QUESTION 1

Your company has a main office and a branch office.

three domain

The network contains an Active Directory domain named contoso.com. The domain contains controllers. The domain controllers are configured as shown in the following table.

Domain controller name	Location	Type
DC1	Main office	Writable domain controller
DC2	Main office	Writable domain controller
RODC1	Branch office	Read-only domain controller (RODC)

The domain contains two global groups. The groups are configured as shown in the following table.

Group name	Description
Helpdesk	Supports users throughout the company.
Branch1Users	Contains users that work in the branch office only.

You need to ensure that the RODC is configured to meet the following requirements:

Cache passwords for all of the members of Branch1Users.

Prevent the caching of passwords for the members of Helpdesk.

What should you do?

A. Modify the membership of the Denied RODC Password Replication group.

B. Install the BranchCache feature on RODC1.

C. Modify the delegation settings of RODC1.

D. Create a Password Settings object (PSO) for the Helpdesk group.

Correct Answer: A

QUESTION 2

Your company has a main office and a branch office. Each office contains several hundred computers that run Windows 20l2.

You plan to deploy two Windows Server Update Services (WSUS) servers. The WSUS servers will be configured as shown in the following table.

Server name	Office
Server1	Main
Server2	Branch

You need to implement the WSUS infrastructure to meet the following requirements:

All updates must be approved from a server in the main office.

All client computers must connect to a WSUS server in their local office. What should you do? (Each correct answer presents part of the solution. Choose all that apply.

A. Deploy a Group Policy object (GPO) that has the update location set to Serverl.

B. On Server2, configure WSUS in Replica mode.

C. On Serverl, configure WSUS in Replica mode.

D. On Server2, configure WSUS in Autonomous mode.

E. Deploy a Group Policy object (GPO) that has the update location set to Server2.

F. On Serverl, configure WSUS in Autonomous mode.

Correct Answer: ABEF

QUESTION 3

Your network contains an Active Directory domain named contoso.com. The domain contains several domain controllers. The domain controllers run either Windows Server 2012 or Windows Server 200S R2. The domain functional

level is Windows Server 200S R2. The forest functional level is Windows Server 200S. The corporate compliance policy states that all items deleted from Active Directory must be recoverable from a Recycle Bin.

You need to recommend changes to the current environment to meet the compliance policy. Which changes should you recommend? (Each correct answer presents part of the solution. Choose all that apply.)

A. Run the SetADForestMode cmdlet.

B. Run the NewADObject cmdlet.

C. Run the SetADObject cmdlet.

D. Run the SetADDomainMode cmdlet.

E. Run the EnableADOptionalFeature cmdlet.

Correct Answer: AE

QUESTION 4

A company has data centers in Sea and New York. A highspeed link connects the data centers. Each data center runs a virtualization infrastructure that uses HyperV Server 2012 and HyperV Server 2012 R2. Administrative users from the

Sea and New York offices are members of Active Directory Domain Services groups named SeaAdmins and NewYorkAdmins, respectively.

You deploy one System Center Virtual Machine Manager (SCVMM) in the Sea le data center. You create two private clouds named SeaCloud and NewYorkCloud in the Sea and New York data centers, respectively.

You have the following requirements:

Administrators from each data center must be able to manage the virtual machines and services from their location by using a web portal.

Administrators must not apply new resource quotas or change resource quotas. You must manage public clouds by using the existing SCVMM server. You must use the minimum permissions required to perform the administrative tasks.

You need to configure the environment.

What should you do?

A. For both the Sea le and New York admin groups, create a User Role and assign it to the Application Administrator profile. Add the Sea le and New York private clouds to the corresponding User Role.

B. For both the Sea le and New York admin groups, create a User Role and assign it to the Tennant Administrator profile. Add the Sea le and New York private clouds to the corresponding User Role.

C. Add both SeaAdmins and NewYorkAdmins to the Local Administrators group of each HyperV host in Sea and New York, respectively.

D. Add both SeaAdmins and NewYorkAdmins to the Local Administrators group of the SCVMM server.

Correct Answer: A

QUESTION 5

You have a System Center 20l2 R2 Configuration Manager deployment.

All users have client computers that run Windows S.l. The users log on to their client computers as standard users. An application named Appl is deployed to the client computers by using System Center. You need to recommend a solution to

validate a registry key used by Appl. If the registry key has an incorrect value, the value must be changed. The registry key must be validated every day. The solution must generate a report on non compliant computers.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

A. Group Policy preferences

B. A desired configuration baseline

C. The Windows PowerShell Desired State Configuration (DSC) feature

D. The Microsoft Baseline Security Analyzer (MBSA)

Correct Answer: B
