QUESTION 2

You start a client computer by using Pre-Boot Execution Environment (PXE). You load a default version of Windows Preinstallation Environment (windows PE) that was created by using the Windows Assessment and Deployment Kit

(Windows ADK).

You have a file server that contains a shared folder. The folder contains an image of Windows. The folder is shared to the local Users group only.

The computer has a system partition and a Windows partition.

You need to apply a reference installation from a network share.

Which command should you run before applying the image?

A. net.exe

B. mshta.exe

C. drvinst.exe

D. wpeinit.exe

Correct Answer: A

QUESTION 3

You have a computer that has Windows installed.

You start Windows on the computer for the first time.

You need to verify that Push Button Reset (PBR) is configured in the Windows installation.

Which tool should you use?

A. Scanstate.exe

B. bcdboot.exe

C. Dism.exe

D. Reagentc.exe

Correct Answer: D

QUESTION 4

You install Windows on a computer named Computer1.

You add an answer file to Computer1 that modifies the user experience when the computer starts for the first time.

You plan to capture Computer1 and then deploy the image to several computers.

You need to verify the user experience when the computer starts for the first time.

What should you run on Computer1? To answer, select the appropriate option for each list in the answer area
