QUESTION 1

You work as an Office Assistant for Media Perfect Inc. You have created a spreadsheet in Excel 2010 and shared it with the other employees of the company. You want to protect the worksheet and locked cells by permitting or prohibiting other employees to select, format, insert, delete, sort, or edit areas of the spreadsheet. Which of the following options will you use to accomplish the task?

- A. Mark as Final
- B. Encrypt with Password
- C. Protect Current Sheet
- D. Protect Workbook Structure

Correct Answer: C

The various Protect Workbook options are as follows:

1.

Mark as Final: This option is used to make the document read-only. When a spreadsheet is marked as final, various options such as typing, editing commands, and proofing marks are disabled or turned off and the spreadsheet becomes read-only. This command helps a user to communicate that he is sharing a completed version of a spreadsheet. This command also prevents reviewers or readers from making inadvertent modifications to the spreadsheet.

2.

Encrypt with Password: When a user selects the Encrypt with Password option, the Encrypt Document dialog box appears. In the Password box, it is required to specify a password. Microsoft is not able to retrieve lost or forgotten passwords, so it is necessary for a user to keep a list of passwords and corresponding file names in a safe place.

3.

Protect Current Sheet: This option is used to select password protection and permit or prohibit other users to select, format, insert, delete, sort, or edit areas of the spreadsheet. This option protects the worksheet and locked cells.

4.

Protect Workbook Structure: This option is used to select password protection and select options to prevent users from changing, moving, and deleting important data. This feature enables a user to protect the structure of the worksheet.

5.

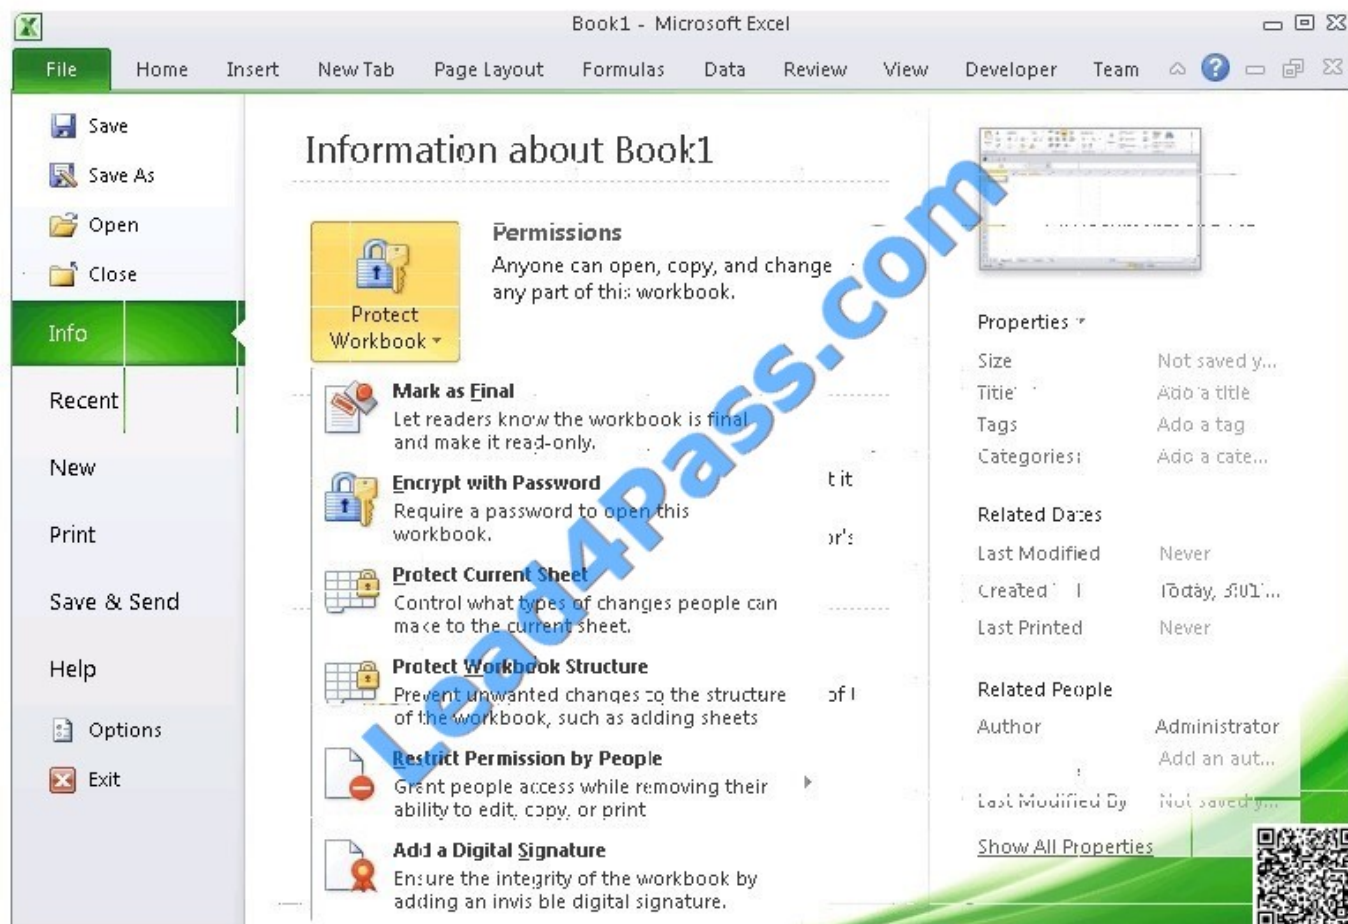

Restrict Permission by People: This option works on the basis of Window Rights Management to restrict permissions. A user is required to use a Windows Live ID or a Microsoft Windows account to restrict permissions. These permissions can be applied via a template that is used by the organization in which the user is working. These permissions can also be added by clicking Restrict Access.

6.

Add a Digital Signature: This option is used to add a visible or invisible digital signature. It authenticates digital information such as documents, e-mail messages, and macros by using computer cryptography. These signatures are created

by specifying a signature or by using an image of a signature for establishing authenticity, integrity, and non-repudiation.

QUESTION 2

You work as an Office Assistant for Dreams Unlimited Inc. You use Microsoft Excel 2010 for creating various types of reports. You have created a report in the format given below:

	A	B	C	D
1	Sales Person	Exceeded Jan Quota	Exceeded Feb Quota	Exceeded Mar Quota
2	Mark	Yes	No	No
3	Sarah	Yes	Yes	No
4	David	Yes	Yes	Yes
5	Sasha	No	Yes	Yes
6	Formula	Description (result)		
		Counts how many sales people exceeded both their January and February Quota		
7				

In the A7 cell, you are required to put a formula so that it can fulfill the description provided in the B7 cell. Which of the following formulas will provide the required result?

- A. COUNTIF(B2:C5,"=Yes")
- B. COUNTIFS(B2:C5,"=Yes")
- C. COUNTIF(B2:B5,"=Yes",C2:C5,"=Yes")
- D. COUNTIFS(B2:B5,"=Yes",C2:C5,"=Yes")

Correct Answer: D

In order to get the required result, you will have to insert the following formula in the B7 cell:

COUNTIFS(B2:B5,"=Yes",C2:C5,"=Yes")

Only Sarah and David have exceeded their January and February quotas, therefore the formula will provide 2 as the result.

Answer option C is incorrect. The COUNTIF function of Excel does not support multiple criteria. Answer options A and B are incorrect. This formula will count all the cells that have the value "Yes" in the range B2:C5. As multiple criteria are not

applied in the formula, it will provide 6 as the result. In the A7 cell, you are required to put a formula so that it can fulfill the description provided in the B7 cell.

Which of the following formulas will provide the required result? A. COUNTIF(B2:C5,"=Yes")

- B. COUNTIFS(B2:C5,"=Yes")
- C. COUNTIF(B2:B5,"=Yes",C2:C5,"=Yes")
- D. COUNTIFS(B2:B5,"=Yes",C2:C5,"=Yes")

Answer: D

In order to get the required result, you will have to insert the following formula in the B7 cell:

COUNTIFS(B2:B5,"=Yes",C2:C5,"=Yes")

Only Sarah and David have exceeded their January and February quotas, therefore the formula will provide 2 as the result.

Answer option C is incorrect. The COUNTIF function of Excel does not support multiple criteria. Answer options A and B are incorrect. This formula will count all the cells that have the value "Yes" in the range B2:C5. As multiple criteria are not

applied in the formula, it will provide 6 as the result.

QUESTION 3

You work as an Office Assistant for Tech Perfect Inc. The company has a Windows-based network. You are creating a business report by using Microsoft Excel 2010. You have arranged sales data as shown below:

	A	B	C	D	E
1			Target Achieved (In US\$)		
2	#	Name	2008	2009	2010
3	1	Rick	46,900	78,000	82,000
4	2	Mark	42,500	63,500	110,500
5	3	Adam	56,120	59,200	99,700
6	4	Ada	47,200	61,500	99,900
7	5	Andy	49,000	69,200	110,250
8	6	David	47,000	71,100	111,000

You want to provide pictorial representation of the trend of the sales data in front of each row. Which of the following actions will you take to accomplish the task with the least amount of administrative burden?

- A. Use stand-alone slicers.
- B. Configure form controls.
- C. Create sparklines.
- D. Create a PivotTable report.

Correct Answer: C

Target Achieved (In US\$)					
	Name	2008	2009	2010	Trends
1	Rick	46,900	78,000	82,000	
2	Mark	42,500	63,500	110,500	
3	Adam	56,120	59,200	99,700	
4	Ada	47,200	61,500	99,900	
5	Andy	49,000	69,200	110,250	
6	David	47,000	71,100	111,000	

In order to accomplish the task with the least amount of administrative burden, use sparklines. Sparklines, introduced in Microsoft Office 2010, are tiny charts that can fit in a cell. The sparklines can be used to show trends in a small amount of

space. The sparklines visually summarize trends alongside data.

The sparklines can be added through the Insert tab.

Answer option A is incorrect. Stand-alone slicers are referenced from Online Analytical Processing (OLAP) Cube functions. These stand-alone slicers can be connected with any PivotTable in future. They can be added by using the slicer

button on the Ribbon. They need to be manually linked into grids as required.

Answer option B is incorrect. A form control is an original control that is compatible with old versions of Excel, beginning with Excel version 5.0. It is designed for use on XLM macro sheets. It can be used when a user wants to simply

interact

with cell data without using VBA code and when he wants to add controls to chart sheets. By using form controls, the user can run macros. He can attach an existing macro to a control, or write or record a new macro. These controls cannot

be added to UserForms, used to control events, or modified to run Web scripts on Web pages.

Answer option D is incorrect. A PivotTable report is used to summarize large amounts of data, to analyze numerical data, and to answer unexpected questions about data.

QUESTION 4

Rick works as an Office Assistant for Tech Perfect Inc. He is creating a user form through Microsoft Excel 2010. While creating forms for a number of users, he is required to repeat some of the actions multiple times. It is a very time consuming process. To resolve the issue, he has created a macro to record the sequence of actions to perform a certain task. Now, he wants to run the macro to play those exact actions back in the same order. Which of the following steps will Rick take to accomplish the task?

Each correct answer represents a part of the solution. Choose all that apply.

- A. Click on the 'Macros' icon in the 'Developer' tab under the 'Code' category to run a Macro.
- B. The Macro will be run in any worksheet of the Workbook.
- C. Put the workbook in a trusted location.
- D. The Macro dialogue box appears on the screen which contains a list of Macros in it. Select the Macro to run and click the Run button.
- E. Run the created Macro by using the shortcut key specified while creating the Macro.

Correct Answer: ADBE

Take the following steps to run a Macro:

1.

Click on the 'Macros' icon in the 'Developer' tab under the 'Code' category to run a Macro.

2.

The Macro dialogue box appears on the screen which contains a list of Macros in it. Select the Macro to run and click the Run button.

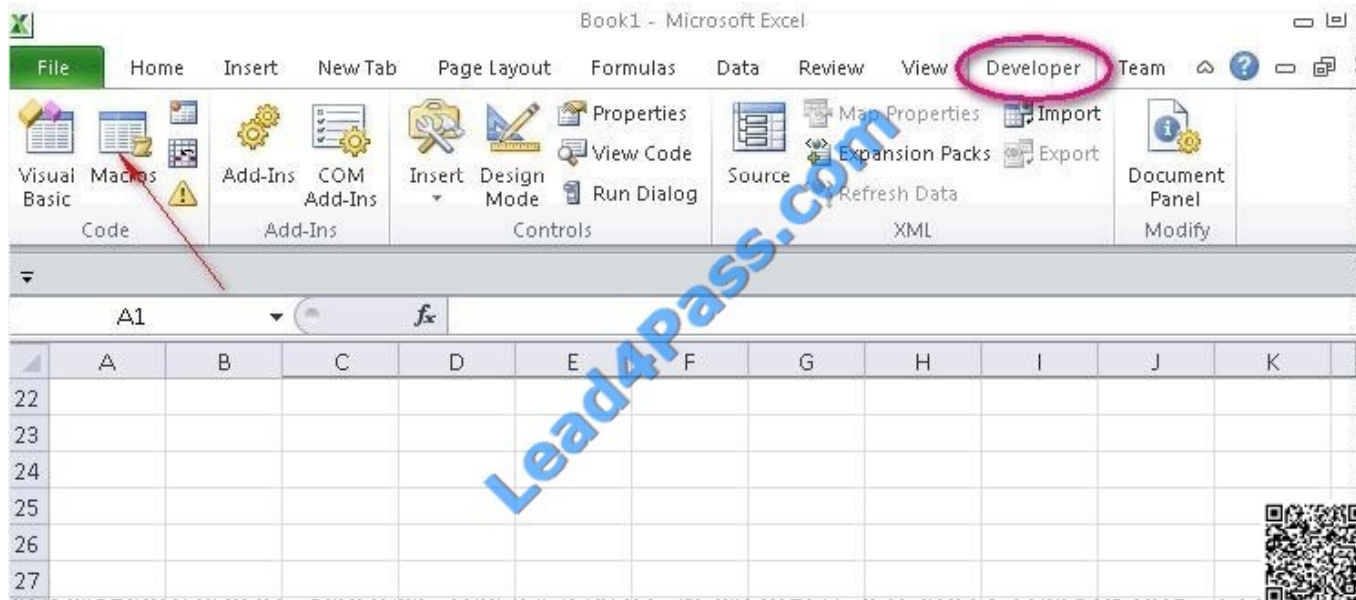

3.

The Macro will be run in any worksheet of the Workbook.

4.

A user can run the created Macro by using the shortcut key that he has specified while creating the Macro. The macro records the user's mouse clicks and keystrokes while he works and lets him play them back later. The macro can be used to record the sequence of commands that the user uses to perform a certain task. When the user runs the macro, it plays those exact commands back in the same order. Answer option C is incorrect. The benefit of connecting to

external data from Microsoft Excel is that a user can automatically update Excel workbooks from the real data source whenever the data source is updated with new information. It is possible that the external data connection might be disabled on the computer. For connecting to the data source whenever a workbook is opened, it is required to enable data connections by using the Trust Center bar or by putting the workbook in a trusted location.

QUESTION 5

You work as a technician in Tech Perfect Inc. The Network Administrator of the company installs the Microsoft Excel 2010 application on the network. You open the application and see various changes in Excel 2010. You have to open an

existing worksheet through the application.

You are unable to find the Office button.

Mark the option that you will click to accomplish the task.

Point and Shoot:

The screenshot shows the Microsoft Excel interface with the 'Home' tab selected. The formula bar displays the formula $=D3-(10/100 * D3)$ for cell E3. The spreadsheet contains the following data:

	A	B	C	D	E	F	G
1	Month/Year	20	20	20	20	20	20
2	September	18226.36	16403.724	14763.35	132240	119016	107114.4
3	October	17658.25	15892.425	14303.18	12872.86	11585.58	10427.02

Hot Area:

This screenshot is identical to the one above, showing the same Excel spreadsheet with the formula $=D3-(10/100 * D3)$ in cell E3 and the data table.

Correct Answer:

The screenshot shows the Microsoft Excel interface. The ribbon is set to 'Home'. The formula bar shows the formula $=D3-(10/100 * D3)$ for cell E3. The spreadsheet has columns A through G and rows 1 through 3. The data is as follows:

	A	B	C	D	E	F	G
1	Month/Year	20	20	20	20	20	20
2	September	18226.36	16403.724	14763.35	132240	119016	107114.4
3	October	17658.25	15892.425	14303.18	12872.86	11585.58	10427.02

You will have to click File button to accomplish the task. Clicking the File button will open the full- screen Backstage View of the sheet
