QUESTION 2

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You are building a new image of Windows 10.

You have several pictures that you plan to make available as desktop backgrounds.

You copy the installation media for Windows 10 to Computer1.

You need to ensure that the Windows 10 image contains the desktop backgrounds.

What should you do first?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Correct Answer: A

QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You install Windows 10 on several devices.

You need to add a trusted root certificate to the devices. You must achieve the goal without reinstalling Windows 10.

What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.

G. Load a catalog file (.clg).

H. Create a cabinet file (.cab).

Correct Answer: F

QUESTION 4

You extract an image of Windows 10 in audit mode to a computer named Computer1.

You install an application named App1 on Computer1.

You need to create a siloed provisioning package of App1.

How should you create the package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Tool to use to create the siloed provisioning package:

| | |
|--|---|
| | ▼ |
| dism.exe | |
| Express Deployment Tool (EDT) for Windows 10 | |
| scanstate.exe | |
| Windows Imaging and Configuration Designer (Windows ICD) | |

File extension to use for the siloed provisioning package:

| | |
|-------|---|
| | ▼ |
| .msi | |
| .msu | |
| .ppkg | |
| .spp | |

Correct Answer:

Answer Area

Tool to use to create the siloed provisioning package:

| | |
|--|---|
| | ▼ |
| dism.exe | |
| Express Deployment Tool (EDT) for Windows 10 | |
| scanstate.exe | |
| Windows Imaging and Configuration Designer (Windows ICD) | |

File extension to use for the siloed provisioning package:

| | |
|-------|---|
| | ▼ |
| .msi | |
| .msu | |
| .ppkg | |
| .spp | |

QUESTION 5

You are creating an image of Windows 10 for a new model of computers that will have Microsoft Office 2016 installed.

You install the Office Deployment Tool.

You need to install Office 2016. The solution must install Microsoft Word and Excel without installing any other Office applications.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

| Actions | AnswerArea |
|---|------------|
| Run setup.exe and specify the /packager parameter. | |
| Create a Configuration.xml file. | |
| Run setup.exe and specify the /configure parameter. | |
| Run setup.exe and specify the /download parameter. | |
| Create ar Install.json file. | |

Correct Answer:

| Actions | AnswerArea |
|--|---|
| Run setup.exe and specify the /packager parameter. | Create a Configuration.xml file. |
| | Run setup.exe and specify the /download parameter. |
| | Run setup.exe and specify the /configure parameter. |
| | |
| Create ar Install.json file. | |
