QUESTION 1

You are setting up a test environment and configuring a Windows 10 Enterprise computer. The test environment uses trunk ports.

The network department wants to use tagging to differentiate the networks. You need to modify the settings of the computer so that it uses network 81. Which network setting should you configure?

- A. Flow Control
- B. VLAN ID
- C. Receive Side Scaling
- D. Network Address

Correct Answer: B

QUESTION 2

Your company has a main office and two branch offices named Branch1 and Branch2. The main office contains a file server named Server1 that has BranchCache enabled. Branch1 contains

a server named Server2 that is configured as a hosted cache server. The average round trip network latency between the offices is 100 milliseconds.

All client computers run Windows 8 Enterprise. All of the computers are joined to an Active Directory domain.

The BranchCache settings of all the computers are configured as shown in the following exhibit. (Click the Exhibit button.)

BranchCache GPO
Data collected on: 5/17/2013 7:30:30 AM

Computer Configuration (Enabled) [hide all](#)

Policies [hide](#)

Administrative Templates [hide](#)

Policy definitions (ADMX files) retrieved from the local computer.

Network/BranchCache [hide](#)

| Policy | Setting | Comment |
|---|---------|---------|
| Configure BranchCache for network files | Enabled | |
| Type the maximum round trip network latency (milliseconds) after which caching begins | | |
| | 80 | |
| Enable Automatic Hosted Cache | Enabled | |
| Discovery by Service Connection Point | | |
| Set BranchCache Distributed Cache mode | Enabled | |
| Set percentage of disk space used for client computer cache | Enabled | |
| Specify the percentage of total disk space allocated for the cache | | |
| | 5 | |
| Turn on BranchCache | Enabled | |

User Configuration (Enabled) [hide](#)

No settings defined.

In the table below, identify the effective setting for the client computers in each branch office. Note: Make one selection in each column. Each correct selection is worth one point.

Hot Area:

| Effective setting | Branch1 Computers | Branch2 Computers |
|--|--------------------------|--------------------------|
| Will not use BranchCache. | <input type="checkbox"/> | <input type="checkbox"/> |
| Will retrieve cached content from peers. | <input type="checkbox"/> | <input type="checkbox"/> |
| Will retrieve cached content from Server1. | <input type="checkbox"/> | <input type="checkbox"/> |
| Will retrieve cached content from Server2. | <input type="checkbox"/> | <input type="checkbox"/> |

Correct Answer:

| Effective setting | Branch1 Computers | Branch2 Computers |
|--|-------------------------------------|-------------------------------------|
| Will not use BranchCache. | <input type="checkbox"/> | <input type="checkbox"/> |
| Will retrieve cached content from peers. | <input type="checkbox"/> | <input type="checkbox"/> |
| Will retrieve cached content from Server1. | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Will retrieve cached content from Server2. | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

QUESTION 3

You administer computers that run Windows 10 Enterprise and are members of an Active Directory domain. Some volumes on the computers are encrypted with BitLocker.

The BitLocker recovery passwords are stored in Active Directory. A user forgets the BitLocker password to local drive E: and is unable to access the protected volume.

You need to provide a BitLocker recovery key to unlock the protected volume.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Ask the user to run the manage-bde-protectors-disable e: command.
- B. Ask the user for his or her logon name.
- C. Ask the user to run the manage-bde-unlock E:-pw command.
- D. Ask the user for his or her computer name.

E. Ask the user for a recovery key ID for the protected drive.

Correct Answer: CD

D: To view the recovery passwords for a computer you would need the computer name:

In Active Directory Users and Computers, locate and then click the container in which the computer is located.

Right-click the computer object, and then click Properties.

In the Properties dialog box, click the BitLocker Recovery tab to view the BitLocker recovery passwords that are associated with the particular computer.

C: The Manage?de: unlock command unlocks a BitLocker-protected drive by using a recovery password or a recovery key.

QUESTION 4

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 10 Enterprise and are joined to the domain.

Corporate policy prohibits Homegroups on the corporate network.

You need to ensure that client computer network adapter settings do not support joining a Homegroup.

What should you do?

A. Disable IPv6.

B. Disable IPv4.

C. Enable IPv6.

D. Enable IPv4.

Correct Answer: A

QUESTION 5

Note: This question is part of a series of questions that present the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You support Windows 10 Enterprise desktop computers and tablets. All of the computers are able to connect to your company network from the Internet by using DirectAccess.

Your company wants to deploy a new application. The deployment solution must meet the following requirements:

The application does not utilize the company server infrastructure.

The application is isolated from other applications.

The application uses the least amount of disk space possible on a solid-state drive (SSD) on the tablets.

The application utilizes the least amount of network bandwidth.

You need to deploy the new application and ensure that it can run on the tablets. What should you do?

- A. Deploy the application as an Application Virtualization (App-V) package. Install the App-V 4.6 client on the tablets.
- B. Deploy the application as a published application on the Remote Desktop server. Create a Remote Desktop connection on the tablets.
- C. Install the application on a local drive on the tablets.
- D. Install the application in a Windows To Go workspace.
- E. Install Hyper-V on tablets. Install the application on a virtual machine.
- F. Publish the application within a separate Windows 10 Enterprise installation in a virtual hard disk (VHD) file. Configure the tablets with dual boot.
- G. Install the application within a separate Windows 10 Enterprise installation in a VHDX file. Configure tablets with dual boot.

Correct Answer: B
