QUESTION 1

You are creating an image of Windows 10 for a new model of computers that will have Microsoft Office 2016 installed.

You install the Office Deployment Tool.

You need to install Office 2016. The solution must install Microsoft Word and Excel without installing any other Office applications.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	AnswerArea
Run setup.exe and specify the /packager parameter.	
Create a Configuration.xml file.	
Run setup.exe and specify the /configure parameter.	
Run setup.exe and specify the /download parameter.	
Create an Install.json file.	

Correct Answer:

Actions	AnswerArea
Run setup.exe and specify the /packager parameter.	Create a Configuration.xml file.
	Run setup.exe and specify the /download parameter.
	Run setup.exe and specify the /configure parameter.
Create an Install.json file.

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You run `dism.exe/Add-Package` once and specify the `/PackagePath` parameter for each folder that contains the updates.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You have an image of Windows 10 for a new desktop computer model. The computer uses specific out-of-box device drivers stored in the INF format.

You need to update the drivers by using an answer file.

Which parameter should you specify when you run `dism.exe`?

A. `/Add-Capability`

B. `/Add-Driver`

C. `/Add-Package`

D. `/Add-ProvisionedAppxPackage`

E. `/Apply-CustomDataImage`

F. `/Apply-Image`

G. `/Apply-Unattend`

H. `/Export-Image`

Correct Answer: B

QUESTION 4

You have a generalized image of the 64-bit version of Windows 10. The image is released to the Out-of-Box-Experience (OOBE).

You need to ensure that when the image is deployed to a computer, the computer starts in audit mode.

What should you do?

- A. Create an answer file, and then copy the answer file to the image.
- B. When the computer starts, press SHIFT+F10, and then run sysprep.exe /audit.
- C. Create a provisioning package, and then copy the provisioning package to the image.
- D. When the computer starts, press SHIFT+F10, and then run imagex.exe.

Correct Answer: A

QUESTION 5

You plan to deploy a new image of Windows 10.

You mount the image and preinstall an app from the Windows Store.

You need to manually test whether the app runs as expected.

What should you do first?

- A. Start the computer, press SHIFT+10, and then run sfc.exe.
- B. Remove the license file from the package files, and then start the computer in audit mode.
- C. Start the computer in audit mode, and then create a new user profile.
- D. Start the computer, and then complete the Out-of-Box-Experience (OOBE).

Correct Answer: D
