### QUESTION 1

You work for an OEM system builder.

You deploy Windows 8 to a client computer that has a 64 GB-Solid State Drive (SSD) by using a configuration set from a USB key.

You need to reduce the size of the Windows installation as much as possible.

Which folder should you remove from the installation?

- A. %WINDIR%\Panther
- B. %WINDIR%\Addins
- C. %WINDIR%\Configsetroot
- D. %WINDIR%\Branding

Correct Answer: C

---

### QUESTION 2

You have a server named Server1 that runs Windows Server 2012 and has the Windows Deployment Services server role installed.

You recently removed a third-party DHCP server from the network, and then installed the DHCP Server server role on Server1.

You create a scope on Server1.

You discover that client computers attempting to receive a Windows 8 image fail to connect to Server1.

You verify that the client computers on the network can receive an IP address from Server1.

You need to ensure that the computers attempting to receive an image can connect to Server1.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. From the DHCP console, click Server Options, and then set the value of Option 66 to Server1.
- B. From the Windows Deployment Services console, click the PXE Response tab, and then set the value of the Delay in seconds to 3.
- C. From the Windows Deployment Services console, click the DHCP tab, and then select the Do not listen on port 67 check box.
- D. From the DHCP console, click Server Options, and then set the value of Option 67 to instal.
- E. wim.
- F. From the Windows Deployment Services console, click the DHCP tab, and then select the Configure DHCP option 60 to indicate that this is also a PXE server check box.

Correct Answer: CE

---

### QUESTION 3

Your network contains an isolated subnet. The subnet contains a technician computer that runs Windows 8 and 50 client computers that do not have an operating system installed. No other computers are located on the subnet.

You need to identify a strategy to deploy Windows 8 to the computers concurrently.

Which deployment strategy should you identify?

- A. An unattended installation by using USB keys
- B. An unattended installation by using a network share
- C. A network installation by using Windows Deployment Services (WDS)
- D. A network installation by using the Express Deployment Tool (EDT)

Correct Answer: C

---

### QUESTION 4

You are creating a Windows 8 answer file.

You need to modify the order in which the app tiles appear on the Start screen.

Which component should you add to the answer file?

- A. Microsoft-Windows-Deployment
- B. Microsoft-Windows-Setup
- C. Microsoft-Windows-SharedAccess
- D. Microsoft-Windows-Shell-Setup

Correct Answer: D

---

### QUESTION 5

You work for an OEM system builder.

What are three possible ways to distribute Windows 8 OEM desktop operating system licenses? (Each correct answer presents a complete solution. Choose three.)

- A. A sealed System Builder pack that comes with the purchase of a new computer that has an operating system

preinstalled

B. A sealed System Builder pack without the purchase of a computer

C. A sealed System Builder pack that comes with the purchase of a new computer that does not have an operating system preinstalled

D. An unsealed System Builder pack without the purchase of a computer

E. An unsealed System Builder pack that comes with the purchase of a new computer that does not have an operating system preinstalled

F. An unsealed System Builder pack that comes with the purchase of a new computer that has an operating system preinstalled

Correct Answer: ACF
