QUESTION 1

Which of the following statements is true about load balancers?

A. Load balancers are a security risk because they obfuscate the origin of connections.

B. Load balancer help to improve the availability and scalability of a service.

C. Load balancers are a single point of failure because they cannot be deployed redundantly.

D. Load balancer require access to private keys in order to be able to forward HTTPS traffic.

E. Load balancers cannot use connection content, such as HTTP cookies, to route traffic.

Correct Answer: B

QUESTION 2

Which sections can exist in a Logstash configuration file? (Choose three correct answers.)

A. output

B. filter

C. input

D. forward

E. generate

Correct Answer: ABC

https://www.elastic.co/guide/en/logstash/current/configuration-file-structure.html

QUESTION 3

Which sub command of docker volumen deletes all volumes which are not associated with a container? (Specify ONLY the sub command without any path or parameterr)

A. Docker does not have a specific sub-command to delete all volumes that are not associated with a container. To delete volumes that are not associated with a container, you can use the docker volume ls command to list all volumes and then manually identify the volumes that are not associated with any container. Once identified, you can use the docker volume rm command followed by the volume name or ID to delete each volume individually.

Correct Answer: A

QUESTION 4

What does the command packer validate template.json do?

A. The command verifies that the latest build of the template can be run without downloading additional images or artifacts.

B. The command verifies that the file template.json is a syntactically correct and complete Packer template.

C. The command verifies that all existing artifacts generated by template.json have their original checksums.

D. The command verifies that all source images referenced in template.json are available and have valid cryptographic signatures.

E. The command verifies that images generated previously by template.json still use the most recent source images.

Correct Answer: B

https://www.packer.io/docs/commands/validate.html

QUESTION 5

What is tested by unit tests?

A. The syntactical correctness of the source code of a software component.

B. The formal validity of a service\\'s external REST API.

C. The integration of multiple component of the same software.

D. The correctness of a specific function of a software component.

E. The throughput, load capacity and latency of a service.

Correct Answer: D
