QUESTION 1

-- Exhibit -- Exhibit -Refer to the exhibit. A Steelhead administrator has recently decided to implement two Interceptor appliances and one Steelhead appliance on his data center. After configuring the Interceptor and the Steelhead, he noticed the information on the screen when he logs into one of the Interceptor appliances. What does that represent? (Select 2)

The screenshot shows the Riverbed Interceptor Management Console. The top navigation bar includes 'Home', 'Configure', 'Reports', 'Support', 'Save', 'Restart', and 'Healthy'. The main content area is titled 'Home' and displays a welcome message: 'Welcome to the Management Console for IC1!'. Under the 'Interceptors' section, two appliances are shown: 'IC1 This Interceptor' and 'IC2 Connected', connected by a double-headed arrow. At the bottom, a table shows 'Connections' as '0/200' and 'Steelheads' with a circular progress indicator.

- A. This is normal ?it represents two Interceptor appliances in failover mode, with one Steelhead appliance in the cluster.
- B. This is normal ?it represents two Interceptor appliances in parallel mode, with one Steelhead appliance in the cluster.
- C. This is not normal ?the Steelhead appliance is showing none of 200 connections available.
- D. This is normal ?the Steelhead appliance is showing there are 200 connections available.

Correct Answer: AD

QUESTION 2

When deploying Interceptor appliances on aggregated links, you must: (Select 2) A. configure each in-path interface to have a unique IP address

B. configure WCCP

C. configure the allow neighbor failure command

D. configure each in-path interface to have the same IP address

E. configure the no arp filter response command

Correct Answer: AE

QUESTION 3

To verify that the Steelhead Mobile client software is running, what process should you look for in the Windows Task Manager?

A. rbtsport.exe

B. taskmgr.exe

C. svchost.exe

D. services.exe

E. rivmobile.exe

Correct Answer: A

QUESTION 4

The adaptive data streamlining settings are:

A. Default , RiOS SDR- L, RiOS SDR-M

B. Default , RiOS DSR- Adaptive, RiOS DSR-M

C. Default , RiOS SDR- Adaptive, RiOS SDR-M

D. Default , RiOS SDR- Adaptive, RiOS SDR-L

E. RiOS SDR- Adaptive, RiOS SDR-L, RiOS DSR-M

Correct Answer: C

QUESTION 5

When troubleshooting a datastore wrapping alarm with 1 day wrapping notification configured, which of the following should be examined? (Select 2)

- A. If the unit was mis-sized
- B. If stream based encrypted traffic is being sent across the link as optimized
- C. If your fixed-target rules are pointing to the correct Steelhead appliance
- D. If Connection Forwarding was properly configured

Correct Answer: AB
