QUESTION 1

You have a server named Server1 that runs Windows Server 2012 and has the Windows Deployment Services server role installed.

You recently removed a third-party DHCP server from the network, and then installed the DHCP Server server role on Server1.

You create a scope on Server1.

You discover that client computers attempting to receive a Windows 8 image fail to connect to Server1.

You verify that the client computers on the network can receive an IP address from Server1.

You need to ensure that the computers attempting to receive an image can connect to Server1.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. From the DHCP console, click Server Options, and then set the value of Option 66 to Server1.
- B. From the Windows Deployment Services console, click the PXE Response tab, and then set the value of the Delay in seconds to 3.
- C. From the Windows Deployment Services console, click the DHCP tab, and then select the Do not listen on port 67 check box.
- D. From the DHCP console, click Server Options, and then set the value of Option 67 to instal.
- E. wim.
- F. From the Windows Deployment Services console, click the DHCP tab, and then select the Configure DHCP option 60 to indicate that this is also a PXE server check box.

Correct Answer: CE

QUESTION 2

You plan to deploy multiple client computers that will each contain a 4-TB hard disk drive. The hard disk drives will be initialized as GPT drives.

You need to identify the maximum number of primary partitions that can be created on a GPT drive.

How many primary partitions should you identify?

- A. 4
- B. 64
- C. 128
- D. 256

Correct Answer: C

QUESTION 3

You are preparing a GPT disk for a Unified Extensible Firmware Interface (UEFI)-based computer from Windows Preinstallation Environment (Windows PE).

You need to identify which file system must be used for the EFI system partition, the MSR partition, and the Windows partition.

What should you identify? (To answer, drag the appropriate actions to the correct partitions. Each action may be used once, more than once, or not at all.)

You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Actions	Answer Area
Format the partition as NTFS.	EFI System Partition: Action
Format the partition as FAT32.	MSR Partition: Action
Leave the partition unformatted.	Windows Partition: Action

Correct Answer:

Actions	Answer Area
	EFI System Partition: Format the partition as FAT32.
	MSR Partition: Leave the partition unformatted.
	Windows Partition: Format the partition as NTFS.

QUESTION 4

You have a Windows Assessment and Deployment Kit (Windows ADK) environment that contains a file server named Served. Served runs Windows Server 2012.

You copy the Windows 8 installation media to a shared folder on Served. You install Windows 8 on a reference computer, and then you generalize the installation.

You need to replace the image in the share with an image of the reference computer.

Which three actions should you perform in sequence? (To answer, move the appropriate three actions from the list of actions to the answer area and arrange them in the

correct order.)

Select and Place:

Actions	Answer Area
Copy the image to the shared folder and save the image as Install.wim.	
Start the reference computer by using Windows Preinstallation Environment (Windows PE).	
Run imagex.exe on Server1.	
Copy the image to the shared folder and save the image as Windows.wim.	
Run dism.exe on the reference computer.	
Start Server1 by using Windows Preinstallation Environment (Windows PE).	

Correct Answer:

Actions	Answer Area
	Start the reference computer by using Windows Preinstallation Environment (Windows PE).
	Run dism.exe on the reference computer.
Run imagex.exe on Server1.	Copy the image to the shared folder and save the image as Install.wim.
Copy the image to the shared folder and save the image as Windows.wim.	
Start Server1 by using Windows Preinstallation Environment (Windows PE).	

QUESTION 5

You are preparing the hard disk drive for a Unified Extensible Firmware Interface (UEFI)-based computer.

You start the computer from a Windows Preinstallation Environment (Windows PE) environment.

You need to ensure that you can start Windows from the hard disk drive.

Which command should you use?

- A. Bcdedit
- B. Bcdboot
- C. Diskpart
- D. Bootsect

Correct Answer: B
