**QUESTION 1**

You administer computers that run windows 7 and Windows 8. You run an application that saves files that contain local settings unique to each user.

You want to allow users to synchronize settings for an application to any enterprise computer when they log on to the enterprise computer.

You need to implement a solution that will move a user's settings files to any computer.

You also need to ensure that you can roll back the changes if necessary.

Which required task or tasks should you perform with each approach? (To answer, drag the appropriate required task to the corresponding approach. Each required task may be used once, more than once, or not at all. You may need to drag

the split bar between

panes or scroll to view content.)

Select and Place:

Required Task	Approach
Create a settings location template.	Generator
Place the settings location template.	Template Catalog Path
Enable Folder Redirection.	Microsoft Desktop Optimization Pack (MDOP)
Deploy the User Experience Virtualization (UE-V) Agent.	

Correct Answer:

Required Task	Approach
	Generator
	Template Catalog Path
Enable Folder Redirection.	Microsoft Desktop Optimization Pack (MDOP)

Create a settings location template.

Place the settings location template.

Deploy the User Experience Virtualization (UE-V) Agent.

**QUESTION 2**

You support Windows 8.1 Enterprise desktop computers. One computer is a member of a workgroup and is used as a guest computer in a reception area.

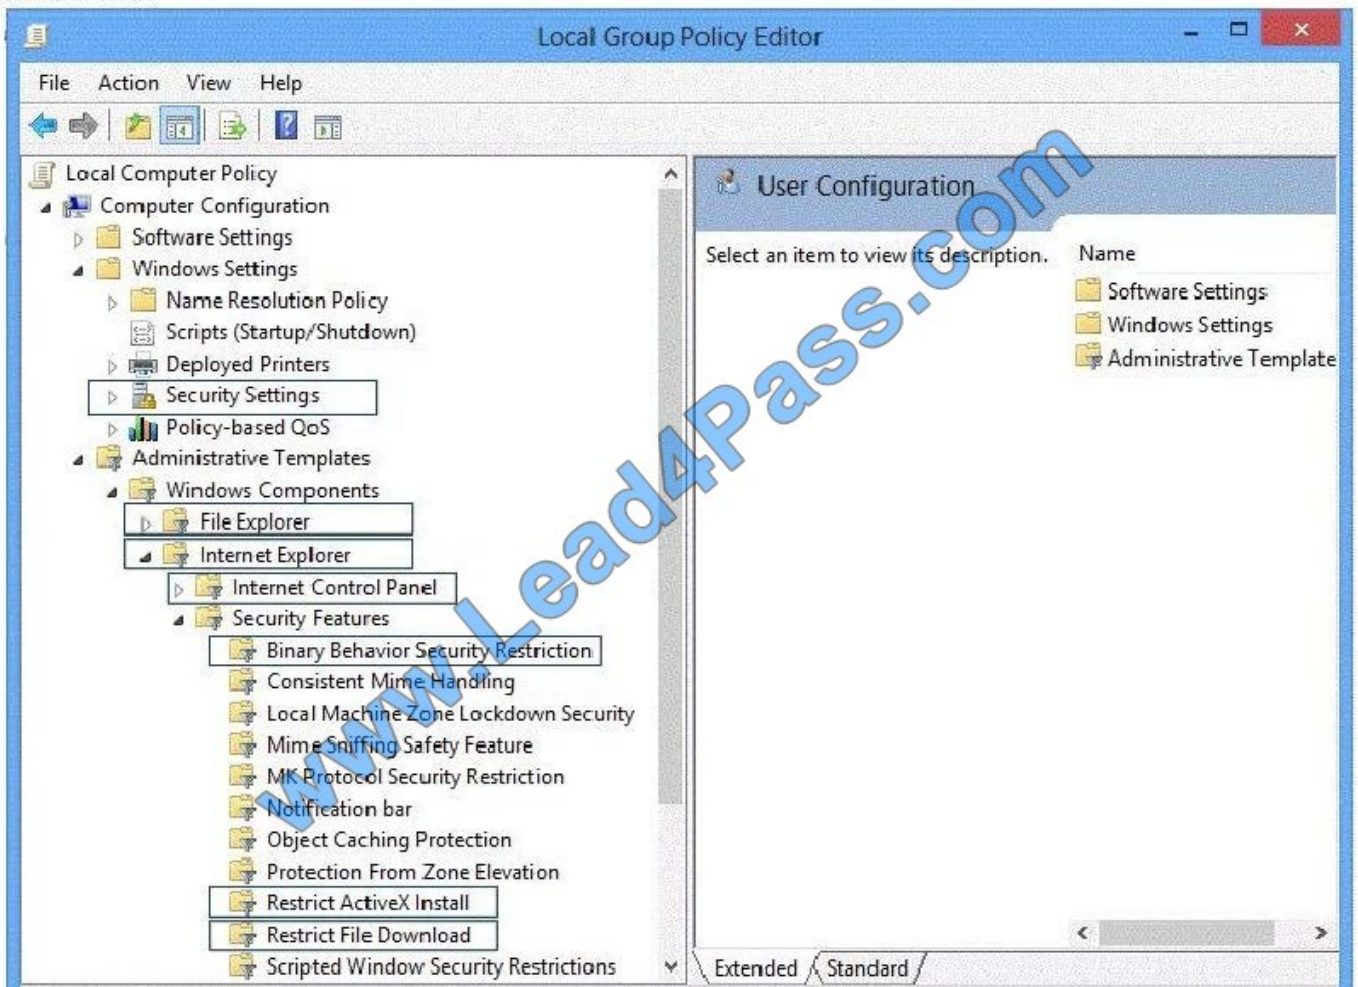

You need to configure the Windows SmartScreen setting to require administrator approval before running downloaded unknown software on the desktop computer.

Which policy setting should you use? (To answer, select the appropriate object in the answer area.)

### QUESTION 3

You are a system administrator for a local accounting firm. Your company uses Windows 8.1 Pro desktop computers. All computers have a secondary D: drive.

You want to enable File History for all your users. You create the folder structure D:

\\Backup\File History on all user computers. You launch the File History application and verify that it is turned on. Next, you click Select drive in Configure File History Settings. However, under Copy Files to: you get the message, "No usable

drives were found."

You need to successfully configure file history.

What should you do?

- A. Share the File History folder.
- B. Grant NTFS rights to the File History folder.

- C. Use a network drive for file history.
- D. Verify that your local drive has enough free space.

Correct Answer: C

Explanation: <http://windows.microsoft.com/en-us/windows-8/set-drive-file-history> Set up a drive for File History Before you start using File History to back up your files, you need to first select where your backups are saved. You can select an externally connected drive, such as a USB drive, or you can save to a drive on a network. There are other choices, but these two provide the best options to help protect your files against a crash or other PC problems.

---

#### QUESTION 4

You are the desktop administrator for your company, which uses Windows 8.1 computers.

The company decides to use virtual disks at your location so the programmers can build and test applications in a closed network.

You need to use the file given as a virtual hard disk and be able to boot to the vhd.

What should you do?

- A. Move the vhd file to a network share, map the network share, and allow a network boot.
- B. Attach the vhd in computer management and add it to the Boot Menu.
- C. Copy the vhd file to the root of C:\ open msconfig, and choose Safe Boot and Alternate Shell.
- D. Copy the vhd file to the root of C:\ run bcdedit and add an entry to the boot options that includes the path to the vhd.

Correct Answer: D

---

#### QUESTION 5

You are the desktop administrator for a medium-sized company.

You are rolling out new Windows 8.1 computers to your employees. You configure one of the computers so that it has the devices and settings the employees need for testing purposes.

You need to ensure that the hardware devices are operating properly.

Which tool should you use?

- A. Mmc devmgmt.msc
- B. sigverif.exe
- C. Driverquery/si
- D. verifier.exe /faults

Correct Answer: A
