QUESTION 1

You are at school and logged in to a Windows 7 computer using a standard user account.

You need to change some of the properties of a desktop icon for an assignment. Your instructor provides you with an administrator username and password and asks you to do two tasks.

When you open the Need Admin Access Properties window, you see the following image:

Use the drop-down menus to select the answer choice that completes each statement. Each correct selection is worth one point.

Hot Area:

Answer Area

To allow this log file to be opened as an administrator, you should **[answer choice]**

click Advanced and choose "run as administrator."
click Run and choose "run as administrator."
click the Security tab and give admin rights to your standard account.

To allow this log file to be opened in a maximized window, you should **[answer choice]**

click Run and choose "maximized window."
click the General tab and click "change to open the document as a maximized window."
click Change Icon to choose "run as a maximized window."

Correct Answer:

Correct Answer: C

References: https://blogs.msdn.microsoft.com/james_morey/2005/04/21/what-the-heck-is-domain-isolation/

QUESTION 4

Windows Firewall is a built-in, host-based, stateless firewall.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

A. Stateful

B. Network layer

C. Packet filter

D. No change is needed

Correct Answer: A

QUESTION 5

Your Web server crashes at exactly the point where it reaches 1 million total visits. You discover the cause of the server crash is malicious code. Which description best fits this code?

A. Virus

B. Worm

C. Polymorphic Virus

D. Logic Bomb

Correct Answer: D

A logic bomb is malware that executes its malicious activity when a certain condition is met, often when a certain date/time is reached. In this case it waited for the Web server to pass a certain threshold.
