QUESTION 1

You install Windows 8 Pro on a new client computer.

You sign-in to the computer by using a domain user account.

You need to synchronize the Personalize settings between your domain account and a Microsoft account.

What should you configure first? (To answer, select the appropriate settings section in the answer area.)

Hot Area:

The screenshot shows the Windows 8 'PC settings' application. The 'Personalize' option is highlighted in a dark blue bar. To the right, the 'Account picture' section is visible, showing a placeholder for a profile picture with a 'Browse' button and a 'Create an account picture' section with a 'Camera' button. A large blue watermark 'www.lead4pass.com' is overlaid diagonally across the image.

Correct Answer:

<http://www.c-sharpcorner.com/UploadFile/6cde20/3/> <http://www.technospot.net/blogs/sync-windows-8-user-settings-pc-tablet-mobile-windows-liveid/>

QUESTION 2

You support computers that run Windows 8 Enterprise. Your company protects all laptops by using the BitLocker Network Unlock feature. Some employees work from home.

You need to ensure that employees can log on to their laptops when they work from home. What should you do?

- A. Provide employees their BitLocker PINs.
- B. Ensure that the Trusted Platform Module (TPM) chips in the laptops are version 1.2 or greater.
- C. Enable BitLocker To Go.
- D. Have users run the `Manage-bde.exe -unlock` command before they disconnect from the company network.

Correct Answer: A

In addition to the option of creating a startup key, you have the option of creating a startup personal identification number (PIN). You can create either the startup key or the startup PIN, but not both. The startup PIN can be any number that you choose from 4 to 20 digits in length. The PIN is stored on your computer. You will have to type the PIN each time you start the computer. QUESTION 3

Your company has a main office and a branch office. Each office contains several servers that run Windows Server 2012.

You need to configure BranchCache for the client computers in the branch office. The solution must ensure that all of the cached content is in a central location.

What should you run on each client computer?

- A. the Enable-BCHostedClient cmdlet
- B. the Enable-BCHostedAServer cmdlet
- C. the Enable-BCDistributed cmdlet
- D. the Enable-BCLocal cmdlet

Correct Answer: C

Explanation: Enable-BCDistributed

Enables BranchCache and configures a computer to operate in distributed cache mode. This command is to be run on each client computer.

Incorrect:

Not A: Enable-BCHostedClient

Configures BranchCache to operate in hosted cache client mode. Not B: Enable-BCHostedServer is run on the computer that acts as a cache server. Configures BranchCache to operate in hosted cache server mode.

Not D: Enable-BCLocal

Enables the BranchCache service in local caching mode.

QUESTION 4

You have laptops that run Windows 8. The laptops have Microsoft User Experience Virtualization (UE-V) installed.

You need to ensure that the application settings, which are synchronized by using UE-V, apply to computers that are

disconnected from the network.

What should you do?

- A. From a command prompt, run `sc config PeerDistSvc start=auto`.
- B. From Group Policy Management Editor, configure the Windows Connection Manager settings.
- C. From a command prompt, run `sc config CscService start=auto`.
- D. From Group Policy Management Editor, configure the Network Connections settings.

Correct Answer: C

Explanation: Problem: UE-V Agent installation fails with error: The Offline Files service is not running Cause: The UE-V Agent installation failed because Offline Files was not enabled on the system.

Resolution: To resolve the issue, enable Windows Offline files on the system.

Windows 7 and Windows 8

Run the following command from an elevated command prompt:

```
sc config cscservice start=auto
```

QUESTION 5

You administer Windows 8.1 Enterprise laptops that are members of an Active Directory domain. Users travel frequently and access domain resources from inside client networks or from their home network. You want to manage the laptops

when they are connected to the company network from the external networks.

You need to ensure that the laptops can be managed and maintained while users are not logged on to the computers.

What should you recommend?

- A. Remote Assistance
- B. DirectAccess
- C. Windows Remote Management (WinRM)
- D. Remote Desktop

Correct Answer: C

Explanation: Windows Remote Management (WinRM) service implements the WS-Management protocol for remote management. WS-Management is a standard web services protocol used for remote software and hardware management. The WinRM service listens on the network for WS-Management requests and processes them.
