QUESTION 1

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a data source that is larger than memory.

You need to visualize the distribution of the values for a variable in the data source.

What should you use?

- A. the Describe package
- B. the rxHistogram function
- C. the rxSummary function
- D. the rxQuantile function
- E. the rxCube function
- F. the summary function
- G. the rxCrossTabs function
- H. the ggplot2 package

Correct Answer: B

QUESTION 2

You have a dataset that has a character variable. You need to create a bag of counts of n-grams. Which function should you use?

- A. featurizeText()
- B. categoricalHash()
- C. concat()
- D. selectFeatures()
- E. categorical()

Correct Answer: A

References: <https://docs.microsoft.com/en-us/machine-learning-server/python-reference/microsoftml/featurize-text>

QUESTION 3

You need to build a model that looks at the probability of an outcome. You must regulate between L1 and L2. Which classification method should you use?

- A. Two-Class Neural Network
- B. Two-Class Support Vector Machine
- C. Two-Class Decision Forest
- D. Two-Class Logistic Regression

Correct Answer: D

QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You need to evaluate the significance of coefficients that are produced by using a model that was estimated already.

Which function should you use?

- A. rxPredict
- B. rxLogit
- C. summary
- D. rxLinMod
- E. rxTweedie
- F. stepAic
- G. rxTransform
- H. rxDataStep

Correct Answer: D

References: <https://docs.microsoft.com/en-us/machine-learning-server/r/how-to-revoscaler-linear-model>

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You use `dplyrXdf`, and you discover that after you exit the session, the output files that were created were deleted.

You need to prevent the files from being deleted.

Solution: You use `rxSetComputeContext` with the local parameter before performing operations that save results.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
