image Manager (SIM). This file will be used when the image is deployed.

You are planning to install Windows 7 on a second hard disk in a computer. You configure the DiskID setting.

You need to select the configuration pass where you will add the DiskID setting.

Which option should you select? To answer, select the appropriate setting or settings in the work area.
