### QUESTION 1

You are a member of the CsAdministrator group that supports the Lync datacenter for your company. The datacenter consists of one pool that is running Microsoft Lync Server 2013. You deploy SQL Mirroring.

The principal server fails and you are unable to perform a manual failover for more than an hour. Users are placed into resiliency mode.

You need to ensure that failover occurs automatically and without administrator intervention.

What should you do?

- A. Configure a backup registrar.
- B. Configure SQL Mirroring with a witness.
- C. Deploy a Survivable Branch Server (SBS).
- D. Deploy a Survivable Branch Appliance (SBA).

Correct Answer: B

---

### QUESTION 2

You are a member of the CsAdministrator group that supports the Microsoft Lync 2013 datacenter for the Contoso company. The Contoso datacenter has 65,000 users. The datacenter has two pools, named ConPool01 and ConPool02. Both

pools run Microsoft Lync Server 2013. The Central Management Store is hosted on ConPool01.

The servers that run ConPool01 suffer a catastrophic failure. You want users hosted on ConPool01 to be supported permanently on ConPool02.

You need to fail over ConPool01.

What should you do?

- A. Run the Set-CsConfigurationStoreLocation cmdlet.
- B. Run the Install-CsDatabase PowerShell cmdlet, and then the Move-CsManagementServer cmdlet.
- C. Run the Invoke-CsPoolFailover PowerShell cmdlet.
- D. Run the Get-CsDatabaseMirrorState cmdlet, and then the Invoke-CSManagementServerFailover PowerShell cmdlet.

Correct Answer: D

---

### QUESTION 3

You support a customer whose network environment includes Microsoft Lync Server 2013 deployed at two sites. Each site has 1 Mbps of available bandwidth on a multiprotocol label switching (MPLS) network.

Lync-to-Lync calls are getting dropped, and voice quality is degraded using RT Audio WB codec with 100 simultaneous calls. Call admission control (CAC) is not being used. You need to ensure that the RT Audio WB codec is maintained for Lync voice communication without over-allocating-What is the minimum amount of bandwidth you should specify for each site?

- A. 2 Mbps
- B. 3 Mbps
- C. 6 Mbps
- D. 12 Mbps

Correct Answer: C

---

### QUESTION 4

You support a customer whose network environment includes Microsoft Lync Server 2013. A user reports that when he attempts to dial out to a public switched telephone network (PSTN) number, he receives the following message: "Your organization does not support calling this number." All other users are able to call the same number.

You verify that the user is able to dial other Lync users in the network. You need to ensure that the user is able to dial out to PSTN numbers.

What should you do?

- A. Modify the voice policy for this user for PSTN usage.
- B. Make sure the session initiation protocol (SIP) provider is sending the invite to a Mediation Server.
- C. Open outbound TCP port 5061 on the user's computer.
- D. Change the associated normalization rule in the dial plan policy.

Correct Answer: A

---

### QUESTION 5

You support a network environment for a company named Contoso. The network includes Microsoft Lync Server 2013. Contoso recently acquired Litware, Inc.

You configure Lync to support Session Initiation Protocol (SIP) domains named contoso.com and litware.com. You configure several Lync Response Groups.

You discover that Litware Response Group agents are not receiving calls. Contoso Response Group agents continue to receive calls.

You need to restore call functionality from the user to the Litware Lync Server Response Group agent.

Which three steps should you perform in sequence? (To answer, move the appropriate three actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Remove the Lync Server Response Group agent from the group.	
Update the user's SIP Uniform Resource Identifier (URI).	
Update the Lync Server Response Group agent's SIP Uniform Resource Identifier (URI).	
Add the Lync Server Response Group agent to the group.	
Tell the Lync Server Response Group agent to sign out and then sign back in to the Lync client.	
Tell the user to sign out and then sign back in to the Lync client.	

Correct Answer:

	Answer Area
	Remove the Lync Server Response Group agent from the group.
Update the user's SIP Uniform Resource Identifier (URI).	Update the Lync Server Response Group agent's SIP Uniform Resource Identifier (URI).
	Tell the user to sign out and then sign back in to the Lync client.
Add the Lync Server Response Group agent to the group.	
Tell the Lync Server Response Group agent to sign out and then sign back in to the Lync client.
