QUESTION 1

You work for a small company that recently upgraded to Windows 10 Enterprise computers.

The HR department stores sensitive data in a folder named Personnel Files.

You need to encrypt this folder only, and no other data.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Use EFS.
- B. Use cipher.exe.
- C. Use BitLocker
- D. Use REFS.

Correct Answer: AB

QUESTION 2

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

A user successfully accesses \\server1\Sources\App1\. The user cannot access \\server1\Sources\App2\.

You need to ensure that the user can access \\server1\Sources\App2\.

What should you configure?

- A. Microsoft OneDrive
- B. share permissions
- C. account policies
- D. software restriction policies
- E. HomeGroup settings
- F. application control policies

G. NTFS permissions

H. Encrypting File System (EFS) settings

Correct Answer: G

QUESTION 3

You administer Windows 10 Enterprise client computers that are members of an Active Directory domain that includes Active Directory Certificate Services (AD CS).

You restored a computer from a backup that was taken 45 days ago. Users are no longer able to log on to that computer by using their domain accounts. An error message states that the trust relationship between the computer and the

primary domain has failed.

What should you do?

A. Renew the certificates issued to the client computer.

B. Reset the passwords of all affected domain users.

C. Logon as a local administrator and issue the netdom resetpwd command. Log off and restart the computer.

D. Restore the client computer from a known good backup that was taken two weeks earlier than the backup you previously restored.

Correct Answer: C

QUESTION 4

An organization has Microsoft System Center Configuration Manager (SCCM) version 1610.

The organization purchases a Microsoft Intune subscription and must configure the mobile device management (MDM) authority for that subscription to use SCCM. You need to deploy the required role in SCCM to support the Intune service.

Which role must you deploy in SCCM?

A. enrollment proxy point

B. service connection point

C. enrollment point

D. management point

Correct Answer: B

QUESTION 5

You have a desktop computer and a tablet that both run Windows 10 Enterprise.

The desktop computer is located at your workplace and is a member of an Active Directory domain. The network contains an Application Virtualization (App-V) infrastructure. Several App-V applications are deployed to all desktop computers.

The tablet is located at your home and is a member of a workgroup. Both locations have Internet connectivity.

You need to be able to access all applications that run on the desktop computer from you tablet.

Which actions should you perform on each computer? To answer, drag the appropriate action to the correct computer. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll

to view content.

Select and Place:

Actions

Enable Remote Desktop.

Enable Remote Assistance.

Install Client Hyper-V.

Install the Application Virtualization (App-V) Client.

Deploy Application Virtualization (App-V) packages.

Run the Remote Desktop Client.

Answer Area

desktop computer

Action

tablet

Action

Correct Answer:

Actions

-
- Enable Remote Assistance.
- Install Client Hyper-V.
- Install the Application Virtualization (App-V) Client.
- Deploy Application Virtualization (App-V) packages.
-

Answer Area

desktop computer

Enable Remote Desktop.

tablet

Run the Remote Desktop Client.
