QUESTION 1

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 8. Two computers named COMPUTER1 and COMPUTER2 are connected to one network switch and joined to the domain. Windows

Firewall is turned off on both computers.

You are planning a remote management solution. You have the following requirements:

Ensure that COMPUTER1 can run remote commands on COMPUTER2.

Test the solution by successfully running a command from COMPUTER1 that executes on COMPUTER2.

You need to select the commands to run on COMPUTER1 and COMPUTER2 to meet the remote management requirements.

Which commands should you run? (To answer, drag the appropriate command or commands to the correct location or locations in the answer area. Commands may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.)

Select and Place:

		On this computer	Run this command
wecutil -s COMPUTER2 ipconfig		COMPUTER1	
wininit /s COMPUTER2 ipconfig		COMPUTER2	
winrm quickconfig			
winrs quickconfig			
winrs -r:COMPUTER2 ipconfig			

Correct Answer:

		On this computer	Run this command
wecutil -s COMPUTER2 ipconfig		COMPUTER1	winrs -r:COMPUTER2 ipconfig
wininit /s COMPUTER2 ipconfig		COMPUTER2	winrm quickconfig
winrs quickconfig			

QUESTION 2

A company has lab computers that run Windows 8. On all lab computers, Internet Explorer has the Display intranet sites

in Compatibility View option enabled and the Download updated compatibility lists from Microsoft option disabled. All lab

computers access only internal corporate websites.

A corporate website was designed for a previous version of Internet Explorer. When viewed on the lab computers, menus and images on the website are displayed out of place.

You need to ensure that all corporate websites display correctly on the lab computers.

What should you do?

A. Enable the Display all websites in Compatibility View option.

B. Manually add the corporate website to the compatibility view settings.

C. Manually download an updated compatibility list from Microsoft.

D. Disable the Display intranet sites in Compatibility View option.

Correct Answer: B

Fix site display problems with Compatibility View Sometimes websites don\\'t look like you expect them to?mages might not appear, menus might be out of place, and text could be jumbled together. This might be caused by a compatibility problem between Internet Explorer and the site you\\'re on. Sometimes this can be fixed by adding the site to your Compatibility View list.

QUESTION 3

A company has a main office and three branch offices. The company has 20 portable computers that run Windows 8. Portable computer users can install local devices while in any branch office.

Your manager has instructed you to collect information about faulty devices and drivers within the company\\'s branch offices.

You need to create a performance report that includes a list of incorrectly installed devices by using the least amount of administrative effort.

What should you do?

A. Add counters from each portable computer to Performance Monitor, and then print the Performance Monitor output.

B. Start the System Performance Data Collector Set on each portable computer.

C. Start the System Diagnostics Data Collector Set on each portable computer.

D. Create and start a custom Data Collector Set on each portable computer.

Correct Answer: C

System Diagnostics You can use this DCS when troubleshooting reliability problems such as problematic hardware, driver failures, or STOP errors. It logs all the information included in the System Performance DCS, plus detailed system information.

QUESTION 4

You update the video card driver on a portable computer that runs Windows 8.

When a user connects the portable computer to an external monitor, the external monitor duplicates the display on the portable computer screen.

You need to ensure that the user can display additional desktop space on the external monitor.

What should you do?

A. Run the DisplaySwitch /extend command.

B. Start the computer from the Windows 8 installation media and perform a system image recovery.

C. Roll back the video card driver to the previous version.

D. Run the sic /scannow command.

Correct Answer: A

QUESTION 5

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 8.1 and are joined to the domain. All client computers are shared. Employees can log on to any client computer by using individual

accounts.

The company implements a new security policy.

You have the following requirements:

Ensure that each employee can log on to all computers by using his or her account.

Ensure that employees can reset their credentials from any client computer.

You need to choose authentication methods that meet the requirements.

Which two authentication methods meet the requirements? (Each correct answer presents a complete solution. Choose two.)

A.

Active Directory user account

B.

Local user account

C.

Microsoft account

D.

Pin

E.

Picture password

Correct Answer: AC
