QUESTION 1

You plan to simplify the organizational unit (OU) structure for a company. You must consolidate all member servers in the domain to a single OU named MemberServers.

You need to apply Group Policy settings for servers that meet the following criteria:

Server operating systems: Windows Server 2012

Server hardware platform: 64-bit

Server memory: less than 16 GB of RAM

Solution: You create a WMI filter action that includes the following query:

```
select * from Win32_OperatingSystem where Version like  
"6.2%" and ProductType="1" and OSArchitecture = "64-bit" where  
Win32_PhysicalMemory > 16000000000
```

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

Your network contains an Active Directory domain named contoso.com.

You plan to implement Network Load Balancing (NLB).

You need to identify which network services and applications can be load balanced by using NLB.

Which services and applications should you identify?

A. Microsoft SQL Server 2012 Reporting Services

B. A failover cluster

C. A DHCP server

D. A Microsoft Exchange Server 2010 Mailbox server

E. A file server

F. A Microsoft SharePoint Server 2010 frontend Web server

Correct Answer: AF

QUESTION 3

You need to recommend a server deployment strategy for the main office that meets the server deployment requirements. What should you recommend installing in the main office?

- A. Windows Deployment Services (WDS)
- B. The Windows Automated Installation Kit (Windows AIK)
- C. The Express Deployment Tool (EDT)
- D. The Windows Assessment and Deployment Kit (Windows ADK)

Correct Answer: A

QUESTION 4

You have an active directory domain named adatum.com. The domain contains a Hyper-V host named Host1 that runs windows server 2012. Hyper1 contains a

virtual machine named VM1. VM1 is a domain controller that runs Windows Server 2012.

You plan to clone VM1.

You need to recommend which steps are required to prepare VM1 to be cloned. What should you include in the recommendation? (Each correct answer presents part of the solution. Choose all that apply.)

Add VM1 to the Cloneable Domain Controllers group.

RunNew-ADDCloneConfigFile.

Run sysprep.exe /

- A. Add VM1 to the Cloneable Domain Controllers group.
- B. RunNew-ADDCloneConfigFile.
- C. Run sysprep.exe /oobe
- D. RunNew-VirtualDiskClone.
- E. Run Get-ADDCCloningExcludedApplicationList.

Correct Answer: ABE

QUESTION 5

This question consists of two statements: One is named Assertion and the other is named Reason. Both of these statements may be true; both may be false; or one may be true, while the other may be false. To answer this question, you must first evaluate whether each statement is true on its own. If both statements are true, then you must evaluate whether the Reason (the second statement) correctly explains the Assertion (the first statement). You will then select the answer from the list of answer choices that matches your evaluation of the two statements. Assertion: DHCP failover clustering provides load balancing when you use multiple DHCP servers to distribute IP addresses to the network clients. Clients can renew their IP leases even if some of the DHCP servers become unavailable. DHCP failover

clustering supports stateless and stateful IPv4 and IPv6 IP addresses, as well as DHCP policies and filtering.

Reason:

The cluster health monitoring mechanism ensures the fault tolerance of the DHCP service and all configured DHCP settings. It also protects the DHCP database from failures and corruptions. Evaluate the Assertion and Reason statements

and choose the correct answer option.

- A. Both the Assertion and Reason are true, and the Reason is the correct explanation for the Assertion
- B. Both the Assertion and Reason are true, but the Reason is not the correct explanation for the Assertion.
- C. The Assertion is true, but the Reason is false.
- D. The Assertion is false, but the Reason is true.
- E. Both the Assertion and the Reason are false.

Correct Answer: E
