QUESTION 1

It is possible to download the same client configuration to an Avaya Equinox™ client when it is connected via the Public Internet (3G/4G) or when it is connected via a corporate Wi-Fi hotspot.

What statement below described the recommended technique used to do this?

- A. The Avaya Aura® Device Services (AADS) returns the configured list of all Public and Private IP addresses that the client should attempt to connect to.
- B. The client must be statically provisioned with the ordered list of server IP addresses that it should attempt to connect to (both private and public).
- C. Split horizon DNS mapping is configured in Avaya Aura® Device Services (AADS) to return FQDNs rather than IP addresses; the client resolves the FQDN to correct server address by DNS or local hosts file.
- D. The client automatically selects a different Avaya Aura® Device Services (AADS) profile when connected to a Public Internet Service Provider (ISP) based on an IP address subnet mapping table downloaded by Avaya Aura® Device Services (AADS).

Correct Answer: C

QUESTION 2

What statement about licensing for Over The Top (OTT) and Team Engagement (TE) is correct?

- A. OTT uses a port-based licensing model while TE uses a user-based licensing model.
- B. OTT uses a user-based licensing model while TE uses a user-based licensing model.
- C. OTT and TE both use a user-based licensing model.
- D. OTT and TE both use a port-based licensing model.

Correct Answer: A

QUESTION 3

You are configuring a STUN/TURN server on the Session Border Controller for Enterprise (SBCE).

Which mechanism is used to ensure a trust relationship exist between Avaya Aura® Media Server (AAMS) and Session Border Controller for Enterprise (SBCE)?

- A. AAMS FQDN has to be configured as a "Trusted Host" on SBCE
- B. A matching username and password is configured on both SBCE and AAMS
- C. SBCE Management IP address has to be configured as a "Trusted Host" on AAMS
- D. SBCE must be enrolled with AAMS using the "Enrolment Wizard"

Correct Answer: A

QUESTION 4

As per the Avaya Equinox™ Conference 9.0, which product provides "always-on messaging"?

- A. Avaya Aura Device Services (AADS)
- B. Avaya Aura Messaging (AAM)
- C. Avaya Multimedia Messaging (AAM)
- D. Communication Manager Messaging (CMM)

Correct Answer: B

QUESTION 5

Which type of Licensing Mechanism is used by Avaya Multimedia Messaging (AMM)?

- A. A license activation code is directly typed into the AMM management console.
- B. AMM is pointed to the hat WebLM Server where the License file is installed
- C. A license is not required other than accepting the EULA
- D. AMM license file is installed locally on AMM Server on local WebLM server

Correct Answer: A
