QUESTION 1

You have a server named Server1 that runs Windows Server 2012 and has the Windows Deployment Services server role installed.

You recently removed a third-party DHCP server from the network, and then installed the DHCP Server server role on Server1.

You create a scope on Server1.

You discover that client computers attempting to receive a Windows 8 image fail to connect to Server1.

You verify that the client computers on the network can receive an IP address from Server1.

You need to ensure that the computers attempting to receive an image can connect to Server1.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. From the DHCP console, click Server Options, and then set the value of Option 66 to Server1.
- B. From the Windows Deployment Services console, click the PXE Response tab, and then set the value of the Delay in seconds to 3.
- C. From the Windows Deployment Services console, click the DHCP tab, and then select the Do not listen on port 67 check box.
- D. From the DHCP console, click Server Options, and then set the value of Option 67 to instal.
- E. wim.
- F. From the Windows Deployment Services console, click the DHCP tab, and then select the Configure DHCP option 60 to indicate that this is also a PXE server check box.

Correct Answer: CE

QUESTION 2

You work for are an OEM system builder.

A customer assembles a computer and plans to purchase an OEM DVD of Windows 8 to install on the computer. The customer plans to downgrade to Windows 7, and then to resell the computer at a later date.

What should you tell the customer?

- A. The customer can purchase the OEM DVD of Windows 8, but must install Windows 8. The customer can then transfer the software and the license to someone else.
- B. The customer can purchase the OEM DVD of Windows 8, and then install Windows 7 Professional.
- C. Only an OEM system builder can preinstall Windows 8 OEM on hardware supplied by the OEM system builder.

D. The customer can purchase the OEM DVD of Windows 8, but must install Windows 8. The customer cannot transfer the software or the license to anyone else.

Correct Answer: A

QUESTION 3

You work for an OEM system builder.

What are three possible ways to distribute Windows 8 OEM desktop operating system licenses? (Each correct answer presents a complete solution. Choose three.)

- A. A sealed System Builder pack that comes with the purchase of a new computer that has an operating system preinstalled
- B. A sealed System Builder pack without the purchase of a computer
- C. A sealed System Builder pack that comes with the purchase of a new computer that does not have an operating system preinstalled
- D. An unsealed System Builder pack without the purchase of a computer
- E. An unsealed System Builder pack that comes with the purchase of a new computer that does not have an operating system preinstalled
- F. An unsealed System Builder pack that comes with the purchase of a new computer that has an operating system preinstalled

Correct Answer: ACF

QUESTION 4

You have a technician computer named Computer1 and a server named Server1.

You plan to deploy several images to computers on the network. The planned installation will include multiple language packs.

You create a folder on Server1 and share the folder as Share1.

You need to configure Share1 as a distribution share from Windows System Image Manager (Windows SIM).

What should you do first?

- A. Copy the Windows 8 installation media to Share1.
- B. Create a folder named Install in Share1.
- C. Copy the Windows Assessment and Deployment Kit (Windows ADK) to Share1.

D. Create a folder named Packages in Share1.

Correct Answer: D

QUESTION 5

You have a technician computer. The computer is a member of the Active Directory domain.

You plan to deploy several customized images over the network by using the Windows Assessment and Deployment Kit (Windows ADK).

You need to deploy the images by using Pre-Boot Execution Environment (PXE).

What should you install on the network before deploying the images?

- A. The Express Deployment Tool (EDT)
- B. The Windows Automated Installation Kit (Windows AIK)
- C. The Windows Deployment Services server role
- D. The Windows OEM Preinstallation Kit (Windows OPK)

Correct Answer: C
