## QUESTION 1

Which statement about Avaya Aura Presence Services 7.x snap-in licensing is true?

- A. It requires an instance-license.
- B. It requires a per-user license.
- C. It does not require a license to work.
- D. It requires a license file for each snap-in installed.

Correct Answer: C

Presence Services snap-in does not require a license to work. References: Avaya Aura Presence Services Snap-in Reference. Release 7.0.1 (December 2016), page <https://downloads.avaya.com/css/P8/documents/101013646>

## QUESTION 2

You are starting the process to create a server certificate so it can be installed in the Avaya Session Border Controller (SBC).

What must be done before creating a server certificate for SBC?

- A. Generate a Certificate Signing Request (CSR) in SBC.
- B. Run `initTM -d` from SBC CLI.
- C. Add End Entity in Session Manager.
- D. Download a CA PEM file from System Manager.

Correct Answer: A

---

## QUESTION 3

In Avaya Aura Messaging 6.3, which statement is true about Avaya Aura Messaging (AAM) capacities of a system utilizing the Standard Capacity (non-High Capacity) Message Store template?

- A. One Message Store Server supports up to 60000 user mailboxes and you can have 5 active + 1 Redundant Application Servers in a cluster.
- B. One Message Store Server supports up to 6000 user mailboxes and you can have 3 active + 1 Redundant Application Servers in a cluster.
- C. One Message Store Server supports up to 600 user mailboxes and you can have 5 active + 1 Redundant Application Servers in a cluster.
- D. One Message Store Server supports up to 1000 user mailboxes and you can have 3 active + 1 Redundant Application Servers in a cluster.

Correct Answer: B

Dedicated AxC/Directory server: A physical server that manages notification capabilities and the LDAP database and provides communications between application servers and the thirdparty storage server. This server also stores user properties and name and greeting recordings. Not all configurations require a dedicated AxC/Directory server because the AxC/Directory role runs on the Avaya-provided message store. You only need a dedicated AxC/Directory server for: References: Avaya Aura Messaging Overview and Specification, Release 6.3.2 (January 2015) , page <https://downloads.avaya.com/css/P8/documents/101004642>

#### QUESTION 4

A company is deploying Avaya Session Border Controller for Enterprise (SBCE) to support SIP trunking. What is the minimum number of IP-addresses they need to assign to the private and public Network Interface Cards (NICs)?

- A. Two addresses are assigned to the private NIC and two addresses are assigned to the public NIC.
- B. One address is assigned to the private NIC and one address is assigned to the public NIC.
- C. Two addresses are assigned to the private NIC and one address is assigned to the public NIC.
- D. One address is assigned to the private NIC and two addresses are assigned to the public NIC.

Correct Answer: B

Example configuration: References: Avaya Aura Session Border Controller Enterprise Implementation and Maintenance (2012), page 305

## Ensure Interfaces are Enabled

- ▶ Select **System Management > Device Specific Settings > Network Management**.
- ▶ Click on the **Interface Configuration** tab to enable the **A1** and **B1** interfaces.

### QUESTION 5

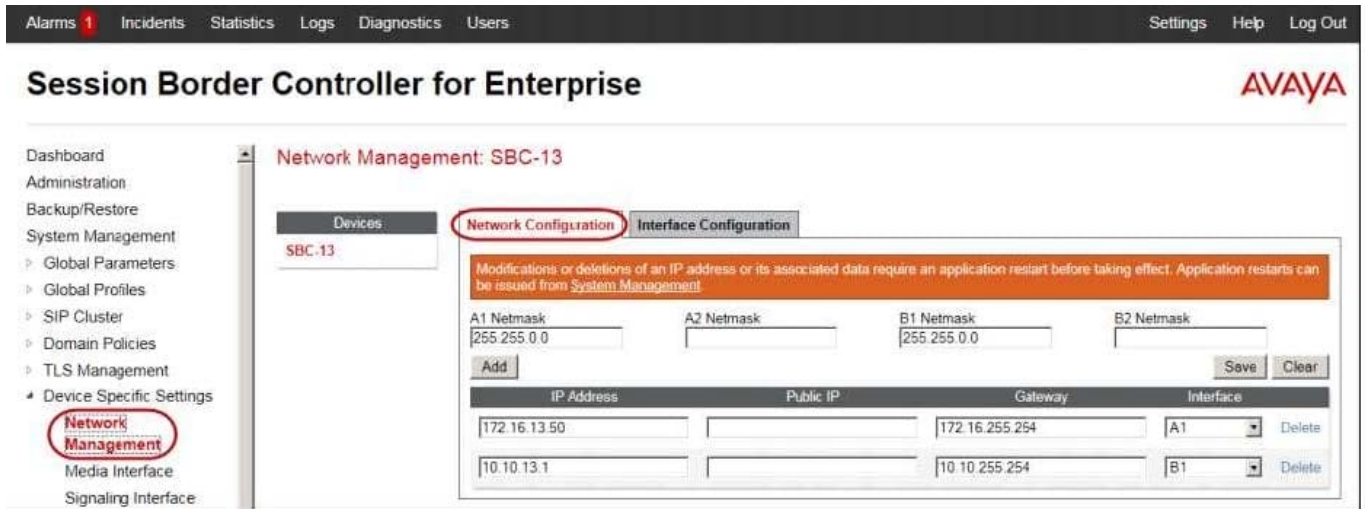

After running the Install wizard on Avaya Session Border Controller for Enterprise (SBCE), you added a Public Outside IP address to the B1 interface. You try to ping this IP address from a PC in the same subnet but it fails.

What would you do first to resolve the issue?

- A. Restart Applications.
- B. Set the Default Gateway router IP address, navigate to the Interfaces and Enable the B1 Interface.
- C. Reboot SBCE.
- D. Navigate to Device Specific Settings > Network Management > Interfaces and Enable the B1 interface.

Correct Answer: D

The interface might need to be enabled.

2. Click on the Interface Configuration tab.

3. Click the Toggle link for both the A1 and the B1 interfaces. The Administrative Status for both A1 and B1 changes to Enabled References: Avaya Aura Session Border Controller Enterprise Implementation and Maintenance (2012), page 204
