QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result, these questions will not appear in the review screen.

You are the administrator of a Microsoft SOL Server Master Data Services (MDS) instance. The instance contains a model named Geography and a model named customer. The Geography model contains an entity named countryRegion.

You need to ensure that the countryRegion entity members are available in the customer model.

Solution: In the Geography model, publish a business rule with a Change Value action.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Instead configure an entity sync relationship to replicate the CountryRegion entity.

Note: In Master Data Services, a business rule is a rule that you use to ensure the quality and accuracy of your master data. You can use a business rule to automatically update data, to send email, or to start a business process or workflow.

QUESTION 2

You are creating a SQL Server Master Data Services (MDS) model for a company.

The source data for the company is stored in a single table that contains the manager-to- subordinate relationships.

You need to create a hierarchy representing the organizational structure of the company.

Which hierarchy type should you use?

A. Natural

B. Explicit

C. Parent

D. Recursive

Correct Answer: D

QUESTION 3

You are the data steward at your company.

Duplicate customers exist in a Microsoft Excel workbook. You create a Data Quality Services (DQS) knowledge base and matching policy to identify these duplicate customers.

You need to identify the duplicate customers.

Which option should you use? (To answer, select the appropriate option in the answer area.)

Hot Area:

Correct Answer:

QUESTION 4

You are developing a SQL Server Integration Services (SSIS) package.

OnError and OnWarning events must be logged for viewing in the built-in SSIS reports by using SQL Server Management Studio.
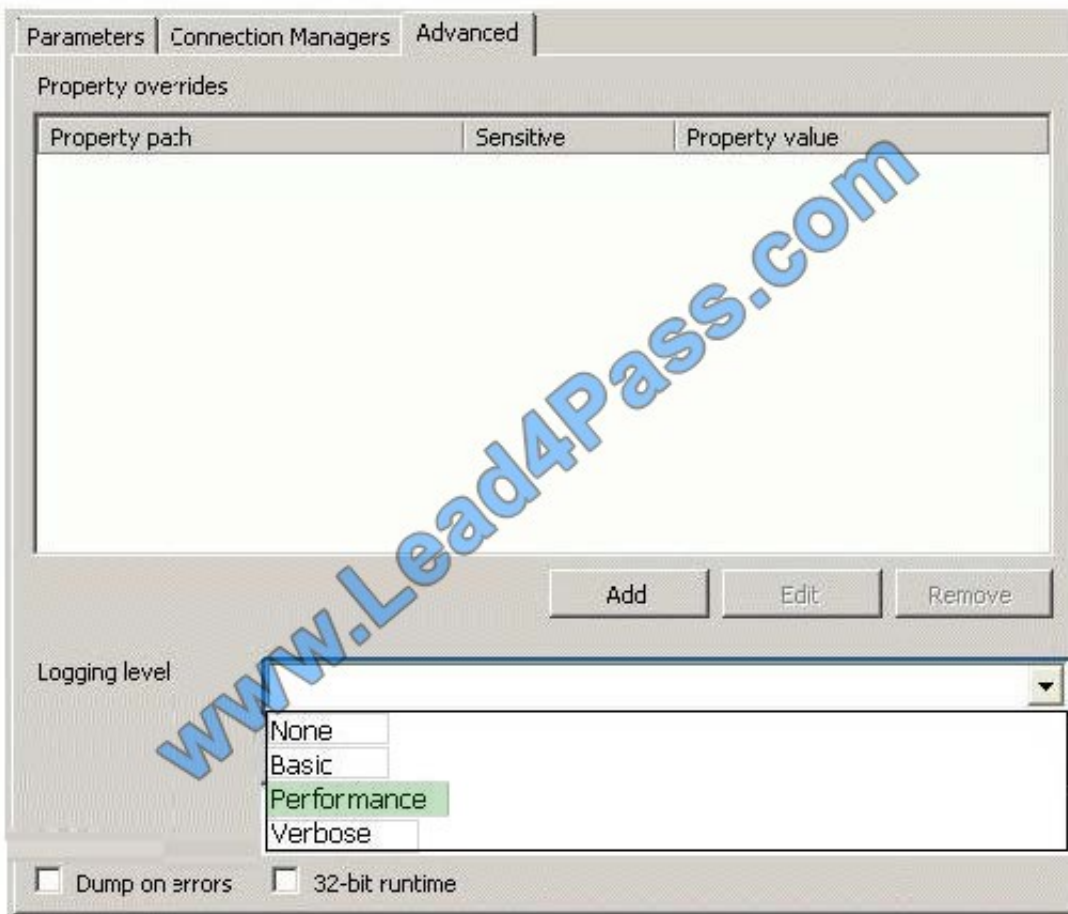

You need to execute the package and minimize the number of event types that are logged.

Which setting should you use? (To answer, change the appropriate setting in the answer area.)

Hot Area:

Correct Answer:

QUESTION 5

You need to configure Microsoft SQL Server Integration Services (SSIS) for maximum insert performance.

The Integration Services package is configured as shown in the following exhibit.(Missing exhibit)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

You need to set Data access mode to **[answer choice]** to minimize the amount of time it takes to load data to the table.

Table or view
Table or view – fast load
Table name or view name variable
SQL command

You need to enable **[answer choice]** to minimize the amount of time it takes to load data to the table.

Keep nulls
Keep identity
Check constraints
Table lock

Correct Answer:

You need to set Data access mode to **[answer choice]** to minimize the amount of time it takes to load data to the table.

Table or view
Table or view – fast load
Table name or view name variable
SQL command

You need to enable **[answer choice]** to minimize the amount of time it takes to load data to the table.

Keep nulls
Keep identity
Check constraints
Table lock
