QUESTION 1

You are an administrator who uses Project Server 2013 and Project Professional 2013. The leadership of your organization asks you to assign resources to teams so that the resources are aligned with a team definition. You need to implement this request. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Go to the Resource Center on Project Server 2013, edit all resources, and assign them to the correct team.
- B. Create a custom field in the resource global file and add a team field.
- C. Instruct project managers to add resources to the project plan in Project Professional 2013. Then add the Team Name field and define the team associated with the resource.
- D. In Project Web App (PWA), use server settings. Then use enterprise custom fields and find the predefined Team Name custom field. Create a lookup table for that custom field to match your organization's structure.

Correct Answer: BD

B: Use enterprise custom fields and lookup tables in Project Web App to customize Project Server data. D: Use the New Custom Field page in Project Web App settings to specify the options for a custom field Note:

In Project Web App, you can use Enterprise Custom Fields to help establish consistency across all the organization's projects. That way that you can ensure that fields and associated lookup tables are used in the same manner for all

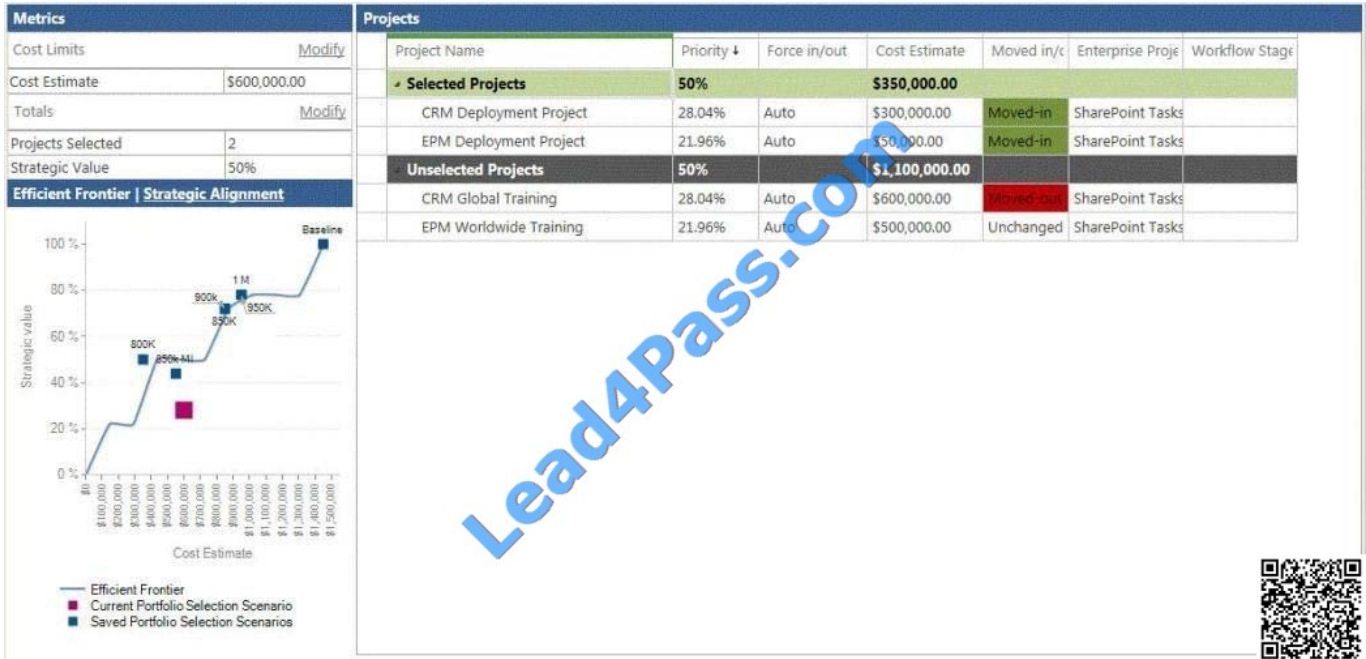

projects, tasks, resources, and assignments in a given instance of Project Web App.

Add or edit enterprise custom fields in Project Server 2013

QUESTION 2

The IT department uses Project Online to analyze the projects they will execute the next year. Four projects with their respective priority and costs are shown in the exhibit. (Click the Exhibit button.)

The team needs to get the most value from their portfolio, but some last minute restrictions could change their selection. A mutually inclusive dependency is added between the two CRM projects. A mutually inclusive dependency is also added between the two EPM projects. You need to assist the team in achieving the most value in their portfolio, given the constraints shown in the exhibit. You enforce the dependencies and recalculate the analysis. Which two statements become true? (Each correct answer presents part of the solution. Choose two.)

- A. The Portfolio Strategic Value will be of 56%.
- B. The sum of Cost Estimate of Selected Projects will be 550k.
- C. The sum of Cost Estimate of Selected Projects will be 900k.
- D. The Portfolio Strategic Value will be of 44%.

Correct Answer: BD

QUESTION 3

You are a project administrator and are implementing Project Server 2013 for a large organization. You are asked to ensure that resource assignments, work load, and completion of work can be reported and rolled up by organizational structure. You need employ the correct functionality in order to configure Project Server 2013. What should you do?

- A. Define your information hierarchy in the server settings by using the Resource Breakdown Structure (RBS), located in the Enterprise custom fields, and RBS\\'s lookup field table.
- B. Use the Resource Center in Project Web App (PWA) to edit your resources and use the Group field to define the department they are associated with.
- C. Define your information hierarchy in the server settings by using the Project Department field, found in the Enterprise custom fields, and its supporting department table. Define the organizational structure and assign each project added to Project Server 2013.
- D. Require all project managers to use Project Professional 2013 to assign a department to the Group field from the

Resource Sheet view when they assign resources.

Correct Answer: A

QUESTION 4

You are a Project Server 2013 administrator, and you support the Project Management Office (PMO) project managers who need to estimate project hours and costs without knowing the specific resource names. There are options available to accommodate this request when creating resources on Project Server 2013. You need to allow project managers to plan workload and cost from the task level up. What should you do?

- A. Create a budget work resource in the resource center and have project managers use the Build Team From Enterprise function to assign the resource at the task level.
- B. Create two custom task level fields named Resource Hours and Resources Costs, and add them to the default view so project managers can input their estimations of hours and cost at the task level.
- C. Have project managers add resources from the Build Team From Enterprise function when building their projects, and tell them to guess who the resource might be, since the resource can be replaced later by the correct resource.
- D. Create a generic work resource in the resource center and have project managers use the Build Team From Enterprise function to assign the generic resources at the task level.

Correct Answer: D

QUESTION 5

DRAG DROP

You are a program manager with administrator rights/ and you use Project Server 2013 to implement a data warehouse. You set up your program master project with subprojects for each implementation area. You need to use the Project Center view to create a custom view of the data warehouse projects for your vice president. Which four actions should you perform in sequence? (To answer, move the appropriate four actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Steps to accomplish the task	Order of the steps to accomplish the task
<p>Open Project Web App (PWA) settings, create a new Project Center view for the program, and add the new custom field to the view. Filter for the code specific to the program, and enable security access for the required category groups.</p>	<p><i>www.lead4pass.com</i></p>
<p>Open the Project Web App (PWA) and use PWA to open each project required. Use project details to add the program level code value to each of the projects in the program.</p>	
<p>Open Project Web App (PWA) settings and create an enterprise custom field to associate each project to a program ID.</p>	
<p>Open the Project Web App (PWA) and choose the new program view.</p>	

Correct Answer:

Steps to accomplish the task	Order of the steps to accomplish the task
	<p>Open Project Web App (PWA) settings and create an enterprise custom field to associate each project to a program ID.</p>
	<p>Open Project Web App (PWA) settings, create a new Project Center view for the program, and add the new custom field to the view. Filter for the code specific to the program, and enable security access for the required category groups.</p>
	<p>Open the Project Web App (PWA) and choose the new program view.</p>
	<p>Open the Project Web App (PWA) and use PWA to open each project required. Use project details to add the program level code value to each of the projects in the program.</p>
