QUESTION 1

You have a deployment of System Center Configuration Manager (Current Branch).

You discover that some users have an executable file named App1.exe configured to run at start up.

You need to identify which computers have App1.exe configured to run at start up.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

- Create a compliance policy
- Deploy a package to a collection
- Create a configuration item and add an assembly
- Deploy a configuration baseline to a collection
- Create a package
- Create a configuration baseline
- Create a configuration item that has a registry value and a compliance rule

Correct Answer:

Actions

- Create a compliance policy
- Deploy a package to a collection
- Create a configuration item and add an assembly
-
- Create a package
-
-

Answer Area

- Create a configuration item that has a registry value and a compliance rule
- Create a configuration baseline
- Deploy a configuration baseline to a collection

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses a network ID of 10.0.0.0/8.

The company opens a new office that uses a network ID of 10.5.0.0/16. The office has three floors. Each floor has a VLAN. The network ID of each VLAN is 10.5.10.0/24, 10.5.20.0/24, and 10.5.30.0/24.

You create a distribution point for the new office.

You need to ensure that the clients in the new office obtain content from the new distribution point.

Solution: Create an IP address range boundary from 10.5.0.0/16.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a deployment of System Center Configuration Manager (Current Branch).

You configure hybrid mobile device management (MDM).

You have a support technician named User1.

Your company purchases 300 Apple iPhones.

You need to ensure that User1 can enroll the iPhones.

Solution: From Default Client Settings, you set an enrollment profile.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

References: <https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager>

QUESTION 4

You configure a task sequence in System Center Configuration Manager.

You need to ensure that the support department can see the progress of the task sequence only.

What should you do?

A. Assign the db_datareader role to the users in the support department.

B. Create a monitoring query based on a task sequence.

C. Create a status message query.

D. Create a monitoring query that is limited to a collection.

Correct Answer: C

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses a network ID of 10.0.0.0/8.

The company opens a new office that uses a network ID of 10.5.0.0/16. The office has three floors. Each floor has a VLAN. The network ID of each VLAN is 10.5.10.0/24, 10.5.20.0/24, and 10.5.30.0/24.

You create a distribution point for the new office.

You need to ensure that the clients in the new office obtain content from the new distribution point.

Solution: Create an Active Directory site associated to the 10.5.0.0/16 subnet, and then create an Active Directory site boundary.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B
