QUESTION 1

Your company has a human resources department, a finance department, a sales department and an RandD department.

The company audits the access of documents that contain departmentspecific sensitive information. You are planning an administrative model for the departments to meet the following requirements:

Provide RandD managers with the ability to back up all the files of their department only. Provide finance managers with the ability to view the audit logs for the files of their department only. Provide human resources managers with the ability to

view the audit logs for the files of their department only. Provide sales managers with the ability to modify the permissions on all the shared folders of their department only. You need to identify the minimum amount of file servers required on

the network to meet the requirements of each department.

How many file servers should you identify?

A. I

B. 2

C. 3

D. 4

Correct Answer: C

QUESTION 2

Your company, which is named Contoso, Ltd., has offices only in North America. The company has 2,000 users. The network contains an Active Directory domain named contoso.com.

You plan to deploy an Active Directory Certificate Services (AD CS) infrastructure and assign certificates to all client computers.

You need to recommend a PKI solution to protect the private key of the root certification authority (CA) from being accessed by external users.

What should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

A. An offiine standalone root CA and an online enterprise issuing CA

B. An online enterprise root CA and an online enterprise issuing CA

C. An offiine standalone root CA and an offiine enterprise issuing CA

D. An online enterprise root CA, an online enterprise policy CA, and an online enterprise issuing CA

Correct Answer: A

QUESTION 3

Your network contains 10 servers that run Windows Server 2012. The servers have the HyperV server role installed. The servers host a Virtual Desktop Infrastructure (VDI) that contains persistent virtual machines. Each virtual machine is

assigned to a specific user. Users can install software on their specific virtual machine. You need to implement a solution to generate monthly reports that contain a list of all the installed software on the virtual machines. The solution must

NOT require the installation of additional software on the virtual machines.

Which solution should you implement?

A. A Microsoft System Center 2012 Configuration Manager software inventory

B. A Microsoft System Center 2012 Configuration Manager hardware inventory

C. Microsoft Assessment and Planning (MAP) Toolkit scans

D. Microsoft Audit Collection Services (ACS) audit logs

Correct Answer: C

QUESTION 4

Your network contains five servers that run Windows Server 2012. You install the HyperV server role on the servers.

You create an external virtual network switch on each server.

You plan to deploy five virtual machines to each HyperV server. Each virtual machine will have a virtual network adapter that is connected to the external virtual network switch and that has a VLAN identifier of 1. Each virtual machine will

run Windows Server 2012. All of the virtual machines will run the identi al web application. You plan to install the Network Load Balancing (NLB) feature on each virtual machine and join each virtual machine to an NLB cluster. The cluster will

be configured to use unicast only.

You need to ensure that the NLB feature can distribute connections across all of the virtual machines.

What should you do?

A. From the properties of each virtual machine, add a second virtual network adapter. Connect the new virtual network adapters to the external virtual network switch. Configure the new virtual network adapters to use a VLAN identifier of 2.

B. On each HyperV server, create a new private virtual network switch. From the properties of each virtual machine, add a second virtual network adapter. Connect the new virtual network adapters to the new private virtual network switches.

C. On each HyperV server, create a new external virtual network switch. From the properties of each virtual machine, add a second virtual network adapter. Connect the new virtual network adapters to the new external virtual network switches.

D. From the properties of each virtual machine, enable MAC address spoofing for the existing virtual network adapter.

Correct Answer: D

QUESTION 5

Your network contains an Active Directory domain named contoso.com. The network has an Active Directory Certificate Services (AD CS) infrastructure.

You need to issue a certificate to users to meet the following requirements:

Ensure that the users can encrypt files by using Encrypting File System (EFS). Ensure that all of the users reenroll for their certificate every six months. Solution: You create a copy of the Basic EFS certificate template, and then you modify

the validity period of the copy.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A
