QUESTION 1

You plan to purchase new Windows 8.1 tablets for your company network.

You need to ensure that tablet users are able to use the Windows 8.1 Snap feature.

Which hardware specifications should you meet in choosing tablets?

- A. Monitor that supports at least five simultaneous touches
- B. Monitor and video adapter that support a minimum screen resolution of 1024 x 768
- C. Monitor and video adapter that support a minimum screen resolution of 1366 x 768
- D. Monitor that supports at least three simultaneous touches

Correct Answer: D

QUESTION 2

You have a Windows 8.1 Enterprise desktop computer.

You add three new 3-terabyte disks.

You need to create a new 9-terabyte volume.

- A. From Disk Management, create a new spanned volume.
- B. From Disk Management, convert all of the 3-terabyte disks to GPT.
- C. From PowerShell, run the New-VirtualDisk cmdlet.
- D. From Disk Management, bring all disks offline.
- E. From Diskpart, run the Convert MBR command.
- F. From PowerShell, run the Add-PhysicalDisk cmdlet.

Correct Answer: AB

Explanation: Create a Spanned VolumeA spanned volume is a dynamic volume consisting of disk space on more than one physical disk. If a simple volume is not a system volume or boot volume, you can extend it across additional disks to create a spanned volume, or you can create a spanned volume in unallocated space on a dynamic disk.

Reference:<http://technet.microsoft.com/en-us/library/cc772180.aspx>

To create a spanned volume using the Windows interface1. In Disk Management, right- click the unallocated space on one of the dynamic disks where you want to create the spanned volume.2. Click New Spanned Volume.3. Follow the instructions on your screen.Using GPT Drives

Reference 2:<http://msdn.microsoft.com/en-us/library/windows/hardware/gg463524.aspx>

A GPT disk uses the GUID partition table (GPT) disk partitioning system. A GPT disk offers these benefits:Allows up to 128 primary partitions. Master Boot Record (MBR) disks can support up to four primary partitions and an additional 124

partitions inside extended partitions. Allows a much larger partition size greater than 2 terabytes (TB), which is the limit for MBR disks. Provides greater reliability because of replication and cyclical redundancy check (CRC) protection of the partition table. Can be used as a storage volume on all x64-based platforms, including platforms running Windows XP Professional x64 Edition. Starting with Windows Server 2003 SP1, GPT disks can also be used as a storage volume on x86-based Windows platforms. Can be used as a boot volume on x64-based editions of Windows 7, Windows Vista, and Windows Server 2008. Starting with Windows Server 2003 SP1, GPT disks can also be used as a boot volume on Itanium-based systems. Note: Windows only supports booting from a GPT disk on systems that contain Unified Extensible Firmware Interface (UEFI) boot firmware.

QUESTION 3

You administer computers that run Windows 7 and Windows 8. You run an application that saves files that contain local settings unique to each user.

You want to allow users to synchronize settings for an application to any enterprise computer when they log on to the enterprise computer.

You need to implement a solution that will move a user's settings files to any computer.

You also need to ensure that you can roll back the changes if necessary.

Which required task or tasks should you perform with each approach? (To answer, drag the appropriate required task to the corresponding approach. Each required task may be used once, more than once, or not at all. You may need to drag

the split bar between

panes or scroll to view content.)

Select and Place:

Required Task	Approach
Create a settings location template.	Generator
Place the settings location template.	Template Catalog Path
Enable Folder Redirection.	Microsoft Desktop Optimization Pack (MDOP)
Deploy the User Experience Virtualization (UE-V) Agent.	

Correct Answer:

Required Task	Approach
	Generator
	Template Catalog Path
Enable Folder Redirection.	Microsoft Desktop Optimization Pack (MDOP)

Create a settings location template.

Place the settings location template.

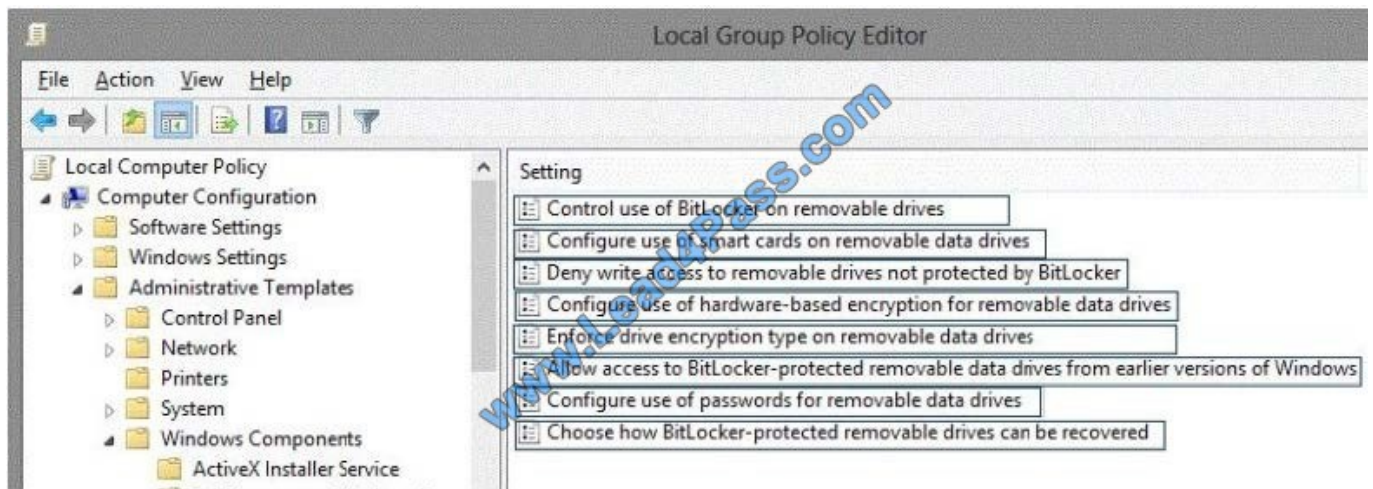

Deploy the User Experience Virtualization (UE-V) Agent.

QUESTION 4

You administer Windows 8.1 computers in your company network. The security policies of the company require that USB storage devices are allowed only if they are protected with BitLocker To Go. You need to prevent users from removing BitLocker encryption from the USB storage devices.

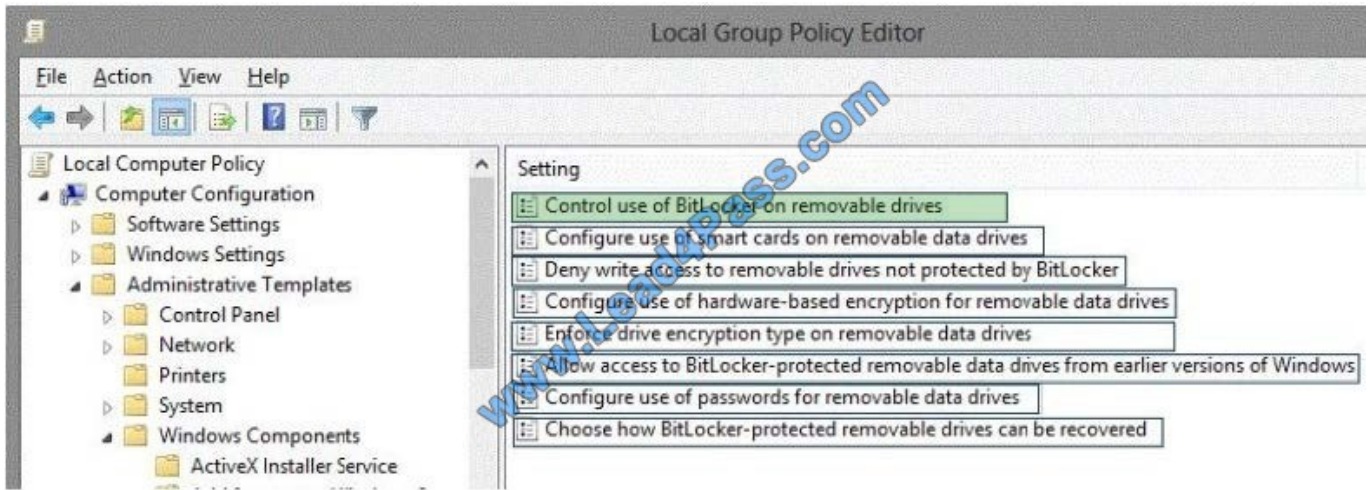

Which configuration setting should you modify? (To answer, select the appropriate setting in the answer area.)

Hot Area:

Correct Answer:

QUESTION 5

A company has 20 portable computers that run Windows 7. The computers are members of a workgroup.

The company plans to upgrade the computers to Windows 8.1. You are planning a deployment strategy.

You need to ensure that users can log on to their existing accounts and access their existing data after the upgrade.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Create Windows 8.1 installation media by extracting the installation files to a bootable USB flash drive.	
Create Windows 8.1 installation media by copying the Windows 8.1 .iso image file to a bootable USB flash drive.	
Start the portable computer with the original operating system and then insert the bootable USB flash drive.	
Start the portable computer from the bootable USB flash drive.	
Run the Windows 8.1 Setup Wizard.	
Run the Windows 7 Upgrade Advisor.	

Correct Answer:

Actions	Answer Area
	Create Windows 8.1 installation media by extracting the installation files to a bootable USB flash drive.
Create Windows 8.1 installation media by copying the Windows 8.1 .iso image file to a bootable USB flash drive.	Start the portable computer with the original operating system and then insert the bootable USB flash drive.
Start the portable computer from the bootable USB flash drive.	Run the Windows 8.1 Setup Wizard.
Run the Windows 7 Upgrade Advisor.
