### QUESTION 1

You have a server named Server1 that runs Windows Server 2016. Server1 is located on a network that is disconnected from the Internet.

You have a computer named Computer1 that runs Windows 10.

You download the Windows Assessment and Deployment Kit (Windows ADK) setup on Computer1.

You need to create an installation source on a USB drive that can be used to install Windows ADK on Server1.

Which installation option should you use when you run the Windows ADK setup on Computer1?

- A. /list
- B. /layout
- C. /ceip
- D. /features
- E. /installpath

Correct Answer: B

References: <https://technet.microsoft.com/en-gb/library/dn621908.aspx>

---

### QUESTION 2

You create the working directories for a custom Windows Preinstallation Environment (Windows PE) image.

You need to create an ISO image of Windows PE that can be written to a DVD. The ISO image must be bootable.

Which command should you use?

- A. bcdboot.exe
- B. oscdimg.exe
- C. bootsect.exe
- D. etfsboot.exe

Correct Answer: B

---

### QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You are building a new image of Windows 10.

You have a network share that contains the driver files. Each driver is comprised of an INF file and several DLL files.

You need to add the drivers to computers that are installed by using the Windows 10 image. You must achieve the goal without adding the drivers to the image.

What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Correct Answer: D

---

#### QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a custom image of Windows 10.

You need to deploy the image to a computer.

Which parameter should you specify when you run `dism.exe`?

- A. /Add-Capability
- B. /Add-Driver
- C. /Add-Package
- D. /Add-ProvisionedAppxPackage
- E. /Apply-CustomDataImage

F. /Apply-Image

G. /Apply-Unattend

H. /Export-Image

Correct Answer: F

---

## QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create a primary partition of 250 MB that uses the NTFS file system.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

This partition must be at least 300 MB
